Eden's primary objective is to provide the most suitable solution according to the desired level of comfort and sustainable investment.

Thanks to our unequivocal aspiration to constantly pursue full customer satisfaction, over the years **Eden** has succeeded in consolidating an engineering organization with the tools and capabilities needed to design, develop and produce dedicated solutions, in record times and for multiple application areas. Our ultimate goal is to produce the one most valuable thing in a building: comfort.

Mission

# Our mission

Our mission is clear: to remain faithful to our values and ethical principles that since 1974 have allowed us to grow by doing what we do best: improving the quality of life of our customers, offering optimal comfort guaranteed by innovative solutions and informed decisions.

For over 45 years we have committed ourselves daily to the research, design and production of Made in Italy solutions that provide efficient and high-performing products to improve the psychophysical wellbeing of the occupants and ensure greater environmental sustainability.

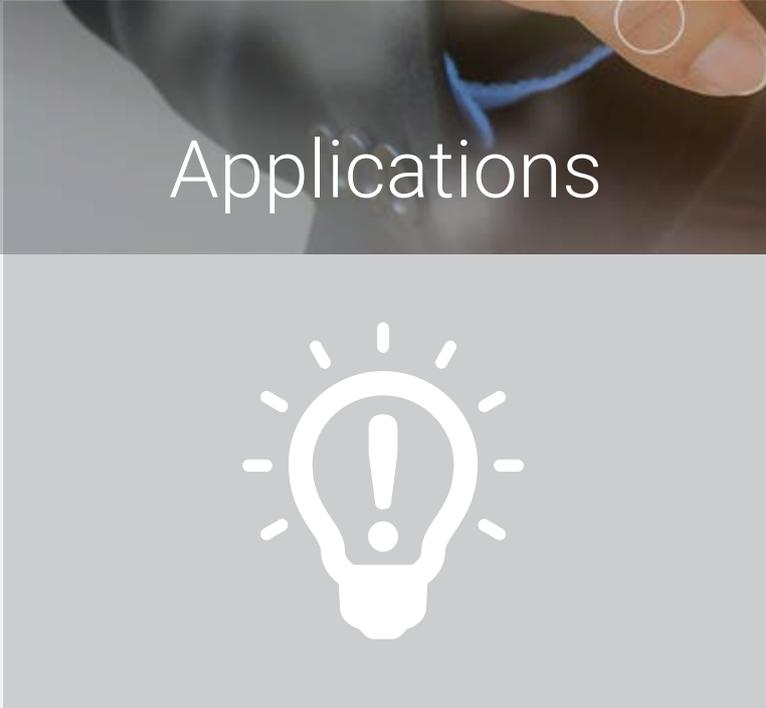

Over the years we have adapted and evolved, but our essence has remained integral.

We always get back in the game to better understand the needs of our customers, and we are proud to realize that our values and know-how have won us the trust of a vast and demanding international clientele. Our customers see us as a reliable partner who can supply the most valuable thing in a building: comfort.

Our experience, perseverance and total dedication to full customer satisfaction - ensured by the human capital of our team - have allowed us to achieve important goals over the years, including the privilege of being chosen as the ideal partner in hundreds of projects of unquestionable prestige and international fame.

# Applications

# Innovative solutions, for every kind of need

The experience and know-how acquired in over 45 years of activity in the sector, wide-ranging flexibility and dynamism that has always characterized our company's DNA and the ever increasing attention paid to the human capital that makes up our team, have garnered us recognition on the market today as a reliable player who offers fully customized solutions according to customer specifications.

Thanks to our engineering, a research laboratory and partnership with the foremost European laboratories, we respond to all sorts of needs, whether it involves air treatment for comfort purposes or specific areas such as industry, manufacturing, naval, hospital, food or oil & gas, where durability, reliability and full operation must always be guaranteed.

With dedication and passion we know how to listen to the needs of our customers, and supply turnkey solutions, guaranteed by years of experience in the sector and by products designed, developed and manufactured entirely in Italy.

# Customized solutions

# Customized solutions, without limits

Flexibility and expertise in providing customized solutions are characteristics that have always distinguished our Group.

Thanks to over 45 years of experience, a trained technical staff and a dynamic and flexible production department, we are able to satisfy the most varied requests of customers, guaranteeing a broad range of customization, from a purely aesthetic aspect to products with specific finishes, up to more advanced solutions that affect the thermodynamic, mechanical and aeraulic environment. All guaranteed by high-precision design process with a corresponding feasibility study.

Applications include dedicated installations in buildings subject to constraints, such as museums or historic buildings, where it is necessary to provide customized solutions that comply with various restrictions such as dimensional limits, accessibility, low noise, a discreet aesthetic impact or stringent requirements in terms of safety and fire-resistance. Then there might be more complex units in which a cooling circuit is combined with the aeraulic system to offer compact and efficient solutions for specific application areas in which it is not possible to operate with standard solutions.

Quality

# Quality and performance, certified

Our goal is total customer satisfaction, which is why we have always rigorously applied a meticulous and constant method to improve our products and processes, in terms of performance, a highly focused research and development phase backed up by advanced tools for testing and verification and, finally, reliable control of the entire company process certified according to ISO 9001.

The numerous certifications we have obtained – among which the latest with the most stringent health and hygiene requirements in the innovative product series – comply with the criteria of VDI 6022.

This is a testimony of priority attention and constant commitment to various issues, such as innovation, quality, efficiency and the unmitigated reliability of the solutions and product ranges we offer to the market.

Design, production and assistance of air conditioning and refrigeration equipment: fan coil units, ventilated convectors, ductable units, heat recovery units, liquid chillers, heat pumps, roof top units and condensing units.

**CE marking**

The products comply with the requirements of the European Union directives.

# Wellbeing

# Adequate filtration, the first source of well-being

Defense against the polluting agents that we breathe for most of the day inside various environments is of significant interest in today's world and subject to increasingly stringent regulations.

Humanity is every more aware of how our psychophysical conditions can be put at risk by the onset of disease, allergies and infections of the respiratory system due to increasing levels of airborne microbiological pollutants, such as viruses, bacteria and mold, invisible to the human eye but significantly harmful to the body when inhaled.

**Eden** products can be configured with a wide range of filters in many different efficiency classes, various constructional and dimensional characteristics, and a high capacity for meeting the most diverse application specificities to ensure health in our environments and in the air we breathe.

## Clean Life system

With the ultimate goal of offering increasingly innovative and high-performing filtration systems while also meeting the more stringent requirements of energy-saving and efficiency, **Eden** has developed an innovative electronic filter called *Clean Life System*. It is the fruit of intensive research born with the aim of guaranteeing remarkable air treatment in terms of absolute purity, and clearly improving environmental hygiene qualities, in direct benefit to the occupants' cognitive conditions and performance levels.

The *Clean Life System*, applicable to different product series, ensures:

- High filtration efficiency, comparable to a HEPA filter
- Greater energy efficiency thanks to infrequent drops in pressure
- Durability of the components
- Easy maintenance
- A major reduction in environmental impact
- A major reduction in disposal costs

Noiselessness

# Noiselessness, psychophysical wellbeing

Excellent psychophysical well-being can only be achieved if climate comfort and adequate filtration are guaranteed by solutions that operate with minimal noise emissions.

Today, **Eden** is recognized on the market as a reference player in providing solutions that comply with this important and sensitive aspect that significantly affects the quality of the environment where the occupant resides.

Full confirmation of our know-how and capabilities is primarily reflected by the countless highly prestigious orders we have received for luxury hotels, museums, executive offices, resorts, theaters and public places in general in which **Eden** is chosen as the ideal partner to provide demanding customers with the best conditions of comfort, while also minimizing noise emissions.

High-performance products that are efficient and quiet could only be supplied by a long and complex process of research and development, aimed at minimizing drops in pressure and turbulence generated by the air flow. This involved a high-precision study of geometries and a meticulous selection of innovative components to be validated by painstaking work in the laboratory. All of this was essential to finding the best solution for each specific application requirement.

Today, **Eden** is on the market with a range of cutting-edge products with low noise emissions, a feature that strongly distinguishes the **ELIOS** fan coil series and the **SOFT** cassette fan coil, high-end products also thanks to their superlative combination of high performance and maximum operating silence.

Health

# Skills and know-how, to protect health

Today it is vital for companies to guarantee an ideal healthy climate within various environments, ensuring both comfort and safety, favoring the psychophysical wellbeing of individuals, while improving their health, performance and concentration.

Appropriate air management, not only in terms of the temperature but also the purity of the air, in the environments where we live, represents a vital aspect for the well-being of the occupants as it superbly maintains their health conditions.

**Hygiene compliance test

• VDI 6022, Part 1 (01/2018)  
• SWKI VA104-01 (04/2006)  
SOFT-Hy cassette

**Eden** set out to give a concrete answer to the primary aspect of user protection by designing, developing and certifying a dedicated range of units that guarantee a high standard of hygiene, with a broad range of fields of application. These applications include the most common areas such as offices, schools, gyms, spas and shared spaces in general where a healthier and safer environment is created. Then we provide even more sensitive applications for places such as hospitals, clinics, the food and pharmaceutical industries in which absolute levels of hygiene must be guaranteed.

The introduction of innovative technical construction solutions, the use of stainless materials and cutting-edge polymers tested according to **DIN EN ISO 846** and capable of inhibiting bacterial proliferation, have led to the creation of two series of products conforming to the parameters imposed by the **VDI 6022** guidelines.

These are ever more widely recognized at the European level as a reference for the state-of-the-art design of public spaces where excellent hygiene and comfort can be ensured to the total benefit of the public well-being.

Safety

# Comfort and well-being, in total safety

The protection of the health and safety of the occupants are essential elements for us. For this reason, we give unequivocal and indispensable priority in bringing to the market products that, in addition to providing the required comfort, also aim to protect people, especially in crowded places such as public schools, cinemas, clubs or even more sensitive places such as hospitals, military environments and logistics facilities where it is imperative to ensure full operational continuity.

It is with this objective that we work constantly, not only with a view to comply with current regulations, whether European or pertaining to a specific target market, but also in order to foresee market needs (wherever possible) and promptly introduce innovative construction techniques, the use of hi-tech, durable materials combined with advanced components to guarantee the best performance not only in terms of comfort but also in terms of safety.

Tangible application examples are the multiple types of products specifically designed for applications in public spaces, where the units have been equipped with intrinsically non-combustible insulating materials and the use of LSZH halogen-free cables, which minimize the production of opaque fumes and toxic gases. Another example are the units suitable for explosive atmospheres, distinguished by ATEX certified components.

Some implementations have required redundant components to ensure full operation even in the event of technical failures; the creation of special or armored roofing to lend a pleasant aesthetic appeal, greater resistance, the capacity to prevent tampering, maintain the dignity of the public space and the safety of the people present.

Efficiency

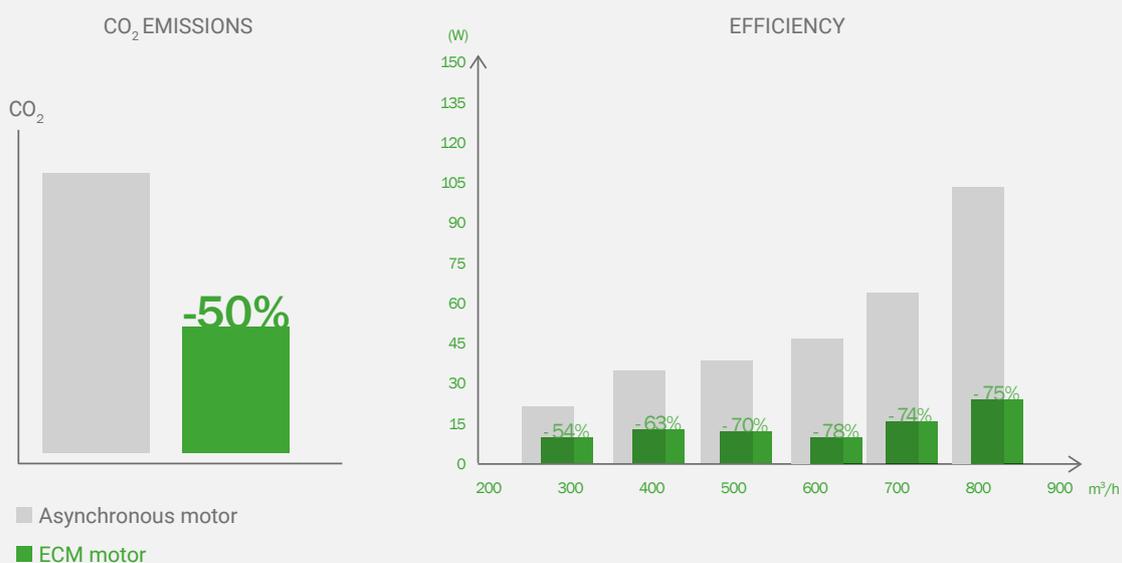

# High efficiency... significant savings and respect for the environment

For us, efficiency means guaranteeing ideal comfort while curbing energy consumption to reduce operating costs and protect the environment by reducing CO<sub>2</sub> emissions.

To achieve this goal we rely on innovation, which we apply rigorously and consistently in our products, as we have been doing for years with the **ECM** product series.

These products are equipped with brushless motors controlled by dedicated inverters which make it possible to modulate the air flow with high precision because they supply only the amount of energy needed for the actual workload, preventing unnecessary waste.

In addition to minimizing energy consumption by more than 75% compared to traditional asynchronous motors, the units with **ECM** motors significantly improve environmental comfort through a constant variation of the air flow. The benefit is the immediate achievement of the desired thermal load and maintenance of it throughout the day, while also ensuring a quieter operation.

*The above data are purely indicative and refer to the SOFT-ECM 600x600 cassette series.  
Data may vary based on multiple variables such as working conditions, accessories and field of application.*

Support

# Quality and skills, at your service

Every day we do our best to make our brand a synonym and guarantee of reliability, quality and maximum durability. This is why we work constantly to also offer a complete and professional after-sales service. Our team of specialized technicians and a network of international partners support our customers with qualified consultancies aimed at providing technical assistance and ongoing training.

Our professional after-sales service responds in a timely manner to every need, from the formulation of estimates for spare parts to the planning of technical interventions on site; technical consultancies dedicated to the creation of customized solutions, while minimizing inconvenience to the customer and guaranteeing full operation of the environments in which our products are installed.

# ELIOS

## ELIOS-ECM

Centrifugal fan coil unit

A GROUP S.p.A (Trademark EDEN)  
participates in the ECP programme for FCU.  
Check ongoing validity of certificate:  
[www.eurovent-certification.com](http://www.eurovent-certification.com)

# Design and performance, with maximum silence

 0.5 ÷ 9.0 kW  
cooling

 0.5 ÷ 9.8 kW  
heating

 50%  
energy saving up to 50%

 61 - 1670 m<sup>3</sup>/h  
air flow

**Sophisticated design and maximum level of silence:**

the series represents the perfect combination of innovation and design, where the technological choices adopted allow to achieved maximum comfort with maximum level of silence. Furthermore, the particular research on design guarantees refined and minimal forms, which ensure a discrete integration in any application context, be it modern or traditional.

**Bearing structure:**

structure in Z200 hot-dip galvanized steel sheet 0.8mm thick, insulated with 5mm-thick closed cell polyolefin-based insulation. Condensate drain basin in the shape of an "L" in Z140 hot galvanized sheet pre-painted 0.8 mm thick and insulated with 3mm-thick closed cell polyolefin-based insulation, complete with connection for condensate drain external Ø 20 mm.

**Cover cabinet:**

Cabinet in hot-dip galvanized steel sheet and pre-coated with a polyvinyl chloride film to guarantee high resistance to corrosion, pure white RAL 9010. The sides, the air diffusion grilles and the flaps are instead made of injection-molded reinforced ABS and opaque white color. Other colors and special finishes available on request.

**Filter:**

of standard supplied regenerable filter with galvanized steel frame and polypropylene filter fabric with efficiency class G1 \* / EU1 \*\*. Alternatively, a wide range of filters with greater efficiencies are available, including G2 \* / EU2 \*\* and G3 \* / EU3 \*\* or the innovative electronic filter that allows a complete purification of the air and at the same time ensures high efficiencies thanks to minimum load losses. (\* according to EN779 / \*\* according to Eurovent)

**Fan section:**

consisting of double intake centrifugal fans, with impellers in aluminum, or ABS statically and dynamically balanced, directly fitted onto the motor shaft. Single-phase asynchronous electric motor with overload protection, 6 rotation speeds (3 of which are connected). The motor is directly coupled to the fans, and cushioned with elastic supports for the benefit of low noise. The ECM series is instead equipped with innovative Brushless ECM motors, high head motors or motors with fail contact.

**Coils:**

Copper tube coil with aluminum fins with continuous pack blocked on the tubes by mechanical expansion. Brass manifolds equipped with Ø 1/2 " ~ 3/4" female gas connections and easily accessible air vent valves. Hydraulic connections positioned on the left (front view) on request supplied on the right. The coils are reversible, so the connection side can also be reversed on site. The heat exchange coil is not suitable for use in corrosive atmospheres.

**Cables LSZH Halogen Free (optional):**

the series, on request and where possible, can also be supplied with halogen-free LSZH electric cables, therefore with low emission of fumes and toxic gases, for particular types of installation where it is necessary to guarantee maximum user safety.

**Customization:**

our engineering is able to satisfy any customization requirement, ranging from simple aesthetic finishes to the satisfaction of specific dimensional, performance or application constraints.

# Details make the difference

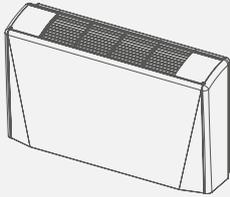

Compact fan coil with low thickness, which is characterized by the perfect combination of design, efficiency, performance and the lowest sound emissions of all time, which allow this series to be placed at the top of the range.

Available in 10 sizes and 4 versions (M/MF/I/IF) with 3 or 4 row heat exchange coils for 2-pipe systems, 1 or 2 rows for 4-pipe systems. The wide range of optional motors also makes it possible to reach ducted installations with load losses up to 60 Pa.

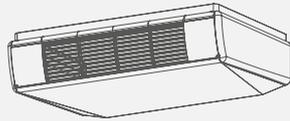

A wide range of controls and accessories allows us to provide solutions for any installation requirement.

- **Unità standard a bocca libera:** pressione statica esterna = 0 Pa / Il test per la rilevazione del livello di potenza sonora è stato eseguito in accordo con la **normativa EN 16583:2015 / Livello di pressione sonora:** considerata 8,6 dB(A) inferiore rispetto alla potenza sonora in una stanza di 90 m³ con un tempo di riverbero di 0,5 sec. / **Valori tensione ammissibile:** ~230V / 1ph / 50-60Hz  
 - **Standard unit with free outlet:** external static pressure = 0 Pa / The sound power level test has been performed according to **EN 16583:2015 standard / Sound pressure level:** 8,6 dB(A) lower than the sound power level for a room of 90 m³ with a reverberation time of 0,5 sec. / **Supported power supply:** ~230V / 1ph / 50-60Hz  
 - **Unité standard avec sortie libre:** pression statique externe = 0 Pa / Le test de détection du niveau de puissance acoustique a été réalisé conformément à la norme EN 16583: 2015 / **Niveau de pression sonore:** considéré de 8,6 dB(A) plus faible que le niveau de puissance acoustique d'une pièce de 90 m³, avec un temps de réverbération de 0,5 sec. /  **Valeurs de tension admissibles:** ~230V / 1ph / 50-60Hz  
 - **Standard Einheit mit offenem Auslass:** externer statischer Druck = 0 Pa / Der Test zur Erfassung des Schalleistungspegels wurde gemäß der Norm EN 16583: 2015 durchgeführt / **Schall-Druckpegel:** Schall-Druckpegel: 8,6 dB (A) unter dem Schalldruck in einem Raum von 90 m³ mit einer Nachhallzeit von 0,5 s. / **Unterstützte Stromversorgung:** ~230V / 1ph / 50-60Hz  
 - **Unidad estándar con salida libre:** presión estática externa = 0 Pa / La prueba de nivel acústico se realizó de acuerdo con la **norma EN 16583:2015 / Nivel de presión sonora:** se considera 8,6 dB (A) inferior a la potencia acústica en una sala de 90 m³ con un tiempo de reverberación de 0,5 seg. / **Valores de voltaje admisibles:** ~230V / 1ph / 50-60Hz

\* The technical space is only available for the ELIOS-IF version

The series lends itself to be easily installed also in the built-in version through the special niche and its front panel specially designed and developed in multiple configurations and variants in order to satisfy any application need.

This installation method, in addition to ensuring perfect integration of the unit within the environment, allows at the same time to recover more living space, offering the possibility of confining the unit and any accessories supplied inside the niche, specially sized to ensure total accessibility during the installation and maintenance phases.

#### Concealed panel versions

##### MNFP-E

Panel for vertical and horizontal units, of limited thickness (7 mm only), made of hot-dip galvanized steel powder coated in white RAL 9003 color with directional air delivery flap.

The whole can be painted on site with the same color as the wall.

##### MFP-E

Panel for vertical and horizontal units, of limited thickness (3mm only), made of hot-galvanized sheet metal and pre-coated with a polyvinyl chloride film to guarantee high corrosion resistance, in matt white RAL 9010 color.

The grilles are instead made of ABS , in matt white RAL 9010 color.

The panel is also available in the galvanized version that can be painted on site.

##### WFP-E

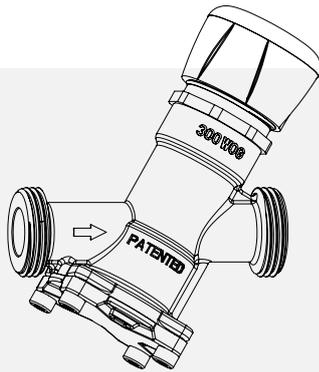

Panel for vertical units only made of wood (MDF) lacquered matt white RAL 9010 with ABS grills in matt white RAL 9010 color.

Also available in the paintable version on site.

All the panels listed above can be supplied, on request, also in other colors or with special finishes.

## Independent balancing valve

This type of valve combines two functions in a single valve, keeps the flow rate constant as the system pressure changes and at the same time regulates the flow according to the temperature, allowing perfect balancing of the hydraulic system, ensuring for each fan coil unit the desired water flow even under partial loads.

The adjustment can be performed automatically through the installation of a linear ON / OFF or modulating actuator.

### Main advantages:

- Simplified selection
- Easy installation
- High valve authority which remains constant
- Constant flow rate as the differential pressure changes
- Optimized installation by measuring the set pressure
- Energy efficiency thanks to the low differential pressure required
- Maintenance of the set water flow even at partial loads
- Optimization of pump speed using pressure taps (optional)
- Preset locked by hooking

## Valve performance technical data

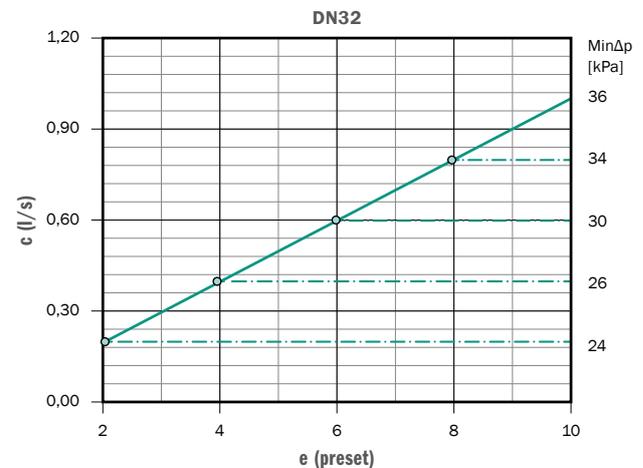

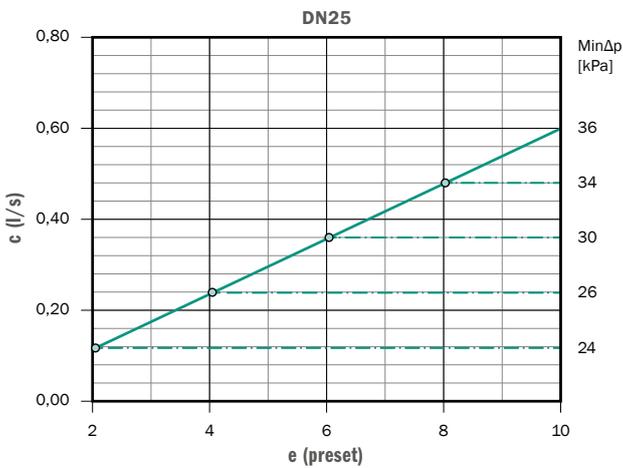

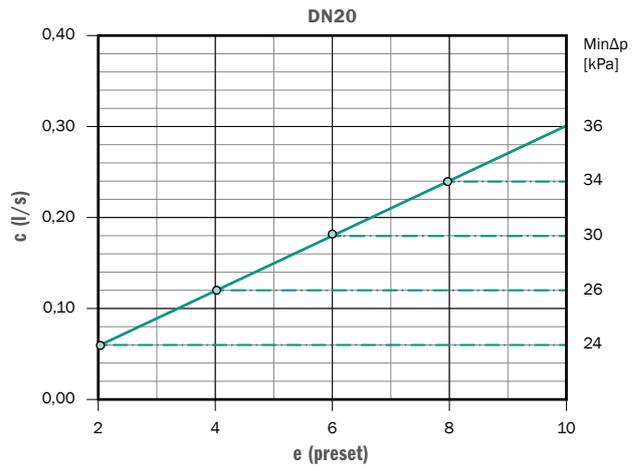

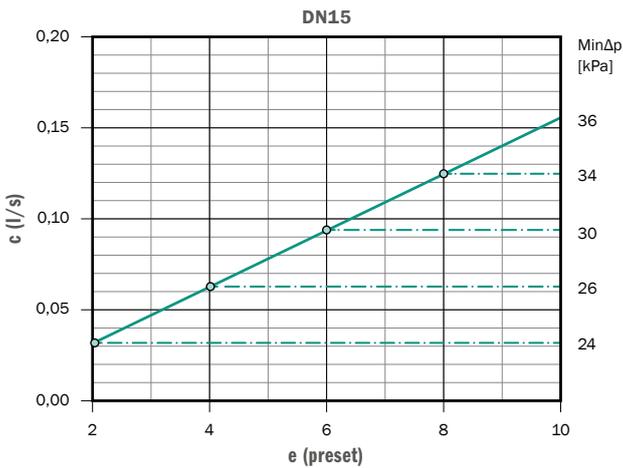

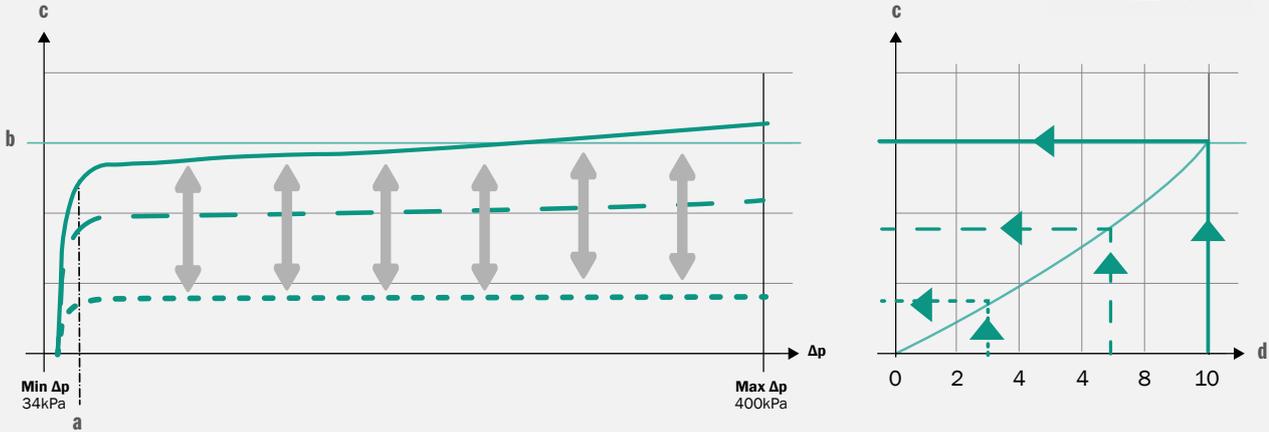

**Attention:** this type of valve is available only for units in the built-in version.  
For any combinations on units with a cover cabinet, please contact our sales department.

# Presetting and nomograms

In accordance with the principles of dynamic balancing, presetting allows you to set the maximum flow rate of the valve, i.e. the flow rate which will be kept constant within the differential pressure range of use, with the valve fully open. The presetting affects the minimum differential pressure of use of the valve.

# The new generation filtration system

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

**Clean Life System - ELIOS**

Available for all 9 models  
and for M - I versions only.

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

## A healthy choice, responsible and aware

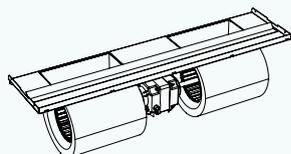

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

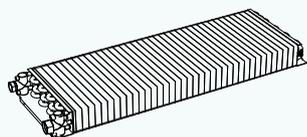

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

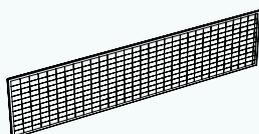

### Fan section:

In addition to the asynchronous motor and the Brushless ECM motor, the series can also be supplied with high head motors or motors equipped with thermal protection (fail contact). On request also motors with special requirements.

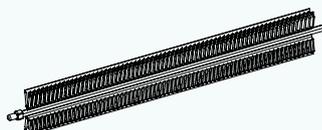

### Coils:

4-row coils for 2-pipe systems, 1 or 2 rows for 4-pipe systems, R410A DX coil. On request also special coils made with special materials or treatments for corrosive atmospheres or with technical precautions to be able to operate at special pressures.

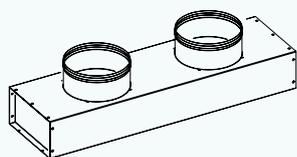

### Filters:

wide range of filters with G2 \* / EU2 \*\* or G3 \* / EU3 \*\* efficiencies (MF version excluded). Also available, where provided, the innovative electronic filter that allows complete air purification and at the same time higher efficiency thanks to low pressure drops. (\* according to EN779 / \*\* according to Eurovent)

### Electric heaters:

electric heater kit from 600W to 3000W, equipped with safety thermostat, 230Vac / 1Ph / 50-60Hz.

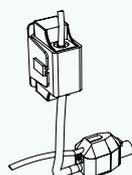

### Plenum:

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.

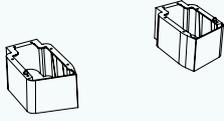

Fully customized plenums can also be made on request.

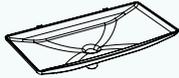

### UV lamps

### Auxiliary condensate drain pump

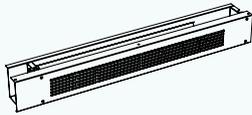

**Recessed feet and floor fixing brackets**

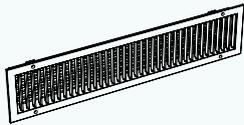

**Auxiliary condensate drain pan:**

for horizontal or vertical units

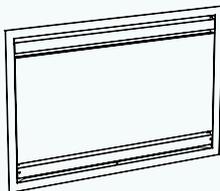

**Air intake damper kit:**

for horizontal or vertical units (primary air, max 8%), can also be equipped with servomotor for motorized opening.

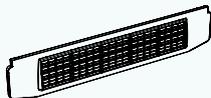

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter. The grills can also be painted on request with the RAL color of your choice.

**Panels and technical spaces**

wide range of front cover panels in multiple configurations, finishes and thicknesses, with relative recessed technical spaces. Also available the rear cover panel for installation on glass.

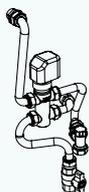

**Bottom closure:**

in pre-painted sheet metal also available with return grid and integrated air filter.

**Control:**

wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

**Valves:**

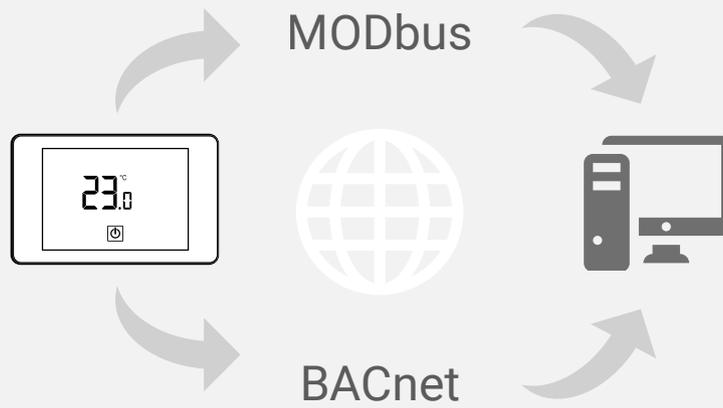

wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

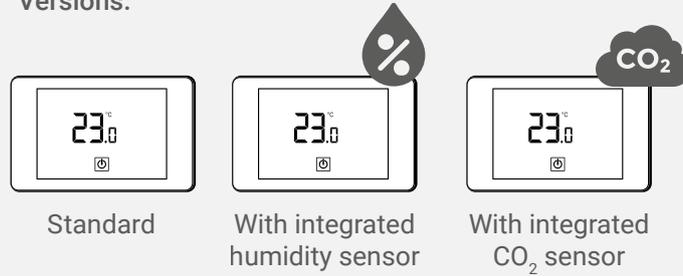

### I-70 TOUCH SCREEN THERMOSTAT

Touch screen wall thermostat, programmable and with MODbus and BACnet supervision, also available with air quality sensor or relative humidity sensor directly integrated within the control.

Integrated connection:

Versions:

### I-COM

Easy and versatile, I-Com is the base version of new control panel, without temperature control.

### I-BASIC 1

It allows also the precise room temperature control thanks to analogic electronic thermostat integrated in the control panel.

### I-BASIC 2

It allows also the precise room temperature control thanks to microprocessor electronic thermostat integrated in the control panel and allows to manage an electric heater.

### I-BASIC 3

it has a range of programmable functions and allows to manage manually or automatically the operation speed.

### I-DIGIT

Fully digital control panel that integrates a large and comfortable display, perfect for all the installations that require high automation of functions and an high level of comfort like hotel, offices and public places.

# Compatibility of controls

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

### Constructive and innovative solutions:

the introduction of innovative solutions has also involved the use of stainless materials and cutting-edge polymers tested according to DIN EN ISO 846 and capable of inhibiting bacterial proliferation. Insulators and polymeric components directly in contact with the air flow have been specifically tested in certified laboratories in order to guarantee the maximum resistance to the action of fungi, bacteria and microorganisms that could represent a risk for the health and well-being of the user.

### Reinforced structure:

Result of a careful design, in order to guarantee maximum durability even in installations with a high flow of users and usually subject to heavy wear. The structure is made with reinforced ABS sides and an extruded anodised aluminum profile grille that allows excellent resistance to breakage.

Accessibility to users has also been prohibited, in order to avoid tampering or forcing the product. These precautions guarantee high durability and long-term maintenance of the aesthetic and functional qualities of the environments.

### Frontal casing:

The unit is equipped as standard with a galvanized steel casing, powder coated RAL 9010 (or RAL on request).

Optional it is also available with a brushed or satin-finished stainless steel casing to guarantee an excellent appearance and offer even greater resistance, hygiene and ease of cleaning.

### Easy installation and maintenance:

high attention has been paid to the issue of accessibility in order to be able to guarantee a simplification of installation and maintenance activities, to the benefit of a net reduction in operating costs and greater efficiency and safety during cleaning and sanitation processes.

### Condensate drain pan:

specially designed in order to be easily removed and sanitized, thanks to only metric screws and dedicated rails.

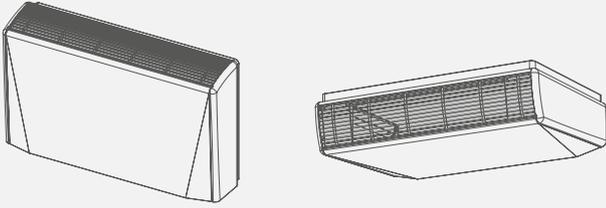

Entirely made of stainless steel in order to inhibit bacterial proliferation and prevent corrosion, it also guarantees high flexibility and installation versatility thanks to the "L" shape, suitable for both horizontal and vertical installation.

### Comfort with maximum level of silence

the series represents the perfect combination of technology, safety and design, where the technological choices adopted allow maximum comfort and maximum safety of the environments, with the minimum operating noise.

hygiene – conformity check to the design requirements  
of VDI 6022, part 1 (01/2018)

Test institute: Hygiene Institut des Ruhrgebiets  
Institut für Umwelthygiene und Toxikologie  
Rotthäuser Straße 21  
49879 Gelsenkirchen

Test object: Fan coil units "ELIOS"

Manufacturer: Eden  
Via Montegrappa, 67  
31020 San Zenone degli Ezzelini (Tv)  
Italy

Basis of the examination:  VDI 6022, part 1 (01/2018)  
 SWKI VA104-01 (04/2006)

Validity period: 5 years 02/2018 – 02/2023

Test report: W-294689-18-WD

In conclusion it can be stated that the examined fan coil unit „ELIOS“, as specified in the test report W-294689-18-WD, is in compliance with the design requirements of the above mentioned regulations.

(Priv.-Doz. Dr. G.-J. Tuschewitzki)  
Head of the Department of Water  
Hygiene and Environmental  
Microbiology

(F. Wedke B. Eng.)  
Administrator of Air Conditioning technology

Hygiene and Environmental Microbiology

issued 09.02.2018, Gelsenkirchen

Within the framework of the conformity check the hygiene-relevant requirements of the above mentioned regulations was examined. Requirements of other regulations that refer to the above mentioned regulations were not part of the examination. Additionally, the conformity check does not include a toxicological or sensory testing of the introduced materials. This document is not part of a certification process.

3-11-2006 *Supplemento ordinario alla GAZZETTA UFFICIALE* Serie generale - n. 256

Il presente documento, esplicitamente previsto dall'Accordo Ministro della Salute Regioni e Province autonome del 27 settembre 2001, concernente "Linee Guida per la tutela e la promozione della salute negli ambienti confinati" (G.U. del 27 novembre 2001, n. 276, SO n. 252), è stato elaborato dalla commissione "indoor" del Ministero della salute e successivamente aggiornato e modificato da un apposito gruppo di lavoro interministeriale.

Le indicazioni tecniche di seguito riportate fanno riferimento alla norma tedesca VDI 6022 (Luglio 1998): *Hygienic standards for ventilation and Air-Conditioning Systems for Offices and assembly Rooms* ed alle principali norme riguardanti la progettazione, l'installazione e la manutenzione dei comparti e sistemi aeraulici, riportate in Appendice A, tratta dalle Linee Guida dell'AICARR.

## Main features

The introduction of innovative technical construction solutions and the use of stainless materials and cutting-edge polymers tested according to DIN EN ISO 846, capable of inhibiting bacterial proliferation, have allowed the realization of a series of fan coils conforming to the most stringent parameters imposed by the VDI 6022 guidelines, increasingly recognized at European level as a reference point for the design of innovative public places in which an excellent level of hygiene and comfort must be ensured for the total psychophysical well-being of the user.

ELIOS-Hy  
ELIOS-ECM-Hy

Version with front cabinet made in brushed stainless steel and sides in gray ABS (optional).

Standard version with front cabinet made in galvanized steel white RAL 9010 painted and sides in white (standard).

The ELIOS-Hy series consists of a wide and well-diversified range that includes solutions for the most varied installation requirements and consists of:

- › 10 sizes of capacities
- › 2 configurations of installation (Hy-M, Hy-I)
- › 2 pipes and 4 pipes system
- › With cabinet for vertical installation
- › With cabinet for horizontal installation
- › Vertical concealed type
- › Horizontal concealed type
- › ECM motor or asynchronous motor (optional)
- › Wide range of accessories and controls supplied
- › Front cabinet made in brushes stainless steel (optional)

# The new generation filtration system

ELIOS-Hy  
ELIOS-ECM-Hy

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

**Clean Life System - ELIOS-Hy**

Available for all 9 models,  
for both Hy-M and Hy-I versions.

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

## A healthy choice, responsible and aware

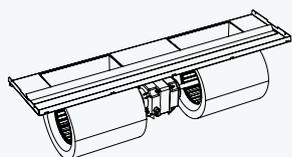

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

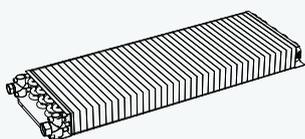

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

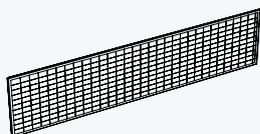

### Fan section:

In addition to the asynchronous motor and the Brushless ECM motor, the series can also be supplied with high head motors or motors equipped with thermal protection (fail contact). On request also motors with special requirements.

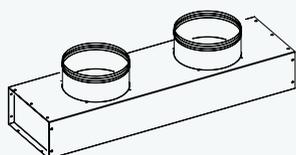

### Coils:

4-row coils for 2-pipe systems, 1 or 2 rows for 4-pipe systems, R410A DX coil. On request also special coils made with special materials or treatments for corrosive atmospheres or with technical precautions to be able to operate at special pressures.

### Filters:

wide range of filters with G2 \* / EU2 \*\* or G3 \* / EU3 \*\* efficiencies. Also available, where provided, the innovative electronic filter that allows complete air purification and at the same time higher efficiency thanks to low pressure drops. (\* according to EN779 / \*\* according to Eurovent)

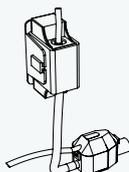

### Plenum:

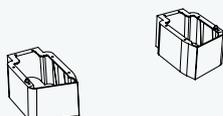

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement. Fully customized plenums can also be made on request.

### UV lamps

### Auxiliary condensate drain pump

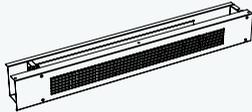

### Recessed feet and floor fixing brackets

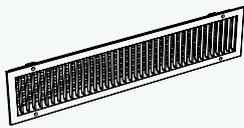

**Auxiliary condensate drain pan:**

for horizontal unit made of AISI304 steel with insulation tested according to DIN EN ISO 846, for vertical unit made of ABS or AISI304 steel with insulation tested according to DIN EN ISO 846.

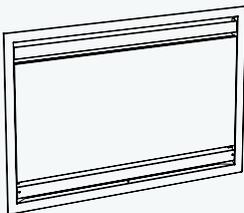

**Air intake damper kit:**

for horizontal or vertical units (primary air, max 8%), can also be equipped with servomotor for motorized opening.

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.  
The grills can also be painted on request with the RAL color of your choice.

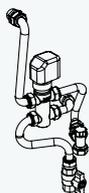

**Panels and technical spaces**

wide range of front cover panels in multiple configurations, finishes and thicknesses, with relative recessed technical spaces.  
Also available the rear cover panel for installation on glass.

**Control:**

wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

**Valves:**

wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

# Compatibility of controls

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

with ultimate style, elegance  
and maximum functionality.

## Construction features

### Structure:

in Z200 hot-dip galvanized steel sheet with a thickness of 0.8 mm and 1 mm (sizes 100 ÷ 120) insulated with closed cell polyolefin-based insulation. Condensate drain pan in hot-dip galvanized Z140 pre-painted 0.8 mm thick with closed cell polyolefin-based insulation 3 mm thick complete with connection for condensate drain external Ø 20 mm

### Decorative cabinet:

in hot-dip galvanized steel sheet and pre-coated with a polyvinyl chloride film to guarantee high resistance to corrosion, pure white RAL 9010. The grilles for air diffusion and the flaps are instead made of injection-molded ABS, light gray RAL 7035 color. Other colors or special finishes available on request.

### Filter:

of standard supplied regenerable filter with galvanized steel frame and polypropylene filter fabric with efficiency class G1 \* / EU1 \*\*.

Alternatively, a wide range of filters with greater efficiencies are available, including G2 \* / EU2 \*\* and G3 \* / EU3 \*\*. (\* according to EN779 / \*\* according to Eurovent)

### Fan section:

consisting of double intake centrifugal fans, with impellers in aluminum, or ABS statically and dynamically balanced, directly fitted onto the motor shaft. Single-phase asynchronous electric motor with overload protection, 6 rotation speeds (3 of which are connected).

The motor is directly coupled to the fans, and cushioned with elastic supports for the benefit of low noise. The series can also be equipped with innovative Brushless ECM motors, high head motors or motors with fail contact.

### Coils:

in copper tube with aluminum fins with continuous pack blocked on the tubes by mechanical expansion. Brass manifolds equipped with Ø 1/2 "and 3/4" female gas connections and easily accessible air vent valves. Hydraulic connections positioned on the left (front view), on request supplied on the right. The coils are reversible, so the connection side can also be reversed on site. The heat exchange coil is not suitable for use in corrosive atmospheres.

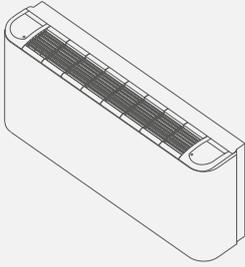

### Customization:

our engineering is able to satisfy any customization requirement, ranging from simple aesthetic finishes to the satisfaction of specific dimensional, performance or application constraints.

- **Unità standard a bocca libera:** pressione statica esterna = 0 Pa / Il test per la rilevazione del livello di potenza sonora è stato eseguito in accordo con la **normativa EN 16583:2015 / Livello di pressione sonora:** considerata 8,6 dB(A) inferiore rispetto alla potenza sonora in una stanza di 90 m³ con un tempo di riverbero di 0,5 sec. / **Valori tensione ammissibile:** ~230V / 1ph / 50-60Hz  
 - **Standard unit with free outlet:** external static pressure = 0 Pa / The sound power level test has been performed according to **EN 16583:2015 standard / Sound pressure level:** 8,6 dB(A) lower that the sound power level for a room of 90 m³ with a reverberation time of 0,5 sec. / **Supported power supply:** ~230V / 1ph / 50-60Hz  
 - **Unité standard avec sortie libre:** pression statique externe = 0 Pa / Le test de détection du niveau de puissance acoustique a été réalisé conformément à la norme **EN 16583: 2015 / Niveau de pression sonore:** considéré de 8,6 dB(A) plus faible que le niveau de puissance acoustique d'une pièce de 90 m³, avec un temps de réverbération de 0,5 sec. /  **Valeurs de tension admissibles:** ~230V / 1ph / 50-60Hz  
 - **Standard Einheit mit offenem Auslass:** externer statischer Druck = 0 Pa / Der Test zur Erfassung des Schalleistungspegels wurde gemäß der Norm **EN 16583: 2015** durchgeführt / **Schall-Druckpegel:** Schall-Druckpegel: 8,6 dB (A) unter dem Schalldruck in einem Raum von 90 m³ mit einer Nachhallzeit von 0,5 s. / **Unterstützte Stromversorgungen:** ~230V / 1ph / 50-60Hz  
 - **Unidad estándar con salida libre:** presión estática externa = 0 Pa / La prueba de nivel acústico se realizó de acuerdo con la **norma EN 16583:2015 / Nivel de presión sonora:** se considera 8,6 dB (A) inferior a la potencia acústica en una sala de 90 m³ con un tiempo de reverberación de 0,5 seg. / **Valores de voltaje admisibles:** ~230V / 1ph / 50-60Hz

- **Unità standard a bocca libera:** pressione statica esterna = 0 Pa / Il test per la rilevazione del livello di potenza sonora è stato eseguito in accordo con la **normativa EN 16583:2015 / Livello di pressione sonora:** considerata 8,6 dB(A) inferiore rispetto alla potenza sonora in una stanza di 90 m³ con un tempo di riverbero di 0,5 sec. / **Valori tensione ammissibile:** ~230V / 1ph / 50-60Hz  
 - **Standard unit with free outlet:** external static pressure = 0 Pa / The sound power level test has been performed according to **EN 16583:2015 standard / Sound pressure level:** 8,6 dB(A) lower than the sound power level for a room of 90 m³ with a reverberation time of 0,5 sec. / **Supported power supply:** ~230V / 1ph / 50-60Hz  
 - **Unité standard avec sortie libre:** pression statique externe = 0 Pa / Le test de détection du niveau de puissance acoustique a été réalisé conformément à la norme EN 16583: 2015 / **Niveau de pression sonore:** considéré de 8,6 dB(A) plus faible que le niveau de puissance acoustique d'une pièce de 90 m³, avec un temps de réverbération de 0,5 sec. /  **Valeurs de tension admissibles:** ~230V / 1ph / 50-60Hz  
 - **Standard Einheit mit offenem Auslass:** externer statischer Druck = 0 Pa / Der Test zur Erfassung des Schalleistungspegels wurde gemäß der Norm EN 16583: 2015 durchgeführt / **Schall-Druckpegel:** Schall-Druckpegel: 8,6 dB (A) unter dem Schalldruck in einem Raum von 90 m³ mit einer Nachhallzeit von 0,5 s. / **Unterstützte Stromversorgung:** ~230V / 1ph / 50-60Hz  
 - **Unidad estándar con salida libre:** presión estática externa = 0 Pa / La prueba de nivel acústico se realizó de acuerdo con la **norma EN 16583:2015 / Nivel de presión sonora:** se considera 8,6 dB (A) inferior a la potencia acústica en una sala de 90 m³ con un tiempo de reverberación de 0,5 seg. / **Valores de voltaje admisibles:** ~230V / 1ph / 50-60Hz

L x P x H (mm)

The series lends itself to be easily installed also in the built-in version through the special niche and its front panel specially designed and developed in multiple configurations and variants in order to satisfy any application need.

This installation method, in addition to ensuring perfect integration of the unit within the environment, allows at the same time to recover more living space, offering the possibility of confining the unit and any accessories supplied inside the niche, specially sized to ensure total accessibility during the installation and maintenance phases.

#### WIND Concealed panel versions

##### MNFP-W

Panel for vertical and horizontal units, of limited thickness (7 mm only), made of hot-dip galvanized steel powder coated in white RAL 9003 color with directional air delivery flap.

The whole can be painted on site with the same color as the wall.

##### MFP-W

Panel for vertical and horizontal units, of limited thickness (3mm only), made of hot-galvanized sheet metal and pre-coated with a polyvinyl chloride film to guarantee high corrosion resistance, in matt white RAL 9010 color.

The grilles are instead made of ABS, in matt white RAL 9010.

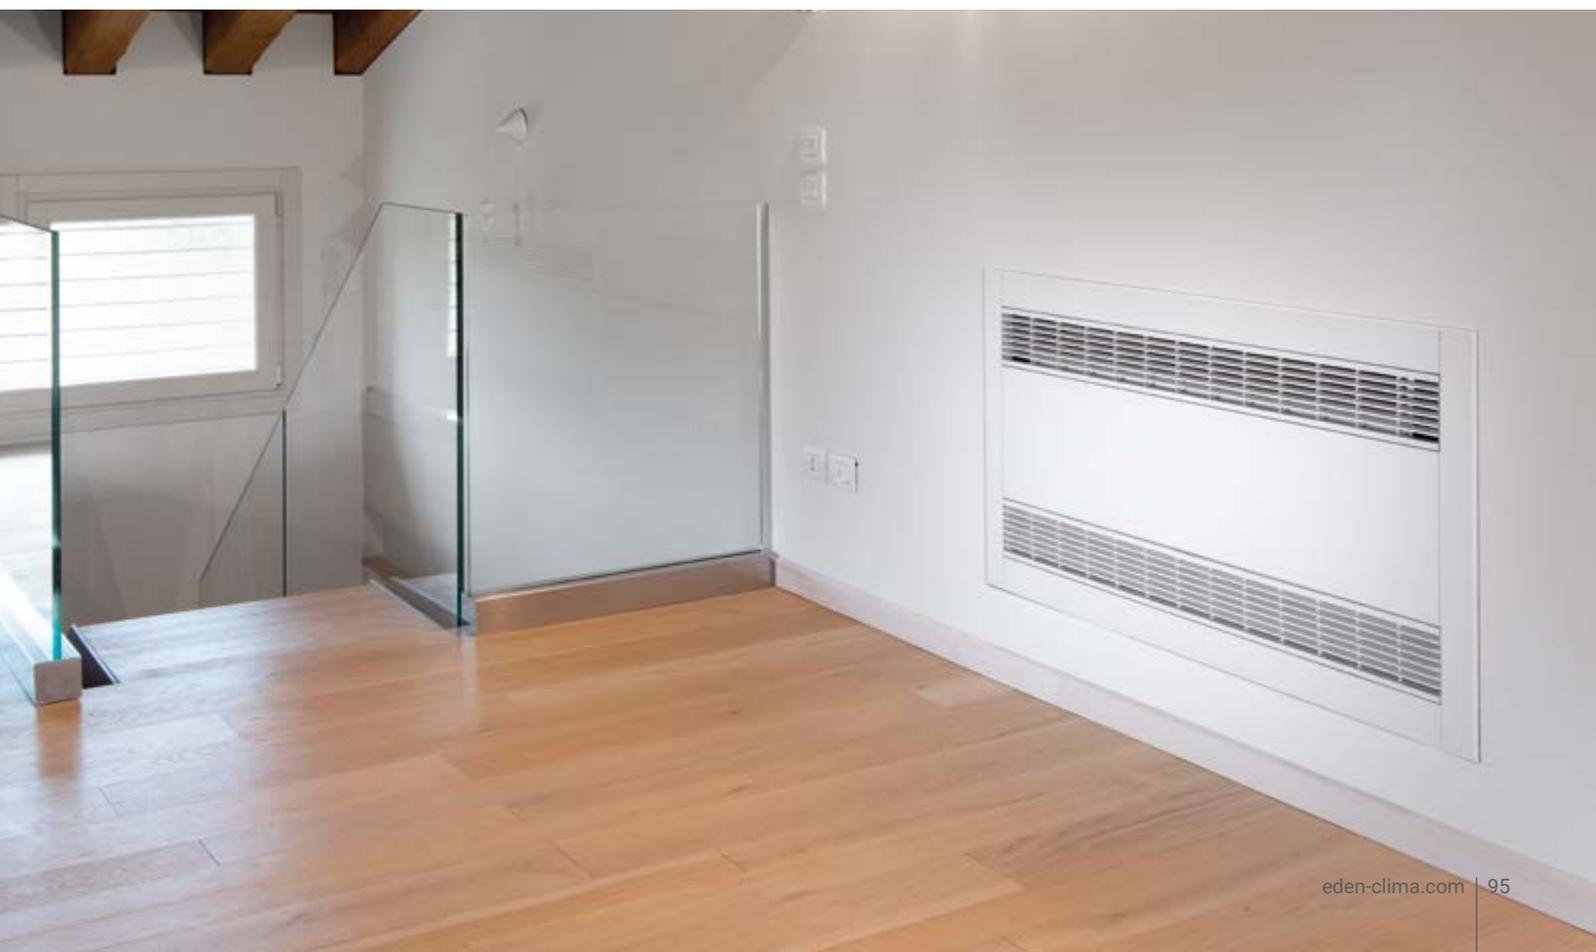

The panel is also available in the galvanized version that can be painted on site.

##### WFP-W

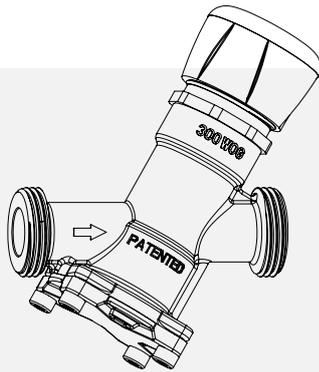

Panel for vertical units only made of wood (MDF) lacquered matt white RAL 9010 with ABS grills in matt white RAL 9010.

Also available in the paintable version on site.

All the panels listed above can be supplied, on request, also in other colors or with special finishes.

## Independent balancing valve

This type of valve combines two functions in a single valve, keeps the flow rate constant as the system pressure changes and at the same time regulates the flow according to the temperature, allowing perfect balancing of the hydraulic system, ensuring for each fan coil unit the desired water flow even under partial loads.

The adjustment can be performed automatically through the installation of a linear ON / OFF or modulating actuator.

### Main advantages:

- Simplified selection
- Easy installation
- High valve authority which remains constant
- Constant flow rate as the differential pressure changes
- Optimized installation by measuring the set pressure
- Energy efficiency thanks to the low differential pressure required
- Maintenance of the set water flow even at partial loads
- Optimization of pump speed using pressure taps (optional)
- Preset locked by hooking

## Valve performance technical data

**Attention:** this type of valve is available only for units in the built-in version.

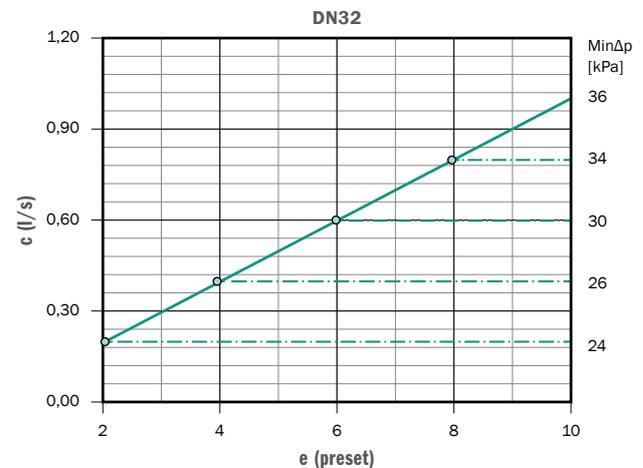

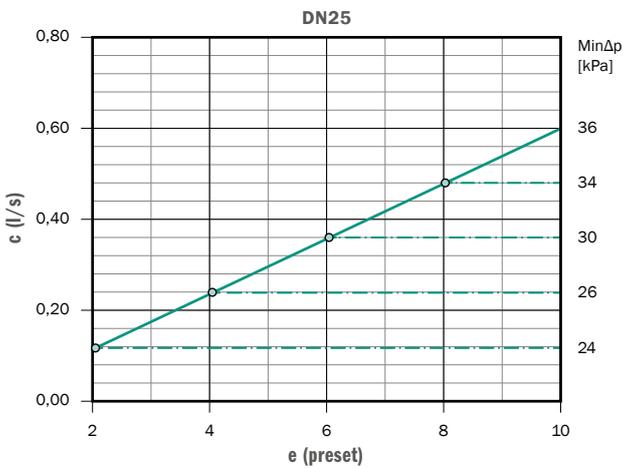

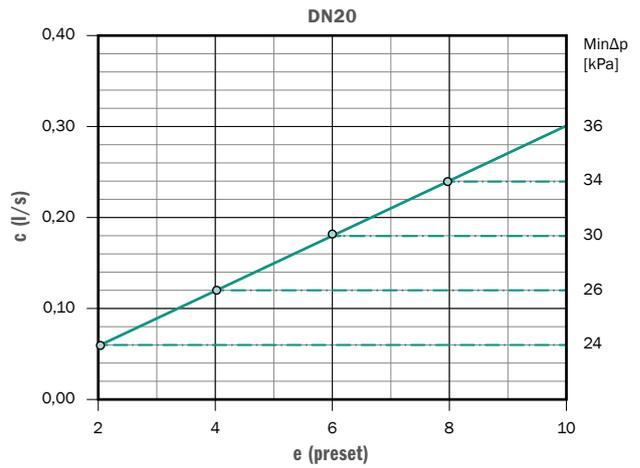

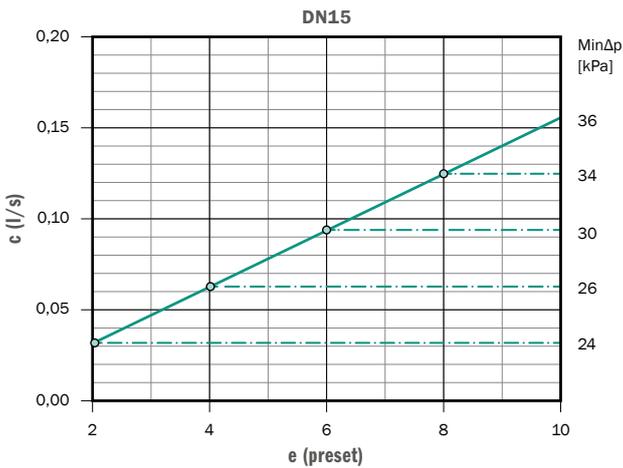

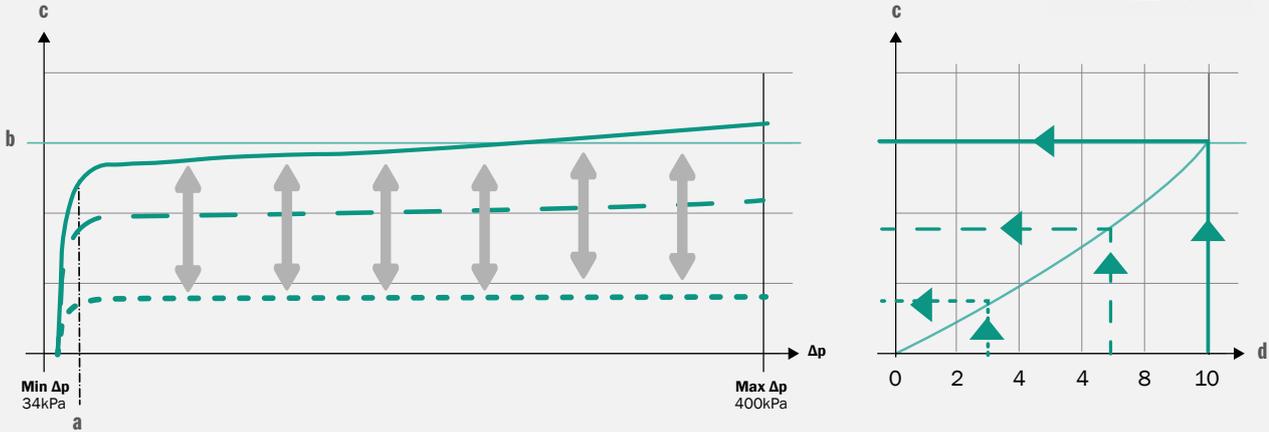

For any combinations on units with a cover cabinet, please contact our sales department.

# Presetting and nomograms

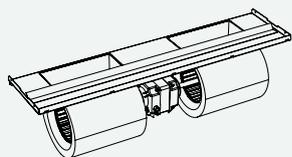

In accordance with the principles of dynamic balancing, presetting allows you to set the maximum flow rate of the valve, i.e. the flow rate which will be kept constant within the differential pressure range of use, with the valve fully open. The presetting affects the minimum differential pressure of use of the valve.

<b>a</b>	Funzione di prerogolazione / Preset function / Fonction de pré réglage / Voreingestellte Funktion / Función preestablecida

<b>e</b>	Prerogolazione / Preset / Pré réglage / Voreinstellung / Preajuste

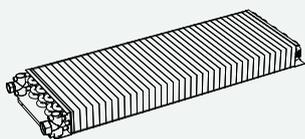

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

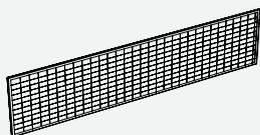

### Fan section:

In addition to the asynchronous motor and the Brushless ECM motor, the series can also be supplied with high head motors or motors equipped with thermal protection (fail contact). On request also motors with special requirements.

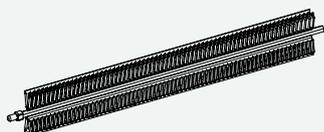

### Coils:

4-row coils for 2-pipe systems, 1 row for 4-pipe systems, R410A DX coil. On request also special coils made with special materials or treatments for corrosive atmospheres or with technical precautions to be able to operate at special pressures.

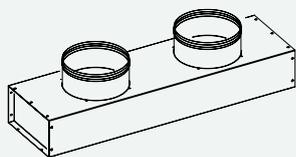

### Filters:

in addition to the basic filter supplied with G1 \* / EU1 \*\* efficiency standards, the series can also be equipped with G2 \* / EU2 \*\* or G3 \* / EU3 \*\* filters. (\* according to EN779 / \*\* according to Eurovent)

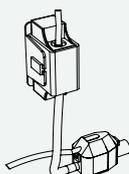

### Electric heaters:

electric heater kit from 600W to 3000W, equipped with safety thermostat, 230Vac / 1Ph / 50-60Hz.

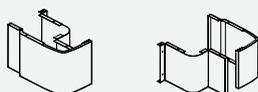

### Plenum:

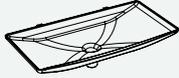

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement. Fully customized plenums can also be made on request.

### Auxiliary condensate drain pump

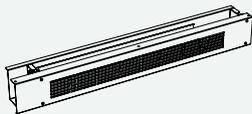

### Recessed feet and floor fixing brackets

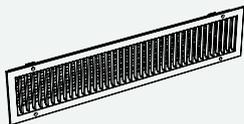

**Auxiliary condensate drain pan:**

for horizontal or vertical units

**Air intake damper kit:**

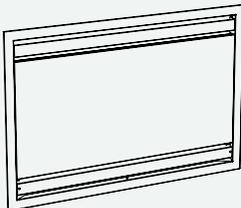

for horizontal or vertical units (primary air, max 8%), can also be equipped with servomotor for motorized opening.

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.

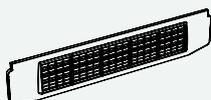

The grills can also be painted on request with the RAL color of your choice.

**Panels and technical spaces:**

wide range of front cover panels in multiple configurations, finishes and thicknesses, with relative recessed technical spaces.

Also available the rear cover panel for installation on glass.

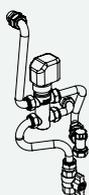

**Bottom closure:**

in pre-painted sheet metal also available with return grid and integrated air filter.

**Control:**

wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

**Valves:**

wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

# Compatibility of controls

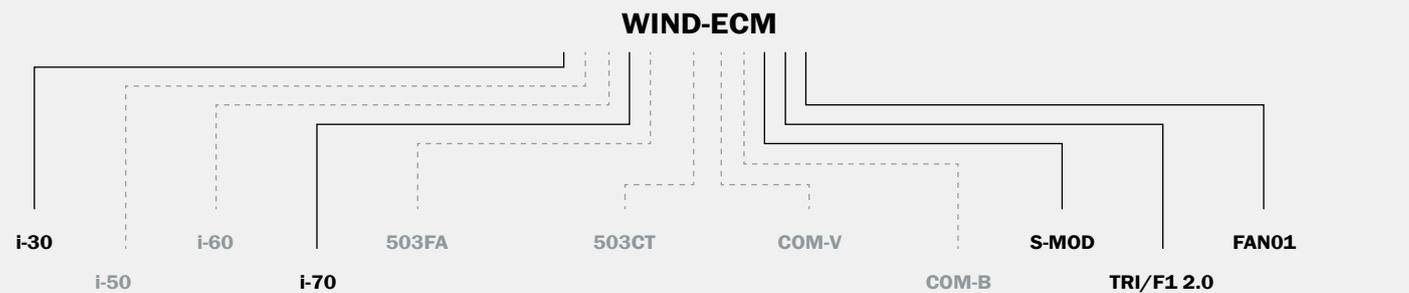

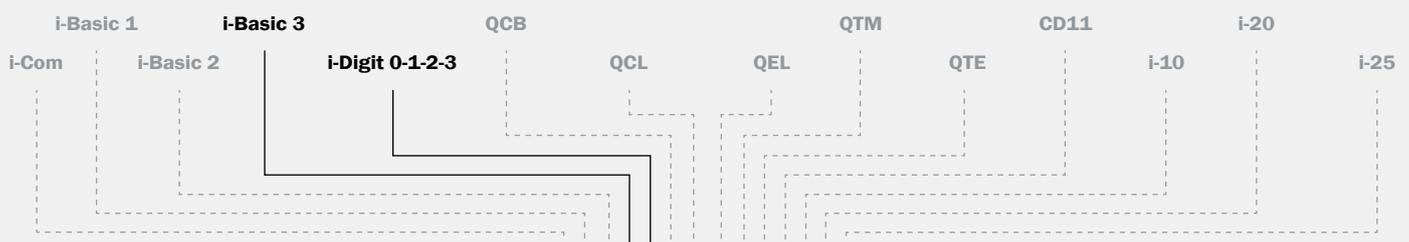

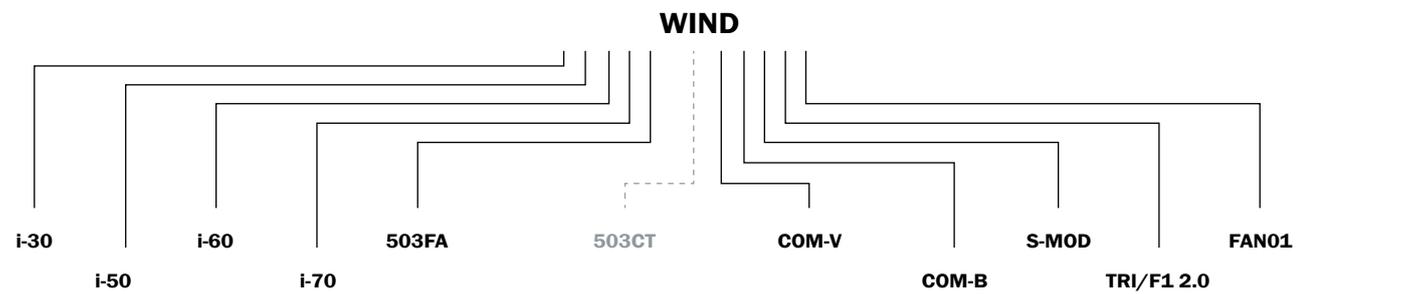

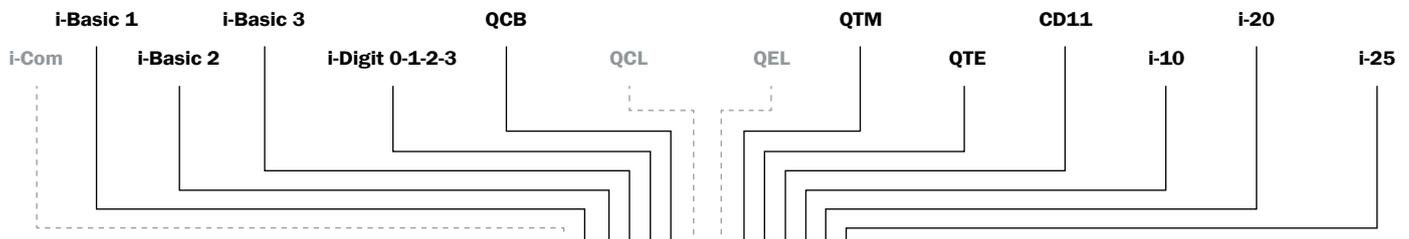

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

# Special units.

A concrete response, for every need.

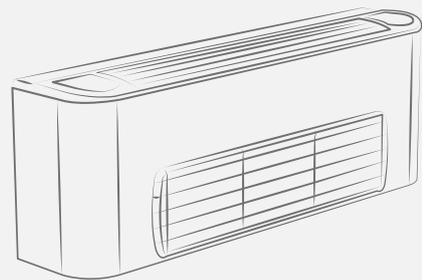

SPECIAL

## MINIFLAT-ECM

Thin profile tangential  
fan coil unit

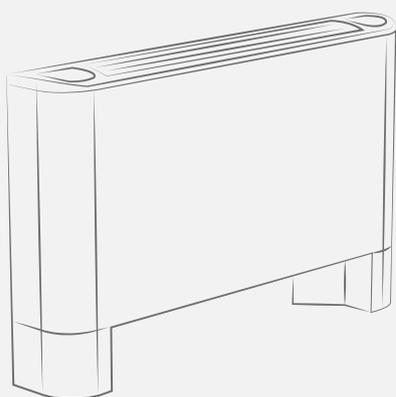

## BABYWIND

Low profile centrifugal  
fan coil unit

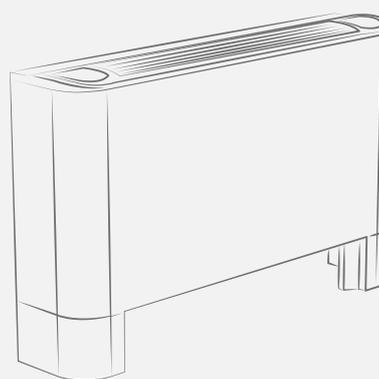

In order to be able to provide a concrete answer to any type of installation requirement, especially when there are dimensional limits, **Eden** can provide multiple solutions on request, mainly dedicated for application in the residential, commercial and tertiary sectors, which are characterized by the strong combination of performance, dimensional compactness and low noise emissions, emphasized by the construction features adopted.

## FLAT

Thin profile centrifugal fan coil unit

## LIVE

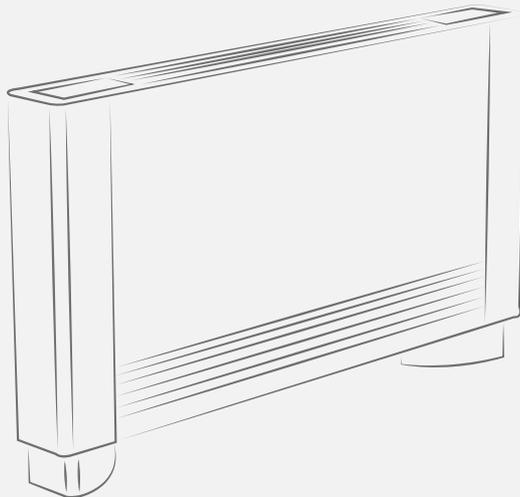

Tangential fan coil unit

# MINIFLAT-ECM

Thin profile tangential fan coil unit

SPECIAL

# Exclusive design, superlative comfort

 **0.8 ÷ 3.6** kW  
cooling

 **1.8 ÷ 7.8** kW  
heating

 **50%**  
energy saving up to 50%

 **53 - 610** m<sup>3</sup>/h  
air flow

**Ultra-thin:**

compact dimensions distinguished by a thickness of only 130 mm, elegant and minimal design and high performance with low energy consumption. The perfect solution for ideal comfort in a residential environment.

**Radiant panel:**

in "heating" mode it is possible to take advantage of an important advantage that integrates a special radiant effect (only for version XX5R) to the traditional convective functioning.

This feature guarantees a further refinement of the user's environmental comfort, keeping the temperature set-point constant and initially reached quickly and dynamically by using the tangential fan.

This ideal condition of comfort can then be easily maintained thanks to the use of very low consumption micro fans, which ensure the desired thermal gradient, in total harmony and maximum silence.

**Ultra-low noise emissions:**

the main feature of the series lies in the ability to reach the temperature desired by the user in a rapid and dynamic manner, keeping it in complete autonomy through an intelligent modulation of the air flow rate that favors low ventilation speeds, to direct benefit of the psychophysical comfort of the user, always guaranteed by low noise emissions.

**High energy savings:**

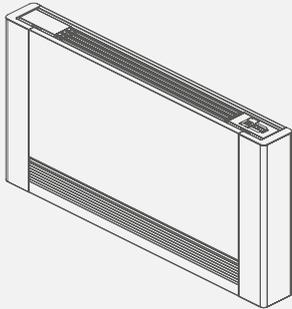

an aspect of considerable importance is also the high energy savings made possible through the use of an exclusive inverter motor that allows a significant reduction in energy consumption.

# High performance with very low sound emissions

Innovative fan coil solution for heating, cooling and dehumidification that allows high energy savings to be achieved thanks to the possibility of being combined with low temperature heat generators such as heat pumps, condensing boilers and integrated systems with solar panels, guaranteeing ideal comfort with very low noise emissions.

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

	<p><b>Feet covering</b> the connecting hydraulic pipework coming from the floor.</p>
	<p><b>Ground anchor feet</b></p>
	<p><b>Pre-painted back panel</b></p>
	<p><b>Steel box</b> for vertical/horizontal recessed units.</p>
	<p><b>Casing cover panel</b> for vertical installation included of casing, inlet grill and outlet louver.</p>
	<p><b>Plenum</b> - 90° supply plenum - air intake straight plenum fitting for built-in installation</p>
	<p><b>Grills</b> adjustable air supply aluminium grill with double orienting louvres and air intake aluminium grill with straight profile.</p>
	<p><b>Motor cable</b> for on-site left to right water connection exchange.</p>
	<p><b>Control:</b> wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.</p>
	<p><b>Valves:</b> wide range of valves supplied.</p>

The series lends itself to be easily installed also in the built-in version through the special niche and its front panel specially designed and developed in order to satisfy any application need.

This installation method, in addition to ensuring perfect integration of the unit within the environment, allows at the same time to recover more living space, offering the possibility of confining the unit and any accessories supplied inside the niche, specially sized to ensure total accessibility during the installation and maintenance phases.

#### Concealed panel versions

#### MIFP-MF

Panel for vertical and horizontal units, 9 mm thick, made of hot-galvanized sheet metal painted in white RAL 9003 color.

The panel is designed for perfect coupling with the recessed formwork of the same size and is composed of: an external perimeter frame, a front panel, a removable grid for cleaning the air filters, an adjustable deflector (vertical installation only) for the deviation of the supply air flow.

In addition, the central part of the panel is easily removable to allow unit maintenance operations.

# Compatibility of controls

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 311.

### CONTROLLI E DISPLAY - CONTROLS & DISPLAY - CONTRÔLES ET ÉCRAN - STEUERUNGEN UND DISPLAY - CONTROLES Y PANTALLAS

Display - Display - Écran - Display - Monitor

Acceso/Spento - On/Off - Allumé/Éteint - Eingeschaltet/Ausgeschaltet - Encendido /Apagado

Caldo/Freddo - Heat/Cool - Chaud/Froid - Heizen/Kühlen - Frío /Caliente

3 velocità ventilatore - 3 fan speed - 3 vitesses ventilateur - 3 Gebläsegeschwindigkeiten - 3 velocidades de ventilador

Regolazione temperatura - Set point range - Réglage température - Temperaturregelung - Regulación de la temperatura

### COMMUTAZIONE - CHANGEOVER - COMMUTATION - UMSCHALTUNG - TRASPUESTA

Velocità automatica - Automatic speed control - Vitesse automatique - Automatische Geschwindigkeitseinstellung - Velocidad automática

Caldo/freddo centralizzata - Central season changeover - Chaud/froid centralisé - Heizen/Kühlen Umschaltung - Cambio Verano / Invierno centralizado

Caldo/freddo automatico (impianto 2 tubi) - Automatic season changeover (2 pipe system) - Chaud/froid automatique (système à 2 tubes) - Heizen/Kühlen Umschaltung automatisch (Anlage mit 2 Leitersystem) - Cambio automático Verano / Invierno (sistema de 2 tubos)

Caldo/freddo automatico con zona neutra (imp. 4 tubi) - Automatic season changeover with neutral zone (4 pipe syst.) - Chaud/froid automatique avec zone neutre (syst. à 4 tubes) - Heizen/Kühlen Umschaltung automatisch mit neutralem Bereich (Anlage mit 4 Leiter-System) - Cambio automático Verano/Invierno con zona neutra (sist. de 4 tubos)

### INGRESSI - INPUTS - ENTRÉES - EINGÄNGE - ENTRADAS

Sonda aria remota - Remote air intake sensor - Capteur air à distance - Lufteintrittsfühler - Sonda de aire remota

Sonda acqua - Water sensor - Capteur eau - Wassertemperaturfühler - Sonda de agua

[TC/TC-B] Termostato di consenso - Low temperature thermostat - Thermostat d'autorisation - Freigabethermostat - Termostato de mínima

Contatto finestra - Windows contact - Contact fenêtre - Fensterkontakt - Contacto de ventana

### USCITE - OUTPUTS - SORTIES - AUSGÄNGE - SALIDAS

Valvole On/Off - On/Off valves - Vannes On/Off - Ein-Aus-Ventil - Válvulas On/Off

Valvole 3 punti (PWM) - Floating valves (PWM) - Vannes 3 points (PWM) - 3-Punkt-Ventil (PWM) - Válvulas de 3 puntos (PWM)

Valvole 0-10V - 0-10V proportional valves - Vannes 0-10V - Ventile 0-10 V - Válvulas 0-10V

### FUNZIONI SPECIALI - SPECIAL FUNCTIONS - FONCTION SPÉCIALES - SONDERFUNKTIONEN - FUNCIONES ESPECIALES

Ventilatore termostato - Fan thermostat controlled - Ventilateur thermostaté - Thermostatgesteuerter Ventilator - Ventilador termostático

Comando resistenza elettrica - Electric heater control - Commande résistance électrique - Steuerung Elektroheizregister - Control de resistencia eléctrica

Funzione economy - Economy function - Fonction economy - Economy-Funktion - Función Economy

Funzione solo ventilazione - Fan function - Fonction uniquement ventilation - Nur Ventilatorbetrieb - Función sólo ventilador

Timer giornaliero - Daily timer - Minuterie quotidienne - Tagestimer - Temporizador diario

Funzione antistratificazione - Air recirculation function - Fonction anti-stratification - Funktion zum Schutz gegen Schichtbildung - Función anti-estratificación

Funzione Master/Slave - Master/Slave function - Fonction Master/Slave - Master/Slave Funktion - Función Master/Slave

Ventilatore modulante - Modulating fan - Ventilateur modulant - Modulierender Ventilator - Ventilador modulante

Programmazione settimanale - Weekly timetable - Programmation hebdomadaire - Wochenprogrammierung - Programación semanal

[MODbus] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

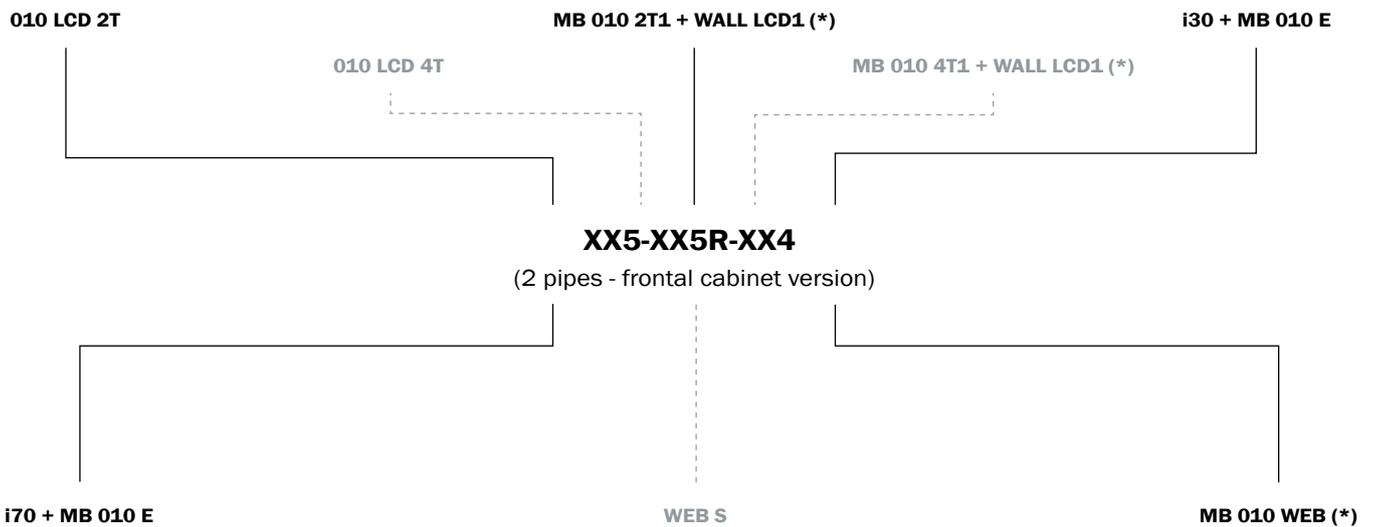

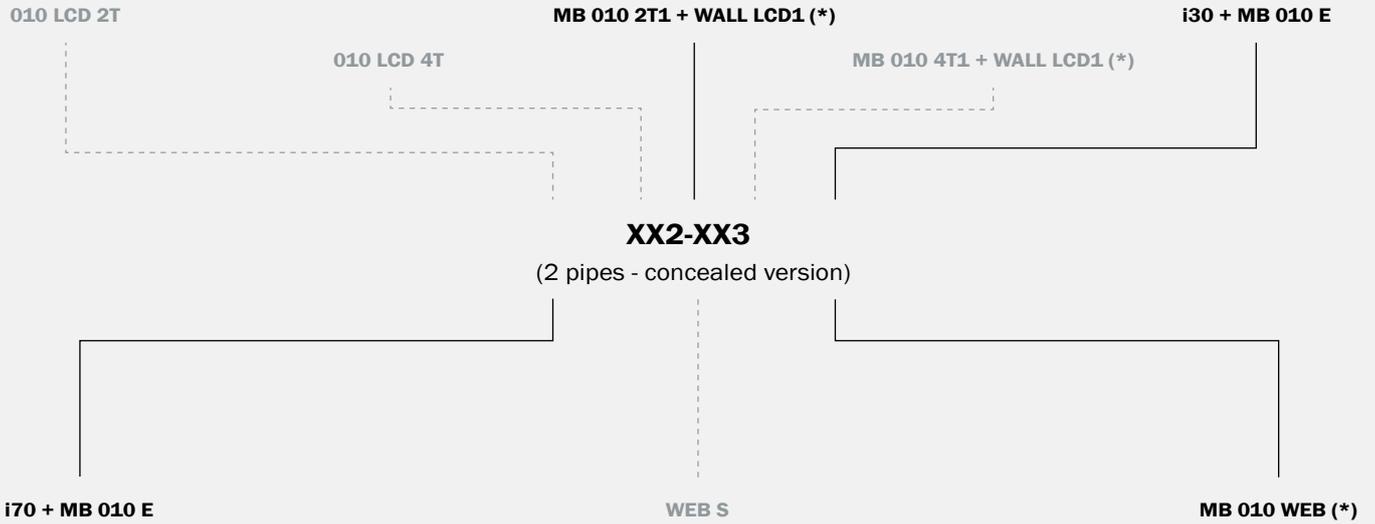

[BACnet] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

Controllo umidità - Humidity control - Contrôle de l'humidité - Feuchtigkeitsregelung - Control humedad

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

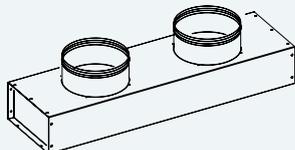

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

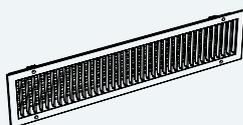

**Auxiliary drain pan**  
for horizontal and vertical unit

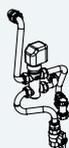

**Auxiliary condensate drain pump**

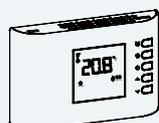

**Plenum:**  
wide range of plenums and telescopic extensions for every installation need. Fully customized plenums can also be made on request.

**Grills:**  
adjustable supply or intake grill in ABS  
The grills can also be painted on request with the RAL color of your choice.

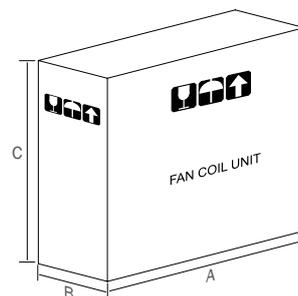

**Valves:**  
wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose.

**Control:**  
wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

Installazione a parete da esterno - Wall mounting - Installation murale - Wandmontage - Instalación a pared

Installazione a bordo unità - On board unit installation - Installation embarquée - Installation auf dem Gerät - Instalación al bordo de la unidad

Installazione a parete da incasso - Wall flush-mounting - Installation à encaissement - Wandeinbau - Instalación empotrada

## REGOLATORI - CONTROLLERS - RÉGULATEURS - REGLER - REGULADORES

### UTILIZZO - USE - UTILISATION - VERWENDUNG - USO

Impianto a 2 tubi - 2 pipe system - Système à 2 tubes - Anlage mit 2 Leiter-System - Sistema de 2 tubos

Impianto a 4 tubi - 4 pipe system - Système à 4 tubes - Anlage mit 4 Leiter-System - Sistema de 4 tubos

### CONTROLLI E DISPLAY - CONTROLS & DISPLAY - CONTRÔLES ET ÉCRAN - STEUERUNGEN UND DISPLAY - CONTROLES Y PANTALLAS

Display - Display - Écran - Display - Monitor

Acceso/Spento - On/Off - Allumé/Éteint - Eingeschaltet/Ausgeschaltet - Encendido /Apagado

Caldo/Freddo - Heat/Cool - Chaud/Froid - Heizen/Kühlen - Frío /Caliente

3 velocità ventilatore - 3 fan speed - 3 vitesses ventilateur - 3 Gebläsegeschwindigkeiten - 3 velocidades de ventilador

Regolazione temperatura - Set point range - Réglage température - Temperaturregelung - Regulación de la temperatura

### COMMUTAZIONE - CHANGEOVER - COMMUTATION - UMSCHALTUNG - TRASPUESTA

Velocità automatica - Automatic speed control - Vitesse automatique - Automatische Geschwindigkeitseinstellung - Velocidad automática

Caldo/freddo centralizzata - Central season changeover - Chaud/froid centralisé - Heizen/Kühlen Umschaltung - Cambio Verano / Invierno centralizado

Caldo/freddo automatico (impianto 2 tubi) - Automatic season changeover (2 pipe system) - Chaud/froid automatique (système à 2 tubes) Heizen/Kühlen Umschaltung automatisch (Anlage mit 2 Leitersystem) - Cambio automático Verano / Invierno (sistema de 2 tubos)

Caldo/freddo automatico con zona neutra (imp. 4 tubi) - Automatic season changeover with neutral zone (4 pipe syst.) - Chaud/froid automatique avec zone neutre (syst. à 4 tubes) - Heizen/Kühlen Umschaltung automatisch mit neutralem Bereich (Anlage mit 4 Leiter-System) - Cambio automático Verano/Invierno con zona neutra (sist. de 4 tubos)

### INGRESSI - INPUTS - ENTRÉES - EINGÄNGE - ENTRADAS

Sonda aria remota - Remote air intake sensor - Capteur air à distance - Lufteintrittsfühler - Sonda de aire remota

Sonda acqua - Water sensor - Capteur eau - Wassertemperaturfühler - Sonda de agua

[TC/TC-B] Termostato di consenso - Low temperature thermostat - Thermostat d'autorisation - Freigabethermostat - Termostato de mínima

Contatto finestra - Windows contact - Contact fenêtre - Fensterkontakt - Contacto de ventana

### USCITE - OUTPUTS - SORTIES - AUSGÄNGE - SALIDAS

Valvole On/Off - On/Off valves - Vannes On/Off - Ein-Aus-Ventil - Válvulas On/Off

Valvole 3 punti (PWM) - Floating valves (PWM) - Vannes 3 points (PWM) - 3-Punkt-Ventil (PWM) - Válvulas de 3 puntos (PWM)

Valvole 0-10V - 0-10V proportional valves - Vannes 0-10V - Ventile 0-10 V - Válvulas 0-10V

### FUNZIONI SPECIALI - SPECIAL FUNCTIONS - FONCTION SPÉCIALES - SONDERFUNKTIONEN - FUNCIONES ESPECIALES

Ventilatore termostato - Fan thermostat controlled - Ventilateur thermostaté - Thermostatgesteuerter Ventilator - Ventilador termostático

Comando resistenza elettrica - Electric heater control - Commande résistance électrique - Steuerung Elektroheizregister - Control de resistencia eléctrica

Funzione economy - Economy function - Fonction economy - Economy-Funktion - Función Economy

Funzione solo ventilazione - Fan function - Fonction uniquement ventilation - Nur Ventilatorbetrieb - Función sólo ventilador

Timer giornaliero - Daily timer - Minuterie quotidienne - Tagestimer - Temporizador diario

Funzione antistratificazione - Air recirculation function - Fonction anti-stratification - Funktion zum Schutz gegen Schichtbildung - Función anti-estratificación

Funzione Master/Slave - Master/Slave function - Fonction Master/Slave - Master/Slave Funktion - Función Master/Slave

Ventilatore modulante - Modulating fan - Ventilateur modulant - Modulierender Ventilator - Ventilador modulante

Programmazione settimanale - Weekly timetable - Programmation hebdomadaire - Wochenprogrammierung - Programación semanal

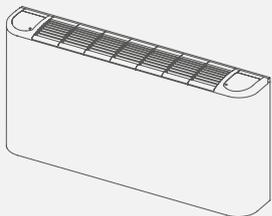

[MODbus] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocollo de comunicación

[BACnet] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocollo de comunicación

Controllo umidità - Humidity control - Contrôle de l'humidité - Feuchtigkeitsregelung - Control humedad

velocità cablate / wired speed / vitesse câblée / verkabelte Geschwindigkeitsstufe / velocidades cableadas

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

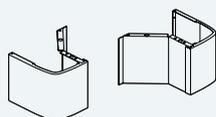

### Auxiliary condensate drain pan

for horizontal or vertical units

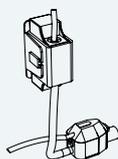

### Coils:

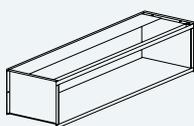

auxiliary 1 row coil for 4 pipe system

### Foot for recessed version or with decorative cabinet

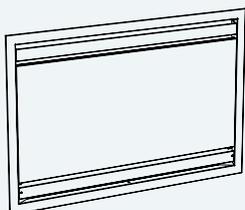

### Auxiliary condensate drain pump

### Plenum:

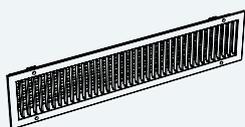

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.

Fully customized plenums can also be made on request.

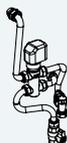

**Panels and technical spaces**

wide range of front cover panels in multiple configurations, finishes and thicknesses, with relative recessed technical spaces.

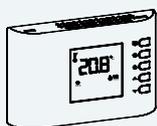

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.  
The grills can also be painted on request with the RAL color of your choice.

**Valves:**

wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose.

**Control:**

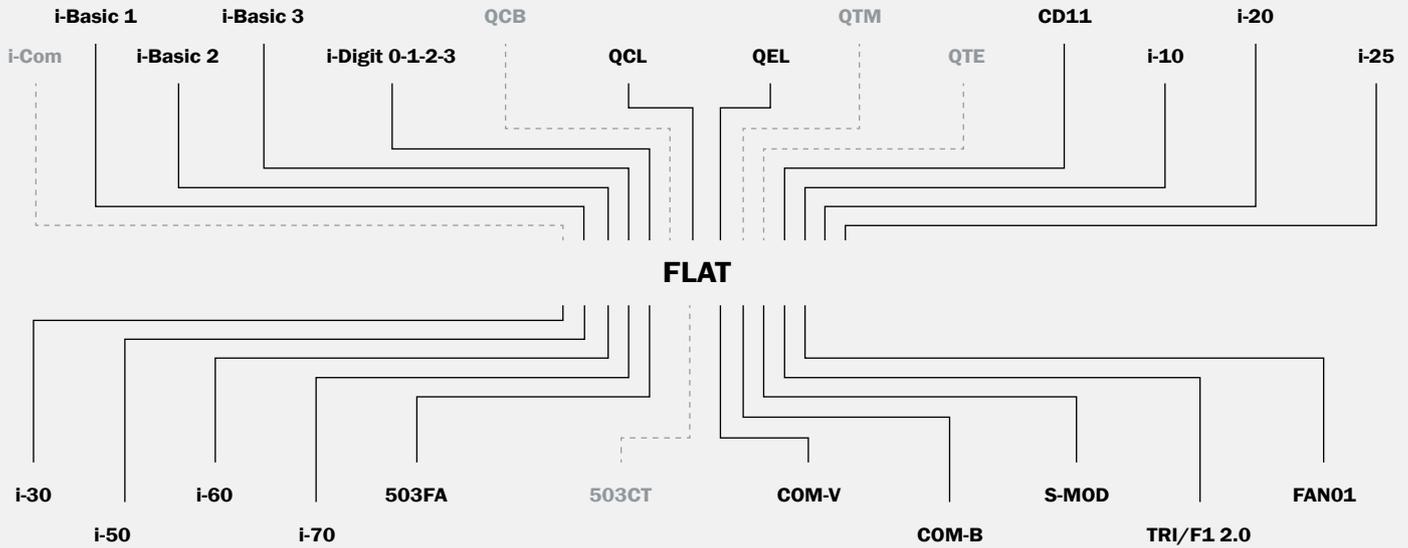

wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

# Compatibility of controls

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

## COMPATIBILITÀ - COMPATIBILITY - COMPATIBILITÉ - KOMPATIBILITÄT - COMPATIBILIDAD

Installazione a parete da esterno - Wall mounting - Installation murale - Wandmontage - Instalación a pared

Installazione a bordo unità - On board unit installation - Installation embarquée - Installation auf dem Gerät - Instalación al bordo de la unidad

Installazione a parete da incasso - Wall flush-mounting - Installation à encaissement - Wandeinbau - Instalación empotrada

## REGOLATORI - CONTROLLERS - RÉGULATEURS - REGLER - REGULADORES

### UTILIZZO - USE - UTILISATION - VERWENDUNG - USO

Impianto a 2 tubi - 2 pipe system - Système à 2 tubes - Anlage mit 2 Leiter-System - Sistema de 2 tubos

Impianto a 4 tubi - 4 pipe system - Système à 4 tubes - Anlage mit 4 Leiter-System - Sistema de 4 tubos

### CONTROLLI E DISPLAY - CONTROLS & DISPLAY - CONTRÔLES ET ÉCRAN - STEUERUNGEN UND DISPLAY - CONTROLES Y PANTALLAS

Display - Display - Écran - Display - Monitor

Acceso/Spento - On/Off - Allumé/Éteint - Eingeschaltet/Ausgeschaltet - Encendido /Apagado

Caldo/Freddo - Heat/Cool - Chaud/Froid - Heizen/Kühlen - Frío /Caliente

3 velocità ventilatore - 3 fan speed - 3 vitesses ventilateur - 3 Gebläsegeschwindigkeiten - 3 velocidades de ventilador

Regolazione temperatura - Set point range - Réglage température - Temperaturregelung - Regulación de la temperatura

### COMMUTAZIONE - CHANGEOVER - COMMUTATION - UMSCHALTUNG - TRASPUESTA

Velocità automatica - Automatic speed control - Vitesse automatique - Automatische Geschwindigkeitseinstellung - Velocidad automática

Caldo/freddo centralizzata - Central season changeover - Chaud/froid centralisé - Heizen/Kühlen Umschaltung - Cambio Verano / Invierno centralizado

Caldo/freddo automatico (impianto 2 tubi) - Automatic season changeover (2 pipe system) - Chaud/froid automatique (système à 2 tubes) - Heizen/Kühlen Umschaltung automatisch (Anlage mit 2 Leitersystem) - Cambio automático Verano / Invierno (sistema de 2 tubos)

Caldo/freddo automatico con zona neutra (imp. 4 tubi) - Automatic season changeover with neutral zone (4 pipe syst.) - Chaud/froid automatique avec zone neutre (syst. à 4 tubes) - Heizen/Kühlen Umschaltung automatisch mit neutralem Bereich (Anlage mit 4 Leiter-System) - Cambio automático Verano/Invierno con zona neutra (sist. de 4 tubos)

### INGRESSI - INPUTS - ENTRÉES - EINGÄNGE - ENTRADAS

Sonda aria remota - Remote air intake sensor - Capteur air à distance - Lufteintrittsfühler - Sonda de aire remota

Sonda acqua - Water sensor - Capteur eau - Wassertemperaturfühler - Sonda de agua

[TC/TC-B] Termostato di consenso - Low temperature thermostat - Thermostat d'autorisation - Freigabethermostat - Termostato de mínima

Contatto finestra - Windows contact - Contact fenêtre - Fensterkontakt - Contacto de ventana

### USCITE - OUTPUTS - SORTIES - AUSGÄNGE - SALIDAS

Valvole On/Off - On/Off valves - Vannes On/Off - Ein-Aus-Ventil - Válvulas On/Off

Valvole 3 punti (PWM) - Floating valves (PWM) - Vannes 3 points (PWM) - 3-Punkt-Ventil (PWM) - Válvulas de 3 puntos (PWM)

Valvole 0-10V - 0-10V proportional valves - Vannes 0-10V - Ventile 0-10 V - Válvulas 0-10V

### FUNZIONI SPECIALI - SPECIAL FUNCTIONS - FONCTION SPÉCIALES - SONDERFUNKTIONEN - FUNCIONES ESPECIALES

Ventilatore termostato - Fan thermostat controlled - Ventilateur thermostaté - Thermostatgesteuerter Ventilator - Ventilador termostático

Comando resistenza elettrica - Electric heater control - Commande résistance électrique - Steuerung Elektroheizregister - Control de resistencia eléctrica

Funzione economy - Economy function - Fonction economy - Economy-Funktion - Función Economy

Funzione solo ventilazione - Fan function - Fonction uniquement ventilation - Nur Ventilatorbetrieb - Función sólo ventilador

Timer giornaliero - Daily timer - Minuterie quotidienne - Tagestimer - Temporizador diario

Funzione antistratificazione - Air recirculation function - Fonction anti-stratification - Funktion zum Schutz gegen Schichtbildung - Función anti-estratificación

Funzione Master/Slave - Master/Slave function - Fonction Master/Slave - Master/Slave Funktion - Función Master/Slave

Ventilatore modulante - Modulating fan - Ventilateur modulant - Modulierender Ventilator - Ventilador modulante

Programmazione settimanale - Weekly timetable - Programmation hebdomadaire - Wochenprogrammierung - Programación semanal

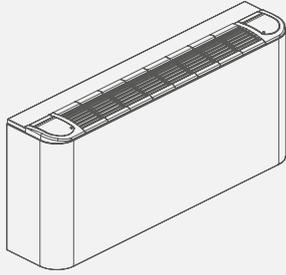

[MODbus] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

[BACnet] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

Controllo umidità - Humidity control - Contrôle de l'humidité - Feuchtigkeitsregelung - Control humedad

 - **Unidad estándar con salida libre:** presión estática externa = 0 Pa / La prueba de nivel acústico se realizó de acuerdo con la **norma EN 16583:2015 / Nivel de presión sonora:** se considera 8,6 dB (A) inferior a la potencia acústica en una sala de 90 m³ con un tiempo de reverberación de 0,5 seg. / **Valores de voltaje admisibles:** ~230V / 1ph / 50Hz

velocità cablate / wired speed / vitesse câblée / verkabelte Geschwindigkeitsstufe / velocidades cableadas

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

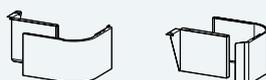

### Auxiliary condensate drain pan:

for horizontal or vertical units

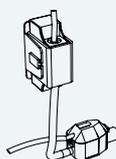

### Coils:

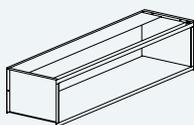

auxiliary 4 rows coil for 2 pipe system,  
auxiliary 1 row coil for 4 pipe system

### Foot for recessed version or with decorative cabinet

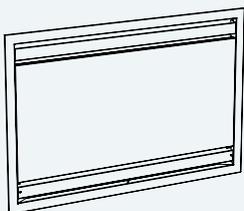

### Auxiliary condensate drain pump

### Plenum:

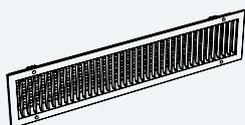

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.

Fully customized plenums can also be made on request.

**Panels and technical spaces:**

wide range of front cover panels in multiple configurations, finishes and thicknesses, with relative recessed technical spaces.  
Also available the back cover panel for installation on shop window.

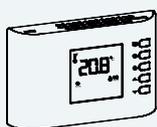

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.  
The grills can also be painted on request with the RAL color of your choice.

**Valves:**

wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose.

**Control:**

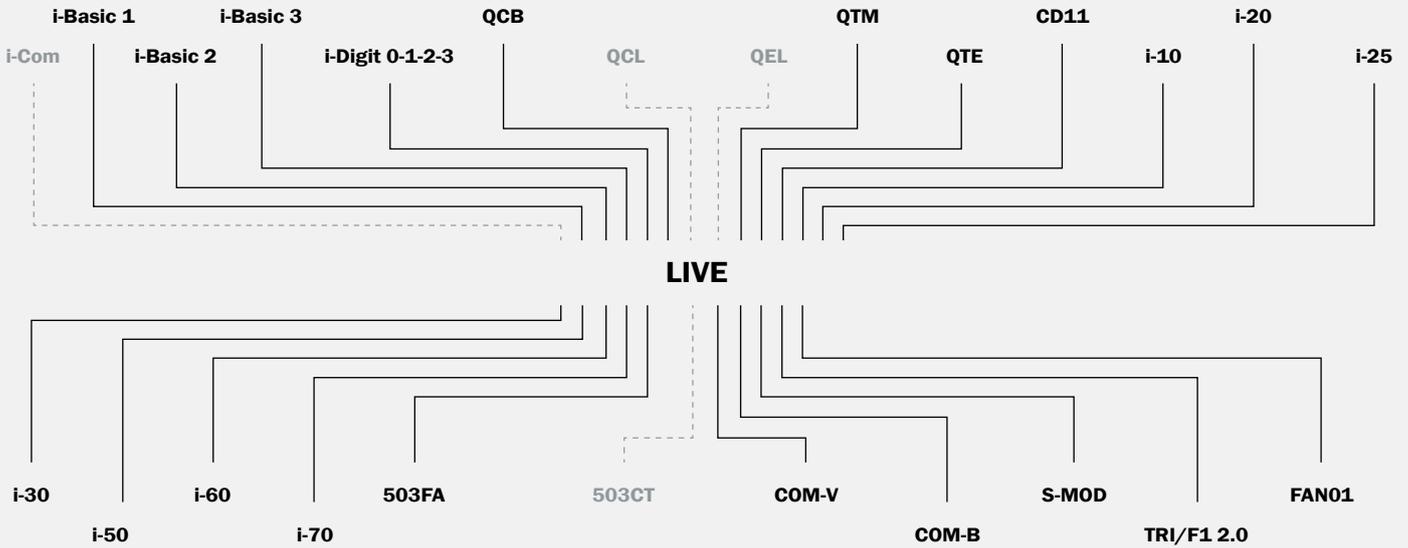

wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

# Compatibility of controls

Controllo umidità - Humidity control - Contrôle de l'humidité - Feuchtigkeitsregelung - Control humedad

# FEEL

Wall mounted fan coil unit

A GROUP S.p.A (Trademark EDEN)  
participates in the ECP programme for FCU.  
Check ongoing validity of certificate:  
[www.eurovent-certification.com](http://www.eurovent-certification.com)

# Reliability and performance, first

FEEL

1.5 ÷ 3.9 kW  
cooling

1.6 ÷ 4.1 kW  
heating

234 - 620 m<sup>3</sup>/h  
air flow

### Quality and design:

equipped with a tangential fan to offer the greatest acoustic comfort, the series is the perfect combination of performance and design. Thanks to the range consisting of 4 sizes it is possible to uniformly cover a wide range of powers from 1.5 kW to 3.9 kW in cooling and from 1.6 kW to 4.1 kW in heating.

### Tangential fan:

designed for high air flow rates at low rpm, the tangential fan ensures greater silence with high performance.

### Coils:

in copper tube with aluminum fins equipped with a specific hydrophilic treatment that allows the drops of condensation to slide quickly towards the collection basin optimizing the crossing of the air flow and guaranteeing a greater resistance of aluminum to corrosion. The air vent valve, which drains directly into the condensate drain pan is easily accessible. The heat exchange coil is not suitable for use in corrosive atmospheres.

### Display:

integrated in the cover cabinet, it displays the set-up of the unit: room temperature, fan speed and operating mode (available for RC versions only).

### Automatic swing:

with a simple click of the remote control it will be possible to have a complete adjustment of the air flow according to your needs, in order to guarantee maximum comfort for the environment (available for RC versions only).

### Integrated valve:

thanks to the integrated 3-way valve (for NV / RC-V versions only), it is possible to efficiently prevent energy waste, since the water flow is interrupted when the unit is switched off, unlike the normal splits on which the flow even when the unit is not in operation.

This solution also ensures high ease of installation and maintenance and does not require the use of special niches since everything is perfectly integrated into the unit.

### Acoustic comfort:

the design with construction geometries, optimized according to the different working speeds, allows to guarantee high performance with maximum noiseless functioning especially when the **Sleep mode** is activated (available for RC versions only).

# Reliability and performance, first

A clean and sophisticated design, modern forms and cutting-edge technology. The perfect solution for installation in commercial, residential and tertiary sectors, where comfort, noiselessness and enhancement of environment are the main requirements to be satisfied.

Versions	
<b>FEEL RC-V</b>	with infrared remote control and with 3 way valve included
<b>FEEL NC-V</b>	foreseen for remote control (not included), and with 3 way valve included
<b>FEEL RC</b>	with infrared remote control, without valve
<b>FEEL NC</b>	foreseen for remote control (not included), without valve

FEEL

#### Timer real time

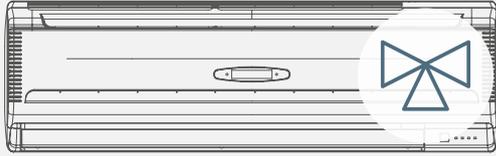

It is possible to program within 24 hours starting and shutting down the unit completely automatically even in your absence, in order to find the right environmental comfort upon your arrival. (available for RC versions only)

#### Sleep mode

It allows a complete relax during sleep. By activating this function, the unit sets automatically temperature and fan speed to ensure the maximum comfort, noiselessness and low cost. (available for RC versions only)

RC-V

Wall mounted fan coil unit  
with infrared remote control IR-T  
and with 3 way valve included

NC-V

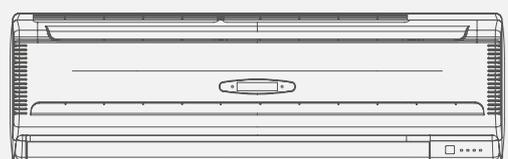

Wall mounted fan coil unit  
foreseen for remote control  
and with 3 way valve included

RC

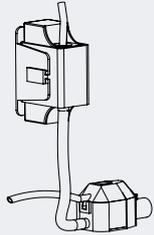

Wall mounted fan coil unit  
with infrared remote control IR-T  
(without 3 way valve included)

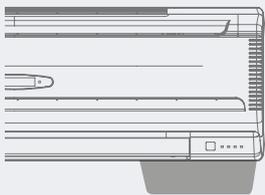

NC

Wall mounted fan coil unit  
foreseen for remote control  
(without 3 way valve included)

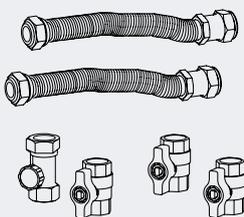

**Auxiliary condensate drain pump**  
for installation on recessed wall box.

**Auxiliary condensate drain pump**  
for exposed installation.

**Pre-installation box**  
recessed wall, in ABS, equipped with condensate fitting on side

**Interception kit**  
Pair of stainless steel flexible pipes, shut off valves, balancing valves

cooling

 **1.6 ÷ 11.3** kW  
heating

 **50%**  
energy saving up to 50%

 **225 - 1536** m<sup>3</sup>/h  
air flow

SOFT | SOFT ECM

SOFT | SOFT ECM

### Minimal design:

characterized by shapes and geometries appropriately designed to guarantee a perfect combination of high performance, low sound emissions and unique environmental comfort thanks to the true Coanda effect.

### Maximum level of silence:

the series is at the top of the range also on the subject of low noise emissions, which ensure the user that particular condition of psychophysical well-being made possible thanks to the meticulous research and development process.

### Construction features:

frame made of Z200 hot-dip galvanized steel sheet 1 ÷ 1.5 mm thick, externally finished with anti-condensation barrier and internally insulated with closed-cell insulation Euroclass B-s2, d0 (EN13501-1) 10mm thick. Main condensate drain basin made of high density EPS, auxiliary basin in molded ABS.

### Adjustable louvers:

in order to guarantee perfect climate comfort control both in cooling and heating mode, the front panel in the ABS version is available in three different configurations, including the versions with motorized louvers or manual louvers.

### Fan section:

consisting of a radial fan appropriately developed to optimize performance and reduce turbulence, to the benefit of efficiency and low noise. Electric motor suspended on asynchronous single-phase vibration dampers ~230V / 1ph / 50Hz with overload protection, 6 rotation speeds, 3 of which are connected.

The ECM version is instead equipped with an innovative Brushless motor, which guarantees precise and modular control of the air flow, limiting the energy supply to the actual workload required, without any waste.

### Condensate evacuation pump:

centrifugal type, with a useful head of 650 mm complete with non-return valve and managed by a dedicated electronic board to which a float system is combined for the control of the condensate level and alarm signaling.

### Filter:

renewable filter with galvanized steel frame and polypropylene filter fabric with efficiency class G1 \* / EU1 \*\*. Alternatively, a wide range of filters with greater efficiencies are available, including G3 \* / EU3 \*\* and G4 \* / EU4 \*\* or the innovative electronic filter that allows complete air purification and at the same time ensures high efficiencies thanks to the minimum pressure losses. (\* according to EN779 / \*\* according to Eurovent)

### Integrated valves and resistance:

available as an accessory also valves and electric resistances that can be integrated directly inside the unit, avoiding unnecessary heat loss, significant reduction in installation times and greater operating reliability.

### Easy installation and maintenance:

remarkable ease of installation and maintenance thanks to the *EasyWaySystem* which allows quick access to all the main components that require ordinary or extraordinary interventions, without having to remove the front intake panel.

# Innovation and performance, at the top of the range

Innovative cassette fan coil unit characterized by a modern and minimalist design and a perfect combination of high performance, low noise emissions and a marked ease of installation and maintenance thanks to the *EasyWaySystem*.

Available in 8 sizes for 2-pipe system and in 10 sizes for 4-pipe system, also available with 2 or 3-way valves and armored electric heater (1250 ÷ 2500W) that can be integrated directly into the unit, for the total benefit of the greater operational efficiency and safety and a clear reduction in installation times.

The wide range of configurations, controls and accessories supplied ensure the right solution for every installation need. All units can be supplied in the configuration with motherboard (RC) or without motherboard (NC) and are available in the following versions:

Versions	
<b>SOFT</b>	with asynchronous motor
<b>SOFT-ECM</b>	with ECM motor
<b>SOFT-E</b>	with asynchronous motor and integrated electric heater
<b>SOFT-ECM-E</b>	with ECM motor and integrated electric heater

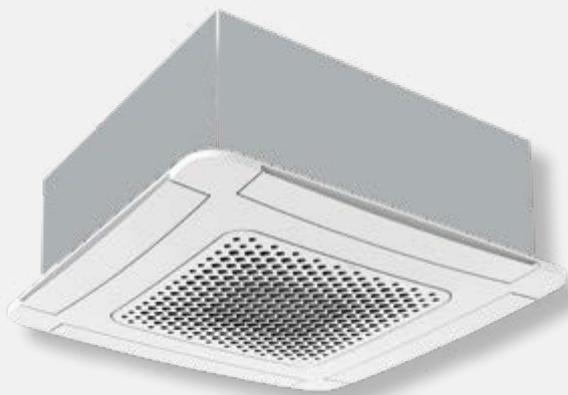

The picture refers to the unit configured with integrated valves (optional)

## ☰ Front panel versions

600 x 600

**ABS**  
(white RAL 9016)

- NC** manual louvers
- RC-M** receiver + manual louvers
- RC-A** receiver + motorized louvers

**METAL**  
(white RAL 9016)

- NC** without louvers
- RC** receiver, without louvers

900 x 900

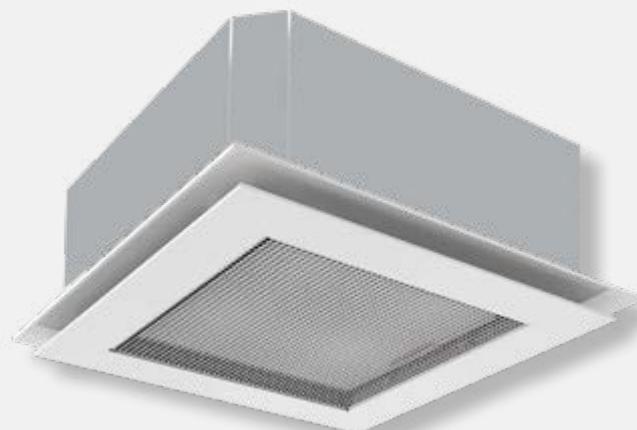

**ABS**  
(white RAL 9016)

- NC** manual louvers
- RC-M** receiver + manual louvers
- RC-A** receiver + motorized louvers

**METAL**  
(white RAL 9016)

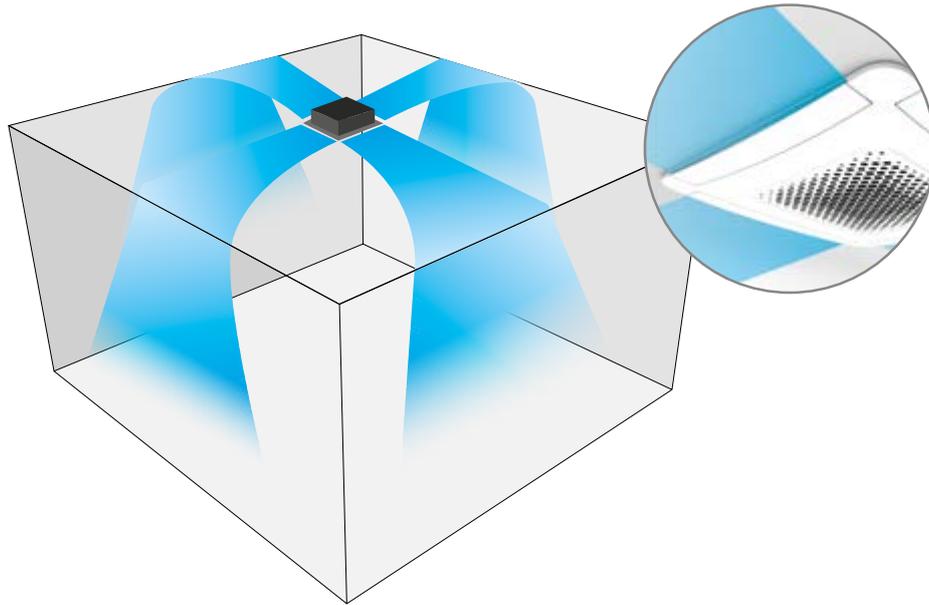

- NC** without louvers
- RC** receiver, without louvers

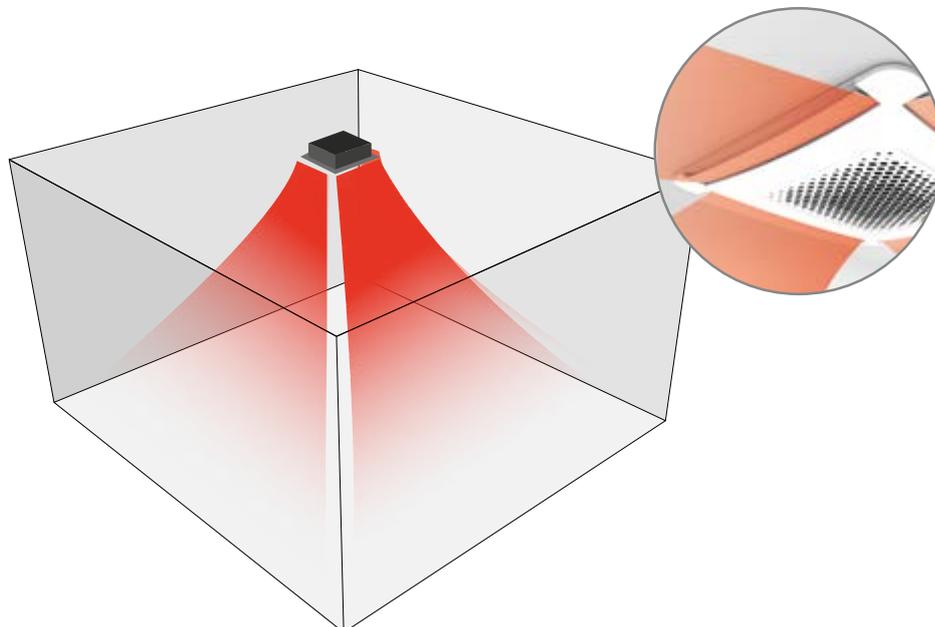

### COANDA EFFECT

The position of the lateral flaps, available in the ABS panel, allows maximum exploitation of the Coanda effect in summer modality, offering ideal comfort without any annoying typical cold air flow. Thanks to this detail the cold air tends to flow towards the ceiling distributing itself in a regular, gradual way inside the room, guaranteeing ideal climatic comfort without the unpleasant thermal phenomena caused by direct cold air.

### ANTI-STRATIFICATION EFFECT

In heating modality, the flaps are positioned automatically (automatically for the RC-A version, manually for the RC-M / NC versions) with an opening of 35°, allowing the warm air to create a downward flow, ensuring the homogenous distribution of the room temperature and avoiding the problems linked to air stratification.

## Independent balancing valve

This type of valve combines two functions in a single valve, keeps the flow rate constant as the system pressure changes and at the same time regulates the flow according to the temperature, allowing perfect balancing of the hydraulic system, ensuring for each fan coil unit the desired water flow even under partial loads.

The adjustment can be performed automatically through the installation of a linear ON / OFF or modulating actuator.

### Main advantages:

- Simplified selection
- Easy installation
- High valve authority which remains constant
- Constant flow rate as the differential pressure changes
- Optimized installation by measuring the set pressure
- Energy efficiency thanks to the low differential pressure required
- Maintenance of the set water flow even at partial loads
- Optimization of pump speed using pressure taps (optional)
- Preset locked by hooking

# Valve performance technical data

Warning: this type of valve is available exclusively for outside installation of the unit.

# Presetting and nomograms

In accordance with the principles of dynamic balancing, presetting allows you to set the maximum flow rate of the valve, i.e. the flow rate which will be kept constant within the differential pressure range of use, with the valve fully open. The presetting affects the minimum differential pressure of use of the valve.

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

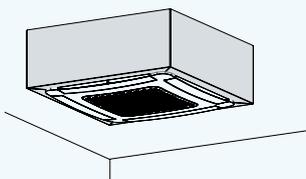

### Infrared remote control IR-C

for RC cassette

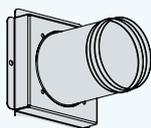

### Auxiliary drain pan

made in molded ABS.

### Decorative cabinet:

in hot-galvanized steel and painted in RAL9016 white or with a color of your choice.

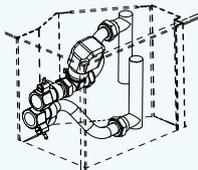

### Air spigots:

- Ø 80 mm circular spigot for fresh air intake,
- circular spigot Ø 150 mm for air supply to adjacent room,
- fresh air baffle plate with Ø 150 mm spigot

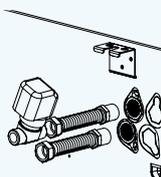

### Panels and baffle plates customization

it is possible to request customized paintings for the front panels or for the baffle plates (color of your choice).

### Internal valves:

on/off valves, 2-way or 3-way, for 2 or 4 pipe system, supplied already installed, tested and integrated directly into the unit.

### External valves:

on/off valves, modulating, floating, two and three ways or independent balancing valves, for two or four pipe systems. Supplied pre-assembled but loose, to be installed directly on site by the customer.

# The new generation filtration system

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

#### Clean Life System - 600

Electronic filter for 600x600 version  
Models: 61,62,63,64,65 - 81,82,83,83C,84,84C

#### Clean Life System - 900

Electronic filter for 900x900 version  
Models: 71,72,73 - 91,92,93,94

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

# A healthy choice, responsible and aware

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

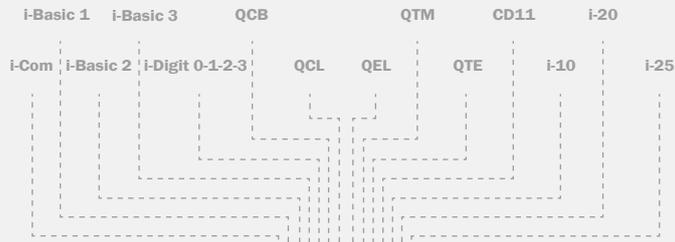

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

# Compatibility of controls

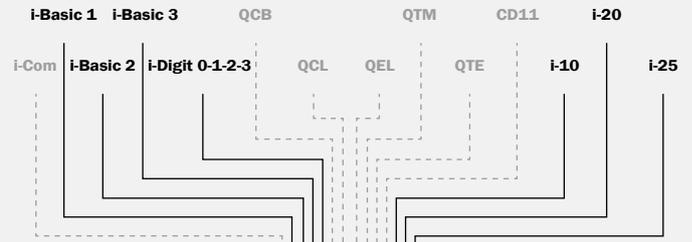

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

air flow

### Constructive and innovative solutions:

the introduction of innovative solutions has also involved the use of stainless materials and cutting-edge polymers tested according to DIN EN ISO 846 and capable of inhibiting bacterial proliferation. Insulators and polymeric components directly in contact with the air flow have been specifically tested in certified laboratories in order to guarantee the maximum resistance to the action of fungi, bacteria and microorganisms that could represent a risk for the health and well-being of the user.

### Fan section:

consisting of a radial fan appropriately developed to optimize performance and reduce turbulence, to the benefit of efficiency and low noise. Electric motor suspended on ECM type anti-vibration mounts with innovative Brushless motor that ensures precise and modular control of the air flow, limiting the energy supply to the actual workload required, without any waste.

### Front panel:

the unit is supplied as standard with a front panel made of AISI 304 stainless steel, with a slightly brushed finish. The panel guarantees excellent aesthetics as well as offering even greater resistance, hygiene and greater ease of cleaning.

### Easy installation and maintenance:

high attention has been paid to the issue of accessibility in order to be able to guarantee a simplification of installation and maintenance activities, for the benefit of a net reduction in operating costs and greater efficiency and safety during cleaning and sanitizing processes. Moreover, thanks to the *EasyWaySystem*, which allows quick and easy access to all the main components that require ordinary or extraordinary interventions, it is possible to intervene without having to remove the front intake panel.

### Condensate drain pan:

specially designed in order to be easily removed and sanitized, it is made entirely of stainless steel, suitably insulated with polymer tested according to DIN EN ISO 846. Applied materials and geometries are aimed at inhibiting bacterial proliferation and avoiding corrosion phenomena. The discharge of condensate occurs entirely by gravity and without the use of pumps, in order to ensure the total absence of any type of water stagnation.

### Comfort with maximum level of silence:

the series represents the perfect combination of innovation, safety and design, where the technological choices adopted allow for maximum comfort and maximum safety in the environments, with the minimum operating noise.

### Filter:

renewable filter with galvanized steel frame and polypropylene filter fabric with efficiency class G1\*/EU1\*\*. Alternatively, a wide range of filters with greater efficiencies are available, including G4\*/EU4\*\*, F7\*/EU3\*\* or the innovative electronic filter that allows complete air purification and at the same time ensures high efficiencies thanks to the minimum pressure losses. (\* according to EN779 / \*\* according to Eurovent)

# Comfort and well-being, in total safety

Eden, with this new certified series of cassette fan coils, wanted to give a concrete answer to the primary aspect of user safety, designing and developing a dedicated range of units designed to guarantee high standard hygienic and sanitary conditions, with multiple versatility in the field application, ranging from the most common applications such as offices, schools, gyms, SPAs and commonplaces in general in order to be able to offer a healthier and safer environment, up to more sensitive applications such as hospitals, clinics, food and pharmaceutical industries in which they must absolute levels of hygiene must be guaranteed.

## Versions

issued 09.02.2018, Gelsenkirchen

Within the framework of the conformity check the hygiene-relevant requirements of the above mentioned regulations were examined. Requirements of other regulations that refer to the above mentioned regulations were not part of the examination. Additionally, the conformity check does not include a toxicological or sensory testing of the introduced materials. This document is not part of a certification process.

3-11-2006 Supplemento ordinario alla GAZZETTA UFFICIALE Serie generale - n. 256

Il presente documento, esplicitamente previsto dall'Accordo Ministro della Salute Regioni e Province autonome del 27 settembre 2001, concernente "Linee Guida per la tutela e la promozione della salute negli ambienti confinati" (G.U. del 27 novembre 2001, n. 276, SO n. 252), è stato elaborato dalla commissione "indoor" del Ministero della salute e successivamente aggiornato e modificato da un apposito gruppo di lavoro interministeriale.

Le indicazioni tecniche di seguito riportate fanno riferimento alla norma tedesca VDI 6022 (Luglio 1998): Hygienic standards for ventilation and Air-Conditioning Systems for Offices and assembly Rooms ed alle principali norme riguardanti la progettazione, l'installazione e la manutenzione dei comparti e sistemi aeraulici, riportate in Appendice A, tratta dalle Linee Guida dell'AIACCARR.

## Main features

The introduction of innovative technical construction solutions and the use of stainless materials and cutting-edge polymers tested according to DIN EN ISO 846, capable of inhibiting bacterial proliferation, have allowed the realization of a series of cassette fan coils conforming to the most stringent parameters imposed by the VDI 6022 guidelines, increasingly recognized at European level as a reference point for the design of innovative public places in which an **excellent level of hygiene and comfort** must be ensured for the total psychophysical well-being of the user.

SOFT-ECM-Hy

The series consists of a wide and well-diversified range that includes solutions for the most varied installation requirements and consists of:

- › 5 sizes of capacities, for 2-pipe system version
- › 6 sizes of capacities, for 4-pipe system version
- › 600x600mm frontal panel made of AISI 304 stainless steel
- › Version with motherboard (RC) or without motherboard (NC)
- › Centrifugal fan coil cassette with ECM motor
- › Wide range of controls supplied
- › Air filter with G1-class efficiency, G4 / F7 / electronic filter alternatively
- › Differential pressure switch (optional)

# The new generation filtration system

SOFT-ECM-Hy

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

#### Clean Life System - 600Hy

Electronic filter for 600x600 version  
Models: 61,62,63,64,65 - 81,82,83,83C,84,84C

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

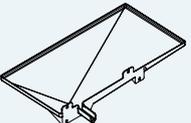

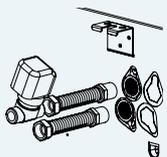

# A healthy choice, responsible and aware

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

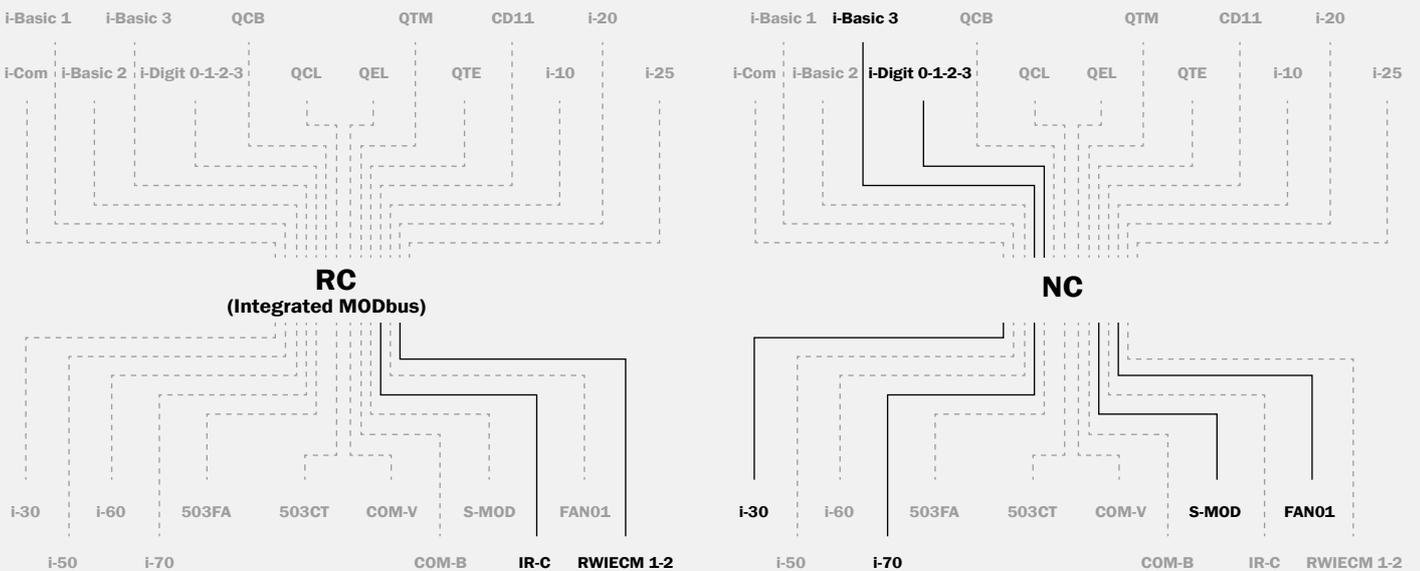

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

# Main accessories

	<p><b>Infrared remote control IR-C</b> for RC cassette</p>
	<p><b>Auxiliary drain pan</b> made of stainless steel.</p>
	<p><b>Filter:</b> regenerable synthetic filters and polypropylene filter fabric with efficiency classes G4 or F7 or electronic filter.</p>
	<p><b>Differential pressure switch</b> for with dirty filter alert.</p>
	<p><b>External valves</b> on/off valves, modulating, floating, two and three ways or independent balancing valves, for two or four pipe systems. Supplied pre-assembled but loose, to be installed directly on site by the customer.</p>

Installazione a parete da esterno - Wall mounting - Installation murale - Wandmontage - Instalación a pared

Installazione a bordo unità - On board unit installation - Installation embarquée - Installation auf dem Gerät - Instalación al bordo de la unidad

Installazione a parete da incasso - Wall flush-mounting - Installation à encaissement - Wandeinbau - Instalación empotrada

## REGOLATORI - CONTROLLERS - RÉGULATEURS - REGLER - REGULADORES

### UTILIZZO - USE - UTILISATION - VERWENDUNG - USO

Impianto a 2 tubi - 2 pipe system - Système à 2 tubes - Anlage mit 2 Leiter-System - Sistema de 2 tubos

Impianto a 4 tubi - 4 pipe system - Système à 4 tubes - Anlage mit 4 Leiter-System - Sistema de 4 tubos

### CONTROLLI E DISPLAY - CONTROLS & DISPLAY - CONTRÔLES ET ÉCRAN - STEUERUNGEN UND DISPLAY - CONTROLES Y PANTALLAS

Display - Display - Écran - Display - Monitor

Acceso/Spento - On/Off - Allumé/Éteint - Eingeschaltet/Ausgeschaltet - Encendido /Apagado

Caldo/Freddo - Heat/Cool - Chaud/Froid - Heizen/Kühlen - Frío /Caliente

3 velocità ventilatore - 3 fan speed - 3 vitesses ventilateur - 3 Gebläsegeschwindigkeiten - 3 velocidades de ventilador

Regolazione temperatura - Set point range - Réglage température - Temperaturregelung - Regulación de la temperatura

### COMMUTAZIONE - CHANGEOVER - COMMUTATION - UMSCHALTUNG - TRASPUESTA

Velocità automatica - Automatic speed control - Vitesse automatique - Automatische Geschwindigkeitseinstellung - Velocidad automática

Caldo/freddo centralizzata - Central season changeover - Chaud/froid centralisé - Heizen/Kühlen Umschaltung - Cambio Verano / Invierno centralizado

Caldo/freddo automatico (impianto 2 tubi) - Automatic season changeover (2 pipe system) - Chaud/froid automatique (système à 2 tubes) Heizen/Kühlen Umschaltung automatisch (Anlage mit 2 Leitersystem) - Cambio automático Verano / Invierno (sistema de 2 tubos)

Caldo/freddo automatico con zona neutra (imp. 4 tubi) - Automatic season changeover with neutral zone (4 pipe syst.) - Chaud/froid automatique avec zone neutre (syst. à 4 tubes) - Heizen/Kühlen Umschaltung automatisch mit neutralem Bereich (Anlage mit 4 Leiter-System) - Cambio automático Verano/Invierno con zona neutra (sist. de 4 tubos)

### INGRESSI - INPUTS - ENTRÉES - EINGÄNGE - ENTRADAS

Sonda aria remota - Remote air intake sensor - Capteur air à distance - Lufteintrittsfühler - Sonda de aire remota

Sonda acqua - Water sensor - Capteur eau - Wassertemperaturfühler - Sonda de agua

[TC/TC-B] Termostato di consenso - Low temperature thermostat - Thermostat d'autorisation - Freigabethermostat - Termostato de mínima

Contatto finestra - Windows contact - Contact fenêtre - Fensterkontakt - Contacto de ventana

### USCITE - OUTPUTS - SORTIES - AUSGÄNGE - SALIDAS

Valvole On/Off - On/Off valves - Vannes On/Off - Ein-Aus-Ventil - Válvulas On/Off

Valvole 3 punti (PWM) - Floating valves (PWM) - Vannes 3 points (PWM) - 3-Punkt-Ventil (PWM) - Válvulas de 3 puntos (PWM)

Valvole 0-10V - 0-10V proportional valves - Vannes 0-10V - Ventile 0-10 V - Válvulas 0-10V

### FUNZIONI SPECIALI - SPECIAL FUNCTIONS - FONCTION SPÉCIALES - SONDERFUNKTIONEN - FUNCIONES ESPECIALES

Ventilatore termostato - Fan thermostat controlled - Ventilateur thermostaté - Thermostatgesteuerter Ventilator - Ventilador termostático

Comando resistenza elettrica - Electric heater control - Commande résistance électrique - Steuerung Elektroheizregister - Control de resistencia eléctrica

Funzione economy - Economy function - Fonction economy - Economy-Funktion - Función Economy

Funzione solo ventilazione - Fan function - Fonction uniquement ventilation - Nur Ventilatorbetrieb - Función sólo ventilador

Timer giornaliero - Daily timer - Minuterie quotidienne - Tagestimer - Temporizador diario

Funzione antistratificazione - Air recirculation function - Fonction anti-stratification - Funktion zum Schutz gegen Schichtbildung - Función anti-estratificación

Funzione Master/Slave - Master/Slave function - Fonction Master/Slave - Master/Slave Funktion - Función Master/Slave

Ventilatore modulante - Modulating fan - Ventilateur modulant - Modulierender Ventilator - Ventilador modulante

Programmazione settimanale - Weekly timetable - Programmation hebdomadaire - Wochenprogrammierung - Programación semanal

[MODbus] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

[BACnet] Protocollo di comunicazione - Communication protocol - Protocole de communication - Kommunikationsprotokoll - Protocolo de comunicación

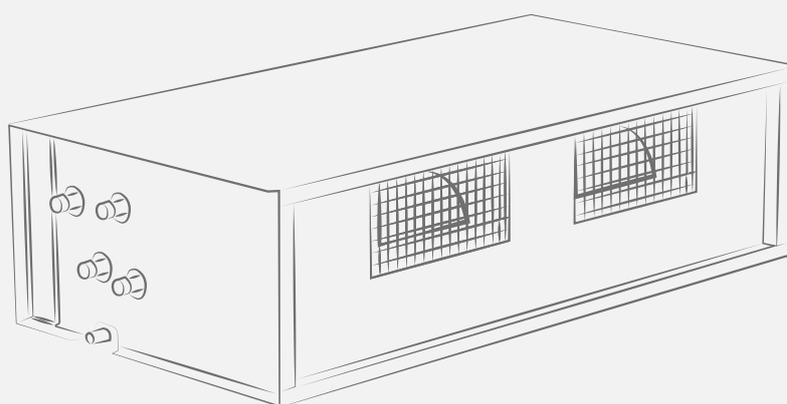

Controllo umidità - Humidity control - Contrôle de l'humidité - Feuchtigkeitsregelung - Control humedad

# EOS

## EOS-ECM

Thin profile  
ductable air treatment unit

A GROUP S.p.A (Trademark EDEN)  
participates in the ECP programme for FCU.  
Check ongoing validity of certificate:  
[www.eurovent-certification.com](http://www.eurovent-certification.com)

# Performance and reliability, with maximum efficiency

 2.4 ÷ 29.6 kW  
cooling

 2.5 ÷ 34.2 kW  
heating

 50%  
energy saving up to 50%

 353 - 6232 m<sup>3</sup>/h  
air flow

#### Structure:

**single paneling version:** made of hot-galvanized sheet Z200 1 mm and 1.5 mm thick (sizes 6-7) insulated with thermo-acoustic mattress class B-s2, d0 with closed cells, 6 mm thick.

**double paneling version:** made of Z200 hot galvanized sheet 1 mm and 1.5 mm thick (sizes 6-7) pre-painted white RAL9010 externally and internally galvanized, sandwich type panels 15 mm thick with mineral wool thermal and acoustic insulation density 35 kg/m<sup>3</sup>.

#### Auxiliary drain pan

made of hot galvanized sheet Z200, 1 mm thick, externally insulated with closed cell thermoacoustic mattress class B-s2, d0, 6 mm thick.

#### Air filter:

always supplied as standard and integrated in the unit, easily removable from the side or from the bottom, regenerable and made of synthetic filter fabric enclosed by a galvanized steel frame and efficiency class G3 \* / EU3 \*\*, 12 mm thick.

Alternatively, a wide range of filters with higher efficiencies are available including G3 \* / EU3 \*\* 25 mm, G4 \* / EU4 \*\* 48 mm or filter with aluminum mesh G1 \* / EU1 \*\* 12 mm. Also available is the innovative electronic filter that allows complete air purification and at the same time ensures high efficiency thanks to minimal pressure drops.

(\* according to EN779 / \*\* according to Eurovent)

#### Fan group

double-inlet centrifugal fans with statically and dynamically balanced horizontally-oriented aluminium impellers. Single-phase asynchronous electric motor with overload cutout. Multi-speed motor (3 of which are connected). The motor is directly coupled to the fans and cushioned with flexible mountings to ensure low noise.

The ECM series is instead equipped with innovative Brushless ECM motors that guarantee precise and modular control of the air flow, limiting the energy supply to the actual workload required, without unnecessary waste.

#### Coils:

coils are made of copper pipe expanded into aluminium fins.

Copper headers with male fittings (GAS threads) and easily accessible air vents.

The water connections are located on the left (looking at the air outlet).

On request, the water connections can be placed on the right side of the unit.

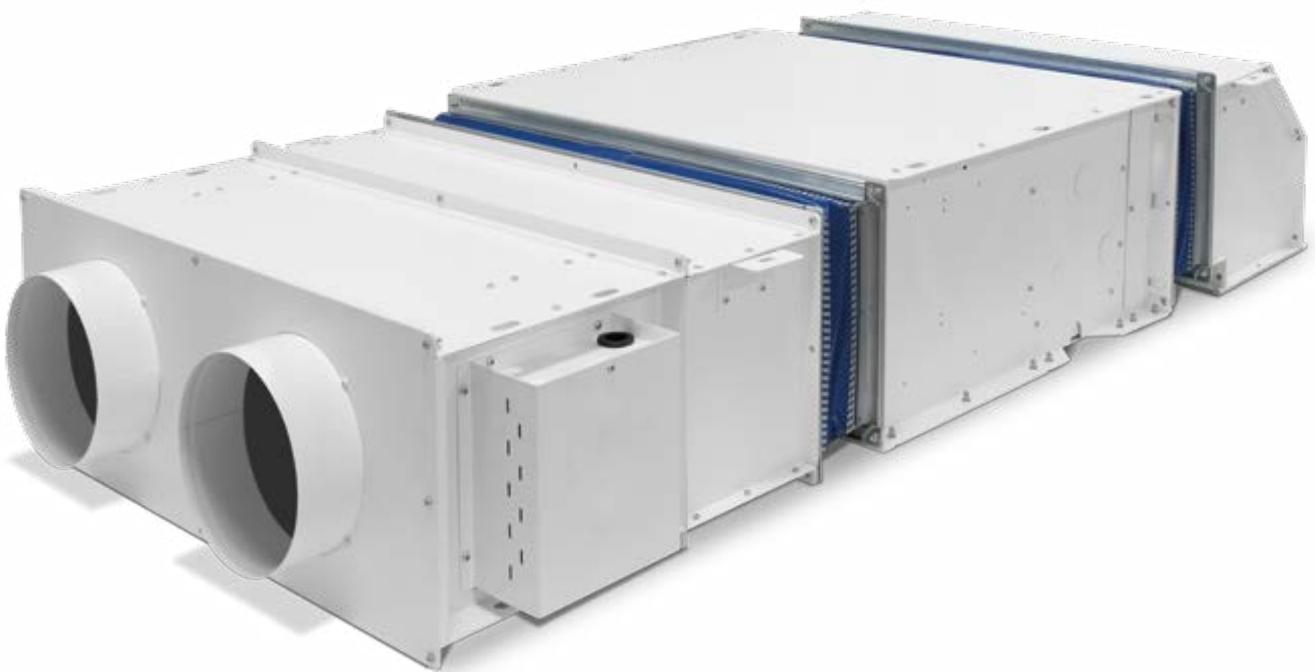

The heat exchanger coil is not suitable for use in corrosive atmospheres.

Thin profile ductable air treatment units are available in 8 versions and 7 sizes.

Units are extremely suitable for small and medium centralized conditioning systems connected by a small ducting network. The thin height of these units, make them the convenient solution for false ceiling installation, to make the best use of space available.

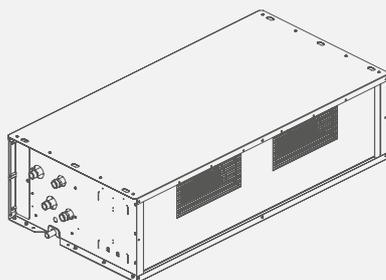

Great attention was also paid to the reduction and simplification of maintenance times, allowing the removal of the filter both from the sides and from the bottom.

Versions	
<b>EOS-H</b>	single skin unit, horizontal installation, asynchronous motor
<b>EOS-H-ECM</b>	single skin unit, horizontal installation, ECM motor
<b>EOS-V</b>	single skin unit, vertical installation, asynchronous motor
<b>EOS-V-ECM</b>	single skin unit, vertical installation, ECM motor
<b>EOS-DS-H</b>	double skin unit, horizontal installation, asynchronous motor
<b>EOS-DS-H-ECM</b>	double skin unit, horizontal installation, ECM motor
<b>EOS-DS-V</b>	double skin unit, vertical installation, asynchronous motor
<b>EOS-DS-ECM</b>	double skin unit, vertical installation, ECM motor

## Independent balancing valve

This type of valve combines two functions in a single valve, keeps the flow rate constant as the system pressure changes and at the same time regulates the flow according to the temperature, allowing perfect balancing of the hydraulic system, ensuring for each fan coil unit the desired water flow even under partial loads.

The adjustment can be performed automatically through the installation of a linear ON / OFF or modulating actuator.

### Main advantages:

- Simplified selection
- Easy installation
- High valve authority which remains constant
- Constant flow rate as the differential pressure changes
- Optimized installation by measuring the set pressure
- Energy efficiency thanks to the low differential pressure required
- Maintenance of the set water flow even at partial loads
- Optimization of pump speed using pressure taps (optional)
- Preset locked by hooking

# Presetting and nomograms

In accordance with the principles of dynamic balancing, presetting allows you to set the maximum flow rate of the valve, i.e. the flow rate which will be kept constant within the differential pressure range of use, with the valve fully open. The presetting affects the minimum differential pressure of use of the valve.

# The new generation filtration system

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

**Clean Life System - EOS**

Available for all 7 models.

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

## A healthy choice, responsible and aware

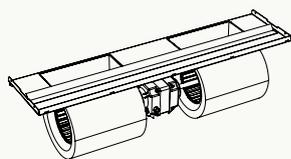

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

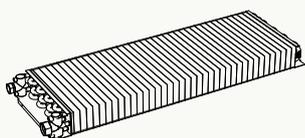

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

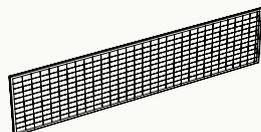

### Fan section:

the version can be equipped with special motor with fail contact  
On demand also motor with particular specifications.

### Coils:

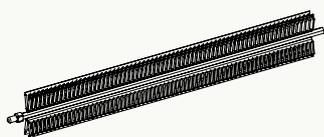

6-row coils for 2-pipe systems, or 2 rows for 4-pipe systems, R410A DX coil.  
On request also special coils made with special materials or treatments for corrosive atmospheres or with technical precautions to be able to operate at special pressures.

### Air filters

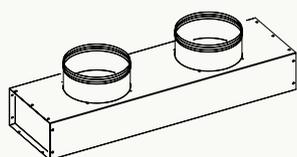

a wide range of optional filters are available with greater efficiencies including G3 \* / EU3 \*\* 25 mm, G4 \* / EU4 \*\* 48 mm or filter with aluminum mesh G1 \* / EU1 \*\* 12 mm.

Also available is the innovative electronic filter that allows complete air purification and at the same time ensures high efficiency thanks to minimal pressure drops.

### Section with electric heaters:

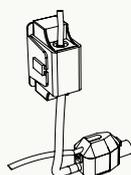

electric heater kit from 4500W a 19200W, equipped with safety thermostat, 400Vac/3Ph+N/50-60Hz.

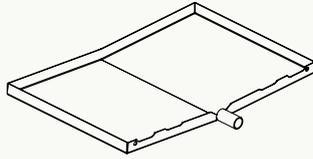

### Plenum:

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.

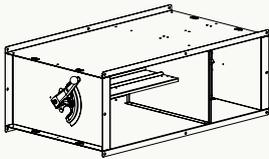

Fully customized plenums can also be made on request.

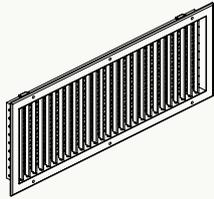

### Auxiliary condensate drain pump

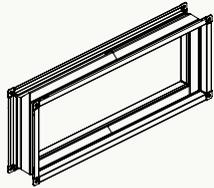

**Auxiliary drain pan**  
hot painted galvanized steel

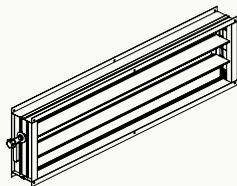

**Air lower section**  
(primary air, max 33%), can also be equipped with servomotor for motorized opening.

**Grills:**  
supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.  
The grills can also be painted on request with the RAL color of your choice.

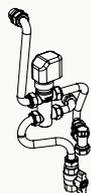

**Antivibrating joint**

**Aluminium damper**

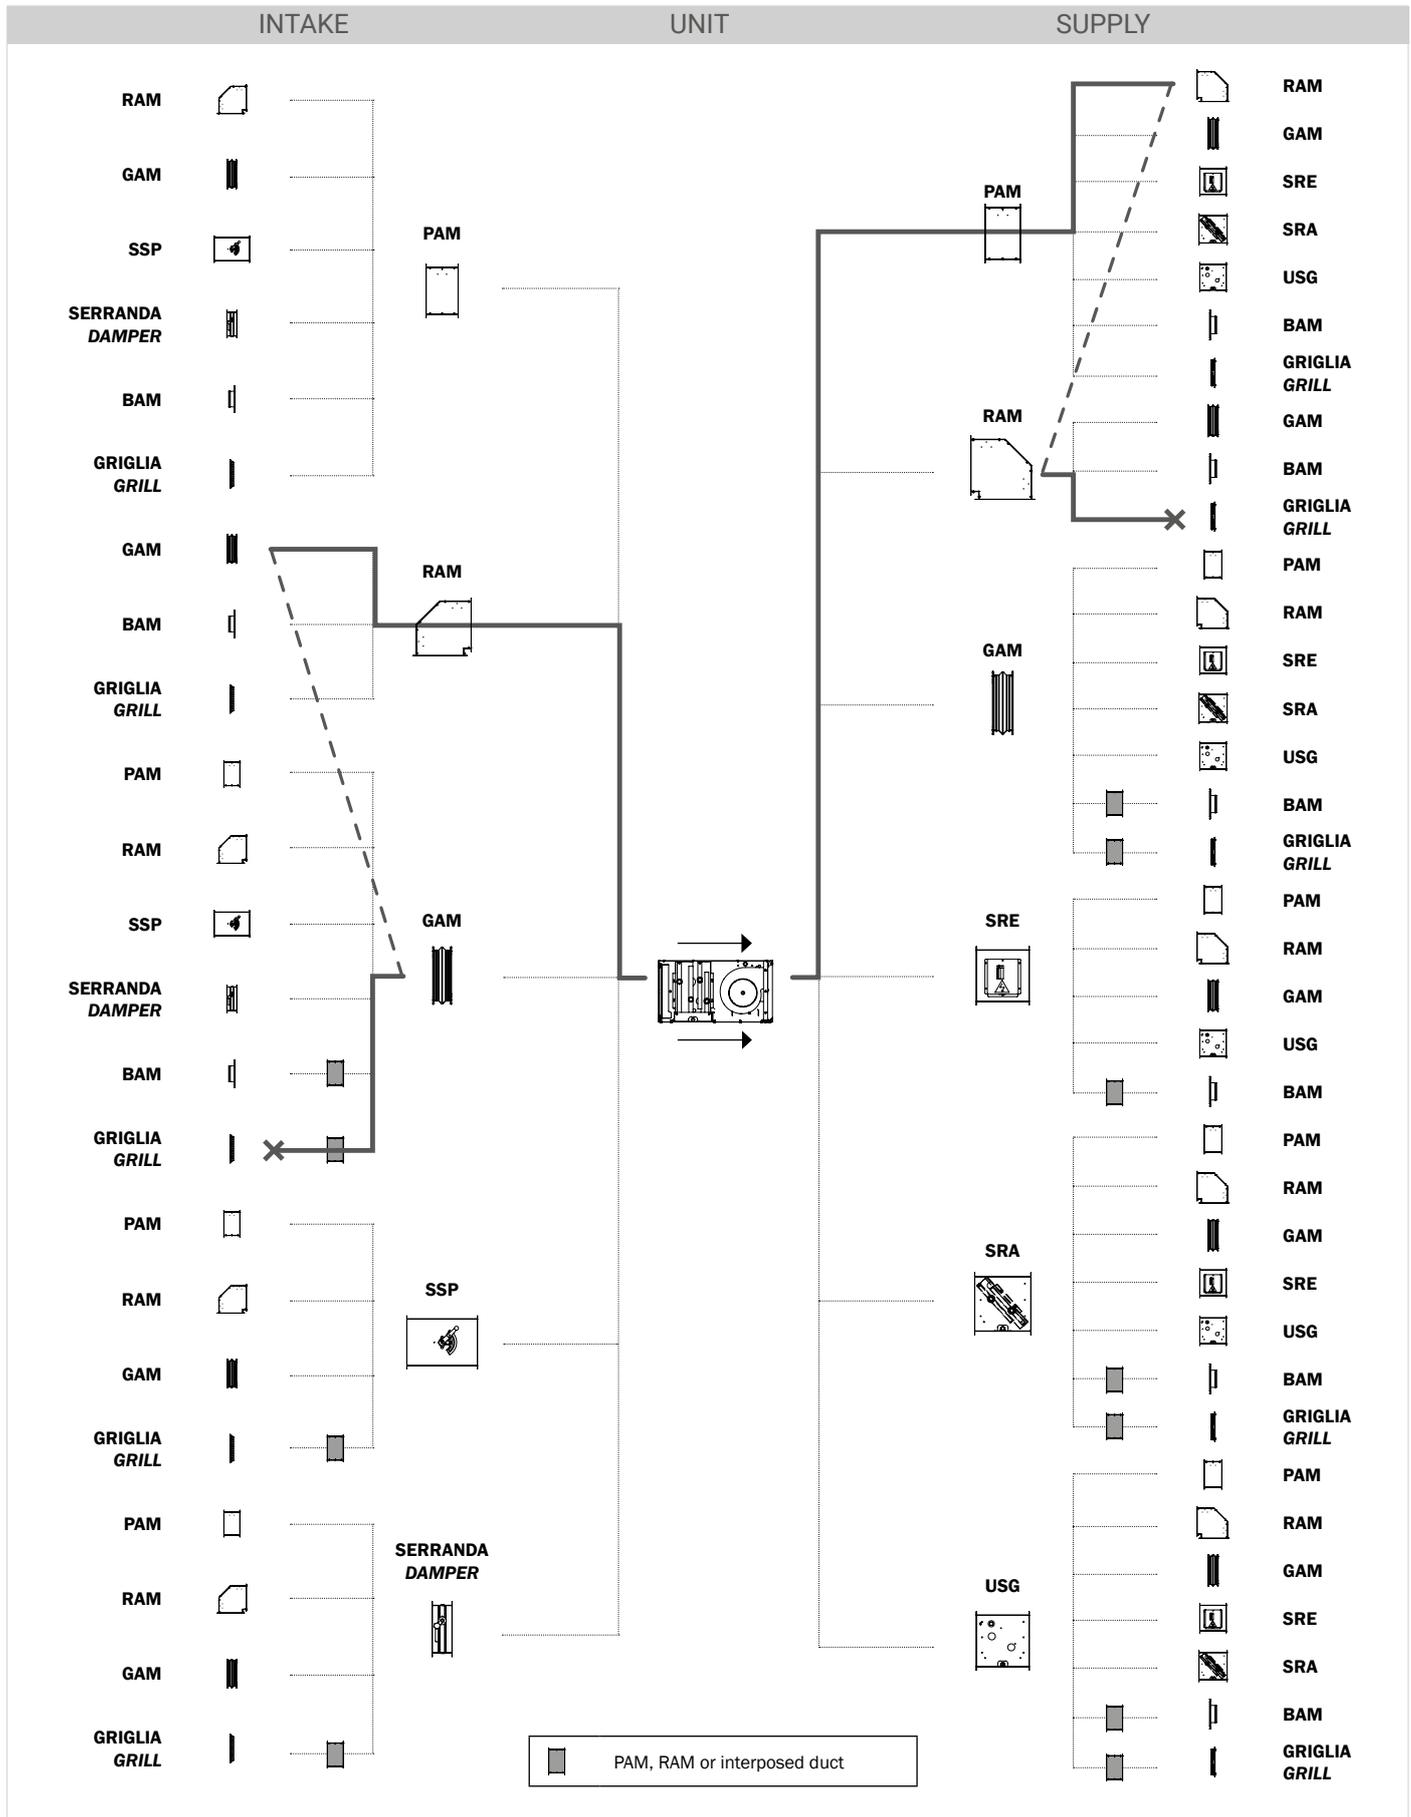

**Control:**  
wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

**Valves:**  
wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

## Construction features

### Structure:

single skin unit, made of Z200 hot-dip galvanized sheet steel 1 mm and 1.5 mm thick (size 60-70) insulated with thermo-acoustic mat class B-s2, d0 with closed cells, 6 mm thick.

### Condensate drain pan

made of Z200 hot-dip galvanized steel sheet of 1 mm thickness, externally insulated with thermo-acoustic mattress with closed cell class B-s2, d0, 6 mm thick.

### Air filter (optional):

air filter section kit always optional and not included, consisting of a renewable filter and metal frame for fixing to the unit.

Wide range of regenerable filters made of synthetic filtering fabric and galvanized steel frame with different efficiency classes including G3 \* / EU3 \*\*, G2 \* / EU2 \*\* with activated carbon, G4 \* / EU4 \*\* or filter with aluminum mesh class G1 \* / EU1 \*\*. The filters are 25 mm thick (size 10÷50) and 48 mm (size 60-70).

Also available the innovative electronic filter that allows a complete purification of the air and at the same time ensures high efficiencies thanks to minimum pressure losses. (\* according to EN779 / \*\* according to Eurovent)

### Fan section:

double inlet centrifugal fans with statically and dynamically balanced aluminum horizontal fans. Single-phase asynchronous electric motor with overload protection. Multiple rotation speeds (3 of which are connected). The motor is directly coupled to the fans and cushioned with elastic supports for the benefit of quietness. The ECM series is instead equipped with innovative Brushless ECM motors that guarantee precise and modular control of the air flow, limiting the energy supply to the actual workload required, without any waste.

### Coils:

copper tube coils with continuous pack aluminum fins clamped on the tubes by mechanical expansion. Copper manifolds equipped with male gas threaded connections and easily accessible air vent valves. Hydraulic connections positioned on the left (looking at the delivery of the unit air), on request they can be supplied on the right. The exchanger is not suitable for use in corrosive atmospheres.

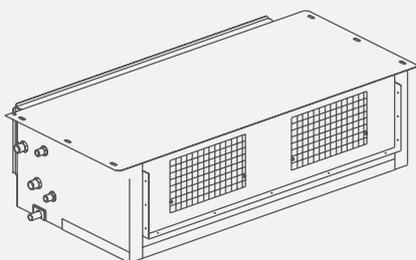

# Flexibility and durability, for every type of need

The ductable air handling units are available in 4 construction versions, 7 power sizes, in the horizontal or vertical version and with air flow rates ranging from 480 to 8,000 m<sup>3</sup> / h, thermal outputs from 2.8 to 56 kW and cooling capacities from 2.5 to 42 kW.

The units are particularly suitable for use in small and medium rooms for civil, commercial or industrial applications. The modularity of the basic components makes the units suitable for typical installation in false ceilings.

## Independent balancing valve

This type of valve combines two functions in a single valve, keeps the flow rate constant as the system pressure changes and at the same time regulates the flow according to the temperature, allowing perfect balancing of the hydraulic system, ensuring for each fan coil unit the desired water flow even under partial loads.

The adjustment can be performed automatically through the installation of a linear ON / OFF or modulating actuator.

### Main advantages:

- Simplified selection
- Easy installation
- High valve authority which remains constant
- Constant flow rate as the differential pressure changes
- Optimized installation by measuring the set pressure
- Energy efficiency thanks to the low differential pressure required
- Maintenance of the set water flow even at partial loads
- Optimization of pump speed using pressure taps (optional)
- Preset locked by hooking

# Presetting and nomograms

In accordance with the principles of dynamic balancing, presetting allows you to set the maximum flow rate of the valve, i.e. the flow rate which will be kept constant within the differential pressure range of use, with the valve fully open. The presetting affects the minimum differential pressure of use of the valve.

# The new generation filtration system

## Clean Life system

*Clean Life System* consists of a two-stage filtration module that can be integrated directly into the series, the fact that the solid particles contained in the air flow are precipitated by the action of an electric field that retains the polluting particles and microorganisms dispersed in the air, such as bacteria, viruses and spores conveyed by such particles.

Through a potential difference generated between the emission and collection electrodes, the pollutants are precipitated, captured and retained by special collection grilles, obtaining healthy and completely purified air.

### Electronic filter version

**Clean Life System - FCC/FCV**

Available for all 7 models.

## Electronic filter

**Clean Life System** ensures that the maximum particulate values, PM10 and PM2.5, remain at acceptable levels in all the internal environments and comply with the requirements of EN 16798:2018 and UNI 11254:2007 to improve **Indoor Air Quality** according to the requisites of the World Health Organization and in accordance with the European and international communities.

This innovative filtering system is managed and controlled through specially developed electronics which, in addition to controlling the operating voltages and the state of efficiency of the filter, gives warning signals of possible malfunctions and failures.

Another fundamental aspect of this system is its cleaning process, which is remarkably simple, economical and easy to implement. The filtering section is fully accessible and optimized to reduce maintenance times and related operating costs.

Once the filter has been removed, the washing cycle needed to regenerate it simply requires water and a biodegradable cleanser. Furthermore, the high-quality components used to build this filtering system guarantee its durability and high reliability over time.

Units equipped with the **Clean Life System** can be installed in diverse environments, from the most sensitive areas, such as medical and healthcare environments requiring total hygiene in the facility, and densely populated areas such as schools, offices, hotels and public places, where it is required to provide occupants with excellent comfort and environmental protection.

# A healthy choice, responsible and aware

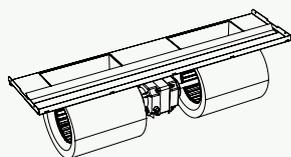

This innovative solution is characterized not only by its high filtration efficiency (comparable to a mechanical F9 class filter) but also by considering the reduction in energy consumption, provided primarily by a significant decrease in pressure drops, which distinguish this filtration system from any other.

**Clean Life System** is a considered choice, in reducing the impact on the environment, an impact that cannot be avoided with the use of common mechanical filters. The latter must be disposed of with significant economic costs as they are classified as toxic waste and are bound by restrictions in the disposal processes, which precludes them being returned in the recycling chain.

The electronic filtering system **Clean Life System** is unequivocally ecofriendly because it can be 100% regenerated by simple cleaning, removing the polluting particles that have been collected in the process.

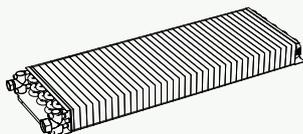

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

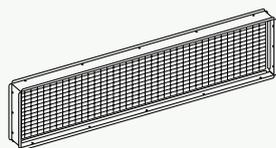

### Fan section:

the version can be equipped also with high performance motor or special motor with fail contact. On demand also motor with particular specifications.

### Coils:

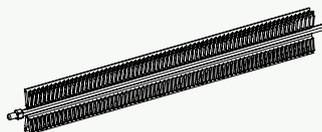

4 or 6-row coils for 2-pipe systems, 1 or 2 rows for 4-pipe systems, R410A DX coil. On request also special coils made with special materials or treatments for corrosive atmospheres or with technical precautions to be able to operate at special pressures.

### Air filter section kit:

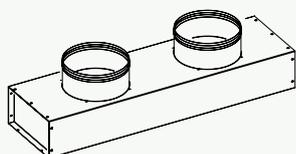

air filter section kit consisting of a regenerable filter and metal frame for fixing to the unit. Wide range of regenerable filters made of synthetic filter fabric and galvanized steel frame with different efficiency classes including G3 \* / EU3 \*\*, G2 \* / EU2 \*\* with activated carbon, G4 \* / EU4 \*\* or filter with aluminum mesh class G1 \* / EU1 \*\*.

The filters are 25 mm (size 10 ÷ 50) and 48 mm (size 60-70) thick. Also available is the innovative electronic filter that allows complete air purification and at the same time ensures high efficiencies thanks to minimal pressure drops. (\* according to EN779 / \*\* according to Eurovent)

### Section with electric heaters:

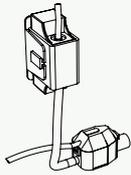

heater kit from 4500W to 18000W, equipped with safety thermostat, 400Vac/3Ph+N/50-60Hz.

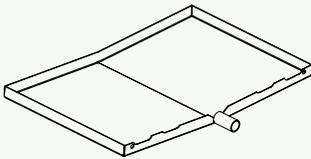

### Plenum:

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.

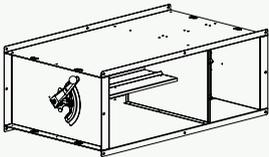

Fully customized plenums can also be made on request.

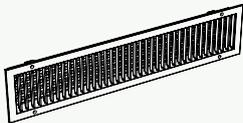

**Auxiliary condensate drain pump**

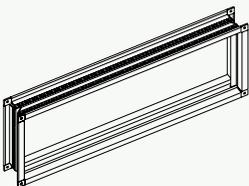

**Auxiliary drain pan**  
hot painted galvanized steel

**Air lower section**  
(primary air, max 33%), can also be equipped with servomotor for motorized opening.

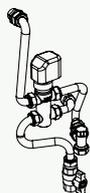

**Grills:**  
supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.  
The grills can also be painted on request with the RAL color of your choice.

**Antivibrating joint**

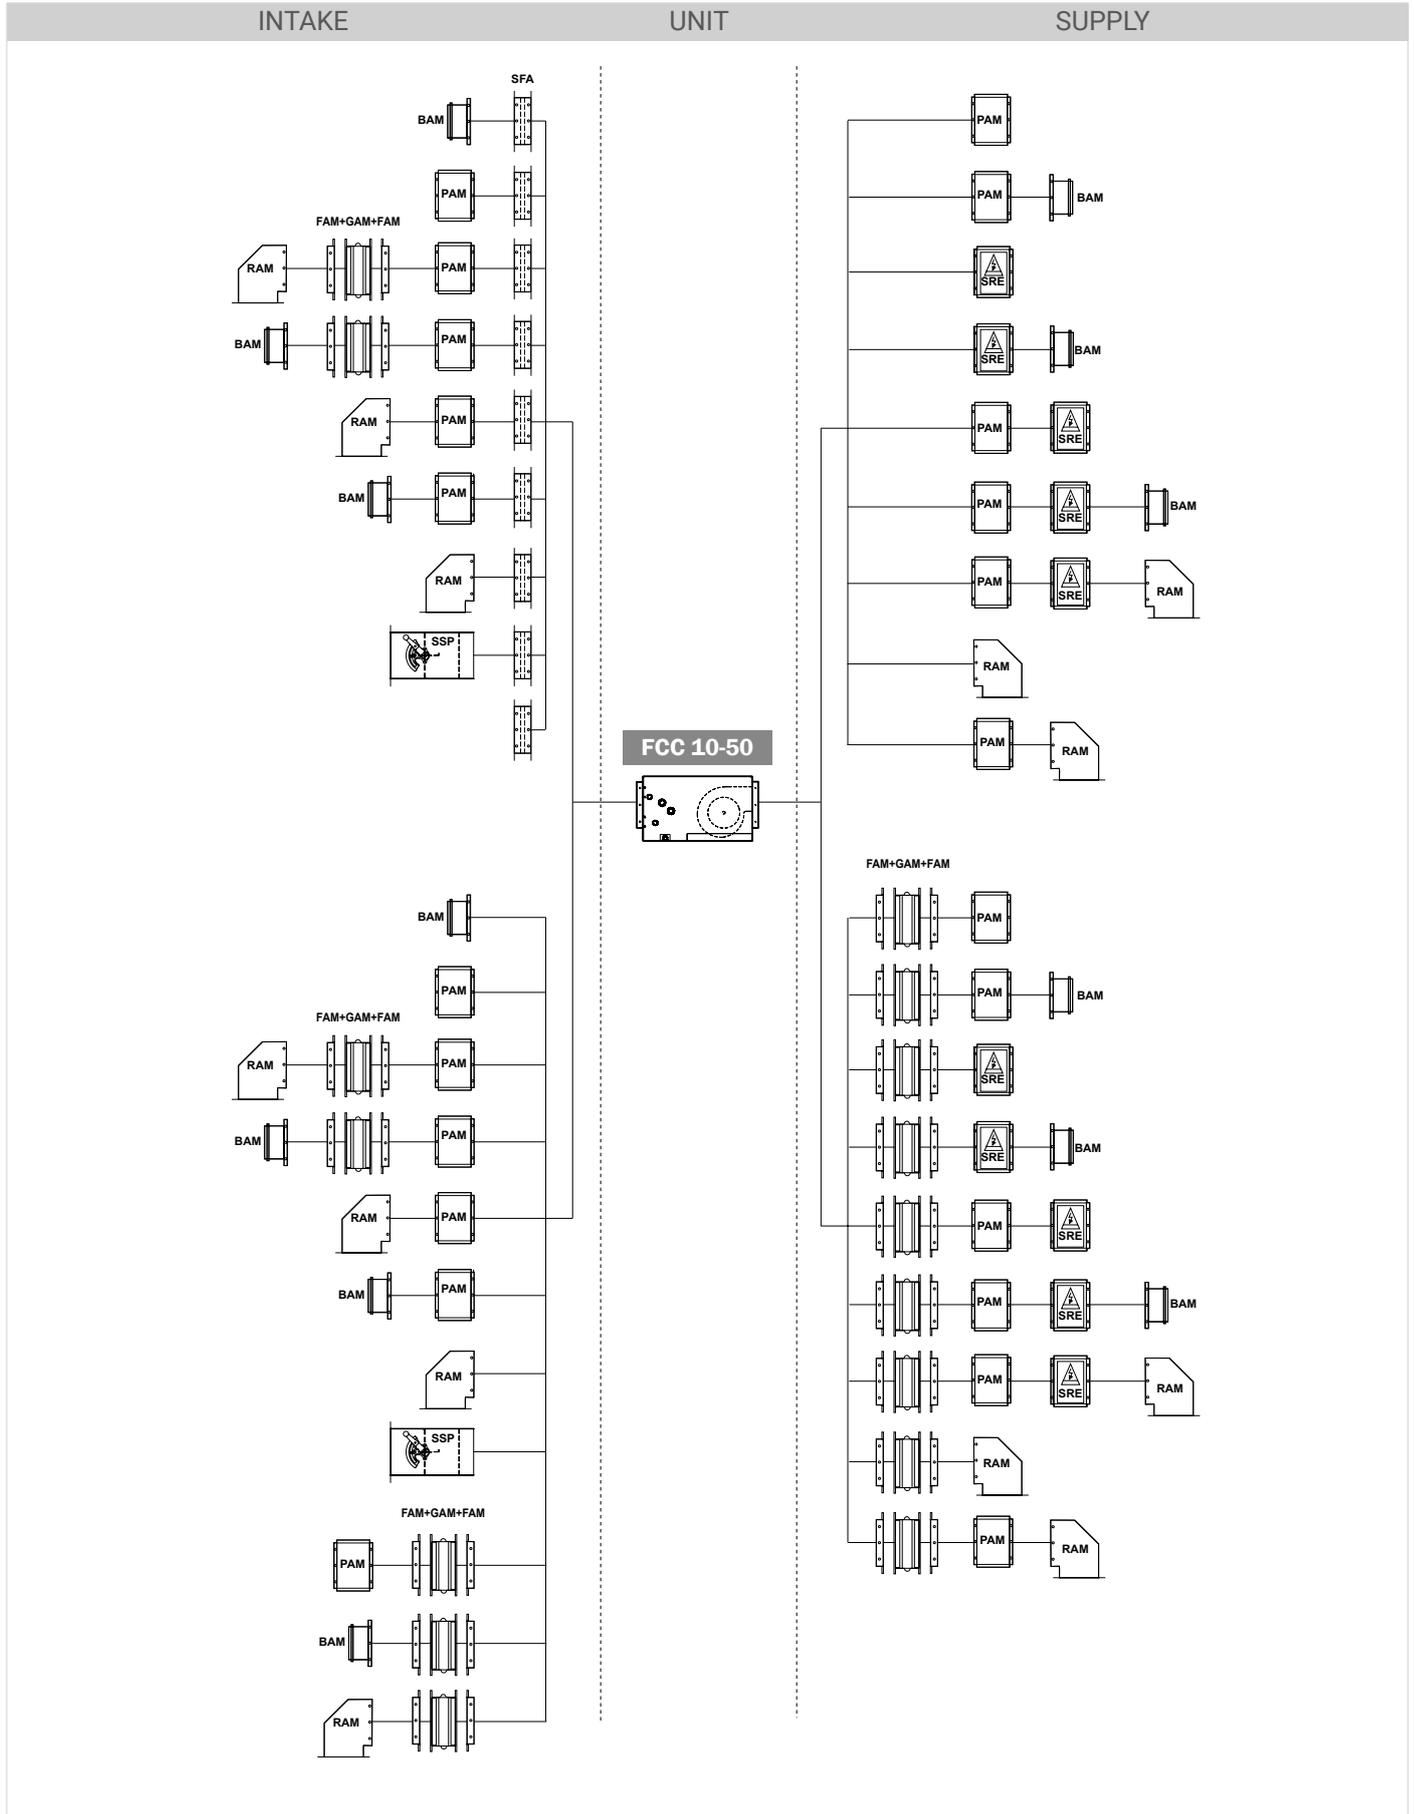

**Control:**  
wide range of control devices and related accessories that allow you to manage the correct room temperature. Multiple solutions available based on the installation type, the required performances and the type of investment.

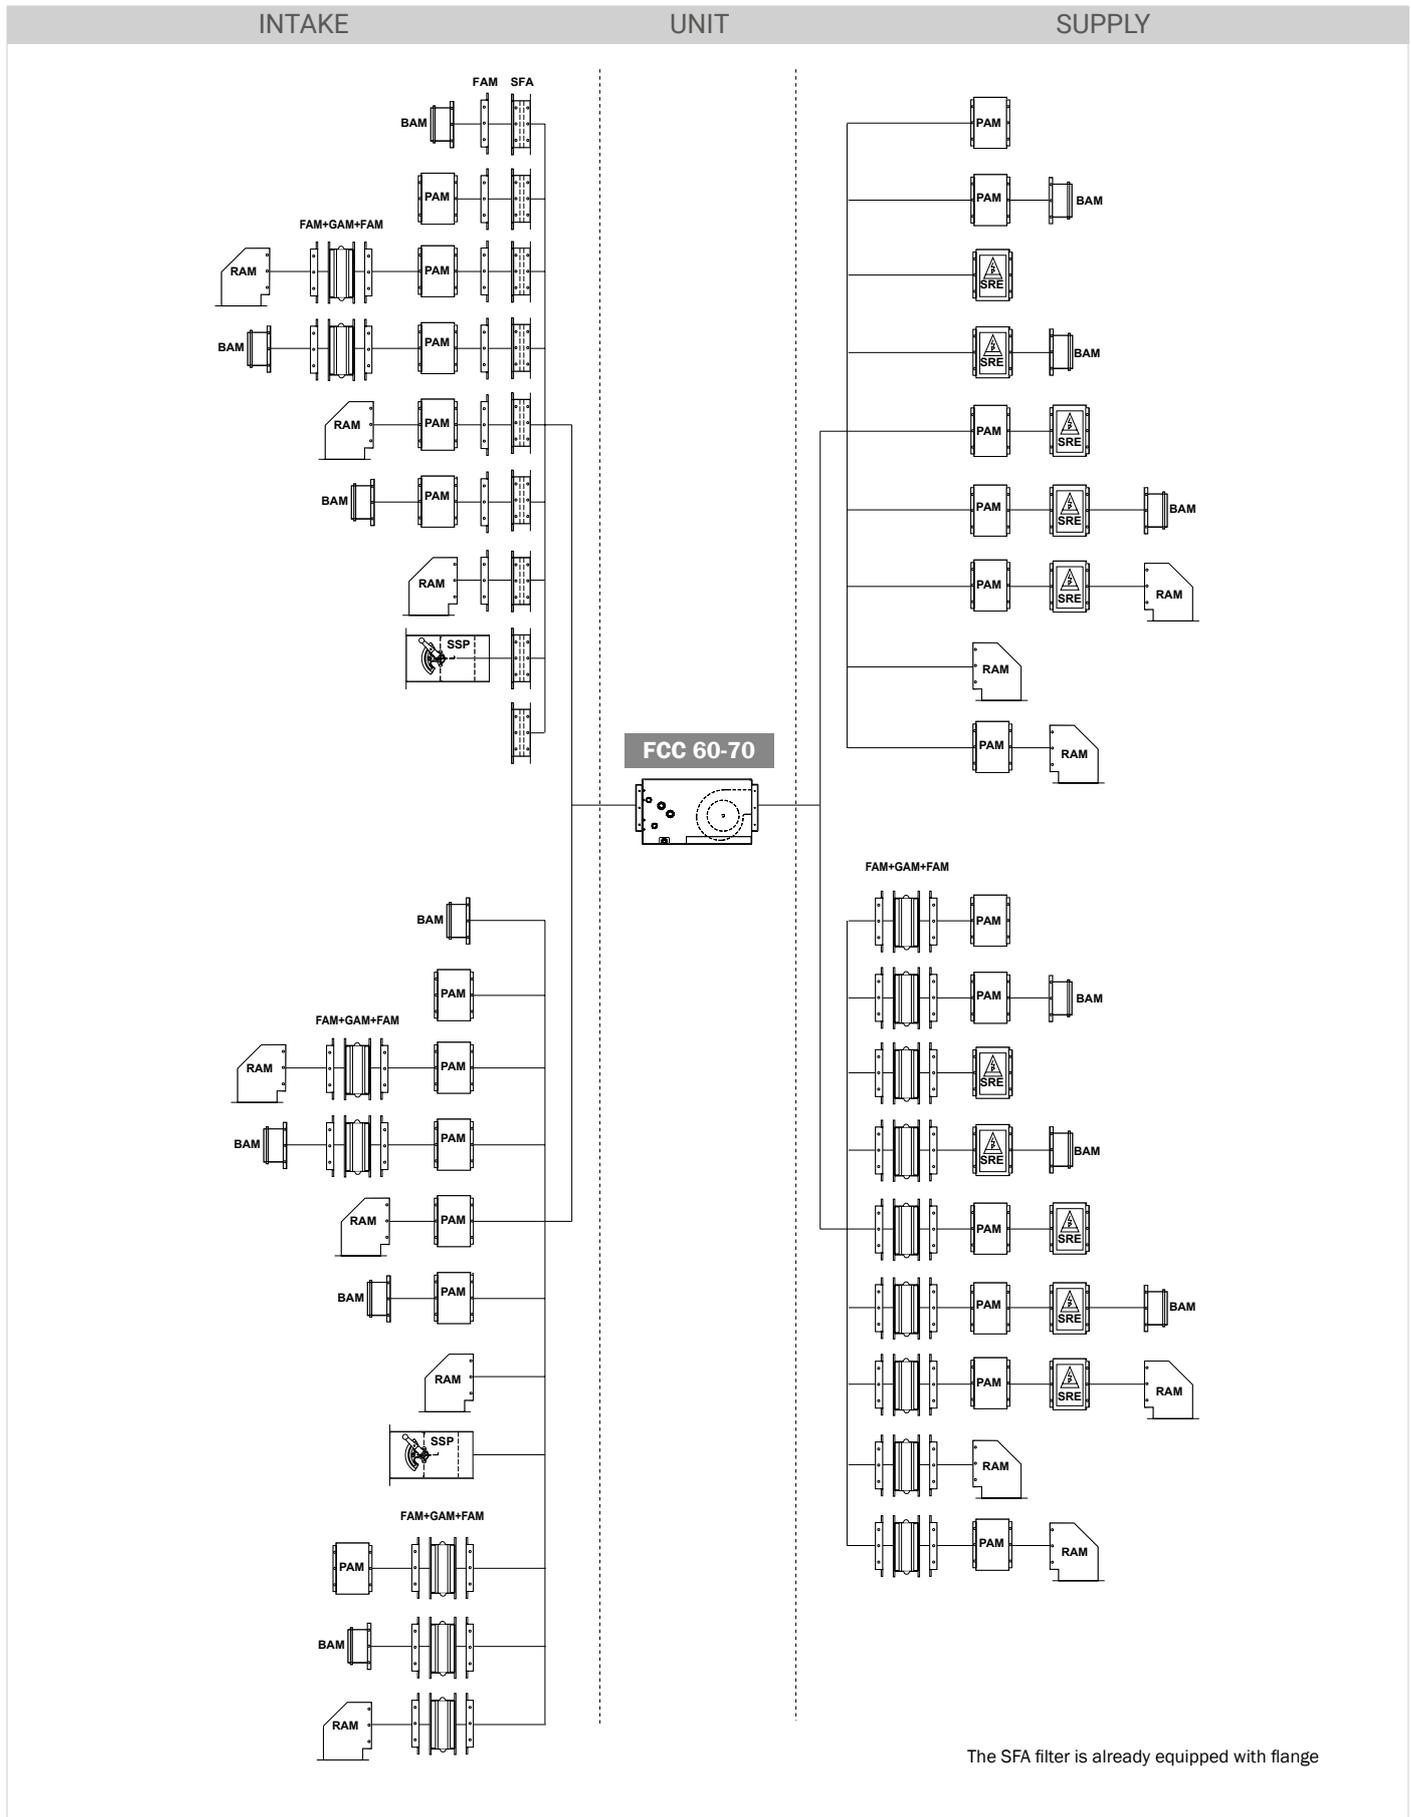

**Valves:**  
wide range of valves, on / off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

# COMBI-ECM

Fan coil unit with integrated recovery unit

COMBI-ECM

# New concept of comfort and efficiency

 **2.6 ÷ 4.7** kW  
cooling

 **2.2 ÷ 4.6** kW  
heating

 **300 - 700** m<sup>3</sup>/h  
air flow

 **83 - 88** %  
thermal efficiency

COMBI-ECM

### Structure:

galvanized or painted sheet (optional) thickness 10/10, insulated in all parts in indirect contact with the heat transfer fluid. Condensate drain pan in galvanized insulated sheet, complete with connections for condensate drainage.

Pre-drilled sides for practical attachment of accessories.

Wall anchoring slots for easy fixing and leveling of the appliance. Wide range of accessories available as plenum with bayonet connection and circular fittings.

The unit is supplied as standard with hydraulic connections on the left and terminal block on the right.

### Recovery unit:

static high-efficiency polystyrene recuperator, complete with By-pass system.

### Air filter:

filtration system composed by air filters class F7\*/EU7\*\* for primary air, M5\*/EU5\*\* for the recirculation airflow, and G2 \* / EU2 \*\* for expulsion air to safeguard the recuperator. (\* according to EN779 / \*\* according to Eurovent)

### Fan section:

double-inlet centrifugal fans type ECM brushless with statically and dynamically balanced horizontally-oriented aluminium impellers, directly coupled to the fans and cushioned with flexible mountings to ensure low noise. Thermal recovery part equipped with two ECM plug-fan type, as a guarantee of an excellent reduction of energy.

### Coils:

copper tube coil with aluminum fins with continuous pack blocked on the tubes by mechanical expansion. Brass manifolds equipped with  $\varnothing 1/2'' \sim 3/4''$  female gas connections and easily accessible air vent valves. Hydraulic connections positioned on the left (front view) on request can be supplied on the right. The coils are reversible, so the connection side can also be reversed on site. The heat exchange coil is not suitable for use in corrosive atmospheres.

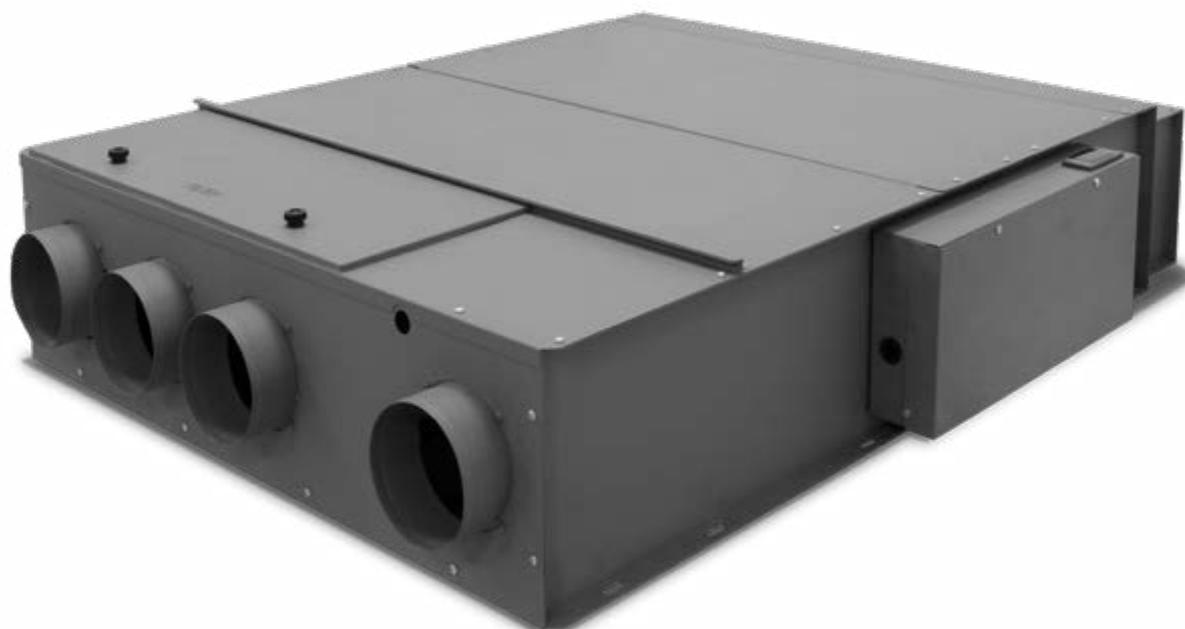

With the advent of avant-garde building technologies, the newly designed housing units are increasingly thermally insulated with direct consequence of limited thermal loads needed to achieve the desired comfort. At the same time, thanks to the absence of dispersions, constant regeneration of the air through a controlled mechanical ventilation system is essential to guarantee the appropriate air quality in the environments.

Nowadays moreover, the use of living spaces reflects new frenetic and unpredictable lifestyles. A flexible system is therefore a winning choice, allowing optimal management of environmental comfort based on real needs, with extremely rapid response times, without any waste.

The ideal solution to meet all these needs in a simple, practical and economical way is the newly developed COMBI-ECM unit, which in just 238 mm thick encloses a high-efficiency air conditioning system that can heat, cool (with relative dehumidification), filter and renew the air with integrated recovery, also through the free-cooling and free-heating functions. All this through a single extremely compact unit, able to completely replace traditional systems in residential / commercial environments with surfaces up to about 120 square meters.

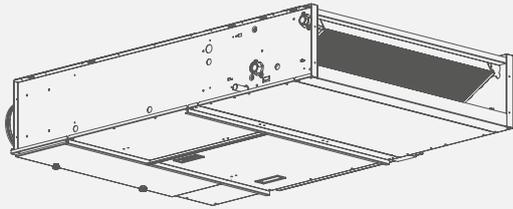

The range consists of 2 models of 300 m<sup>3</sup>/h o 700 m<sup>3</sup>/h, in 2 configurations, horizontal and vertical, with thermal outputs from 2,2 a 4,6 kW and cooling capacities from 2,6 a 4,7 kW.

Versions	
COMBI-ECM 300-H	300 m <sup>3</sup> /h for horizontal installation
COMBI-ECM 300-V	300 m <sup>3</sup> /h for vertical installation
COMBI-ECM 700-H	700 m <sup>3</sup> /h for horizontal installation
COMBI-ECM 700-V	700 m <sup>3</sup> /h for vertical installation

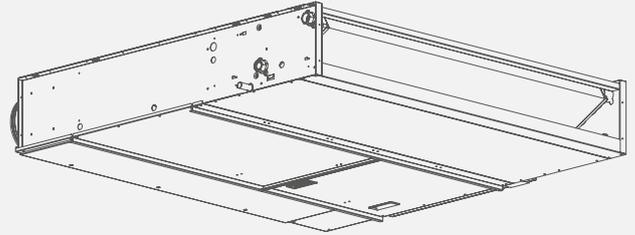

COMBI-ECM

300 - H

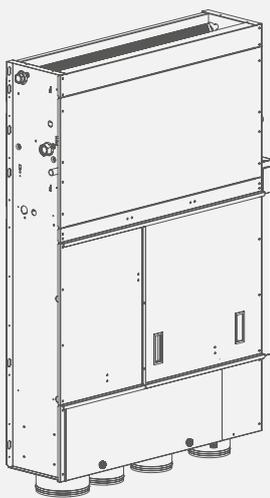

Nominal airflow 300 m<sup>3</sup>/h  
Recovery airflow 80-150 m<sup>3</sup>/h  
Horizontal installation

700 - H

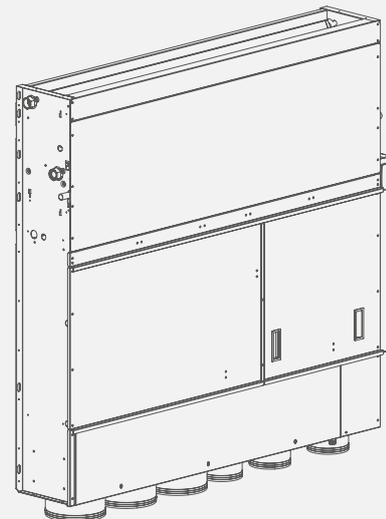

Nominal airflow 700 m<sup>3</sup>/h  
Recovery airflow 80-150 m<sup>3</sup>/h  
Horizontal installation

300 - V

Nominal airflow 300 m<sup>3</sup>/h  
Recovery airflow 80-150 m<sup>3</sup>/h  
Vertical installation

700 - V

Nominal airflow 700 m<sup>3</sup>/h  
Recovery airflow 80-150 m<sup>3</sup>/h  
Vertical installation

## i-Plus

On-board unit interface

Interface for wall installation

The i-Plus controller has been developed specifically for controlling the COMBI unit to automate all its functionality and offer a perfect control of comfort conditions.

i-Plus manages both room temperature control and ambient air quality control.

The user sets the desired temperature value and i-Plus performs the operations automatically by processing the temperature and air quality probes (or humidity) and acting suitably on the air handling unit, renewal, free cooling/free heating damper, water intake valve.

However, if you prefer, you can manually define engine rotation speeds.

i-Plus integrates the chronothermostat function (time scheduler) and the possibility of remote on-off and remote change season.

i-Plus can be connected via MODbus protocol to a centralized system to be remotely programmed and supervised. You can connect to the i-Plus controller the remote keyboard to position it where the user prefers.

Power supply 12/24 Vac; 50/60Hz through transformer.

## i-Eco

The i-Eco controller includes a programmable electronic thermostat model i-30 with LCD display able to manage the air-treatment unit (fan coil unit).

N.B. if used with 24 Vac valves, the thermostat must be powered through a 230/24 Vac transformer.

# ECM motors, not only as a savings guarantee

The COMBI system is equipped with brushless ECM motors of the latest generation, as a guarantee of a perfect combination of high performance, excellent reduction of energy consumption and low ambient noise emission.

Fundamental plus of these innovative fan groups is the capacity to modulate in a precise and constant way the air flow based on actual working loads required for the benefit of a reduction of consumption, absence of unnecessary waste and greater psychological and physical comfort in an environment guaranteed by greater management sensitivity and low noise thanks to the intelligent management of air flow.

The diagram shows the comparison between the absorption of asynchronous centrifugal motor and brushless centrifugal ECM motor with the same air flow.

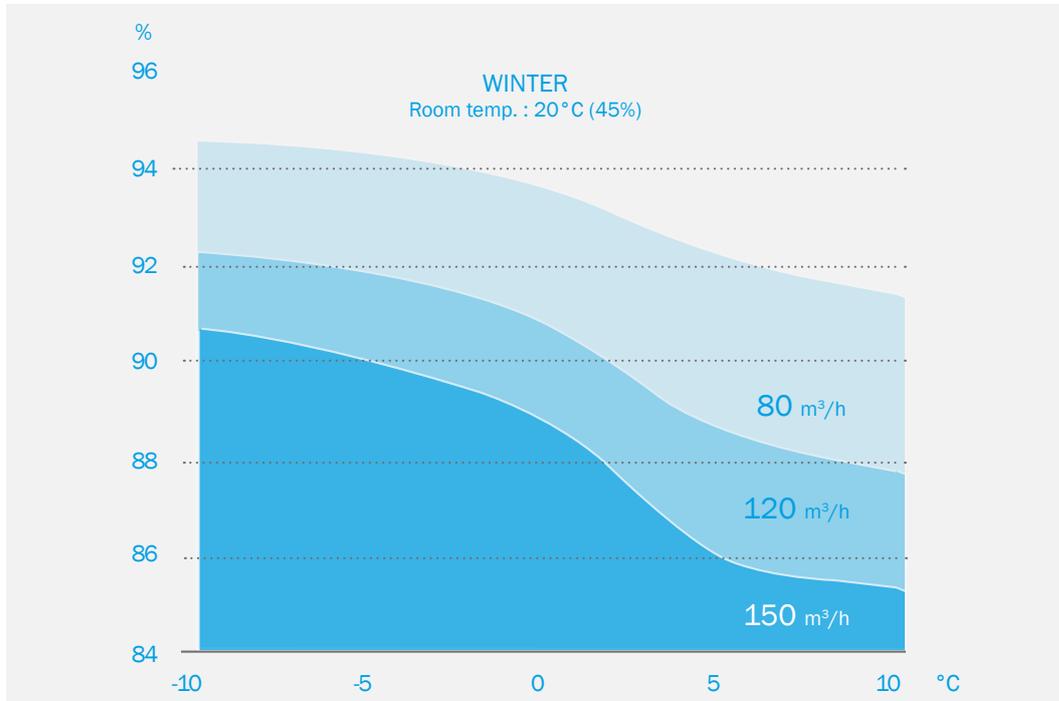

■ Asynchronous motor ■ ECM motor

# Heat recovery efficiency

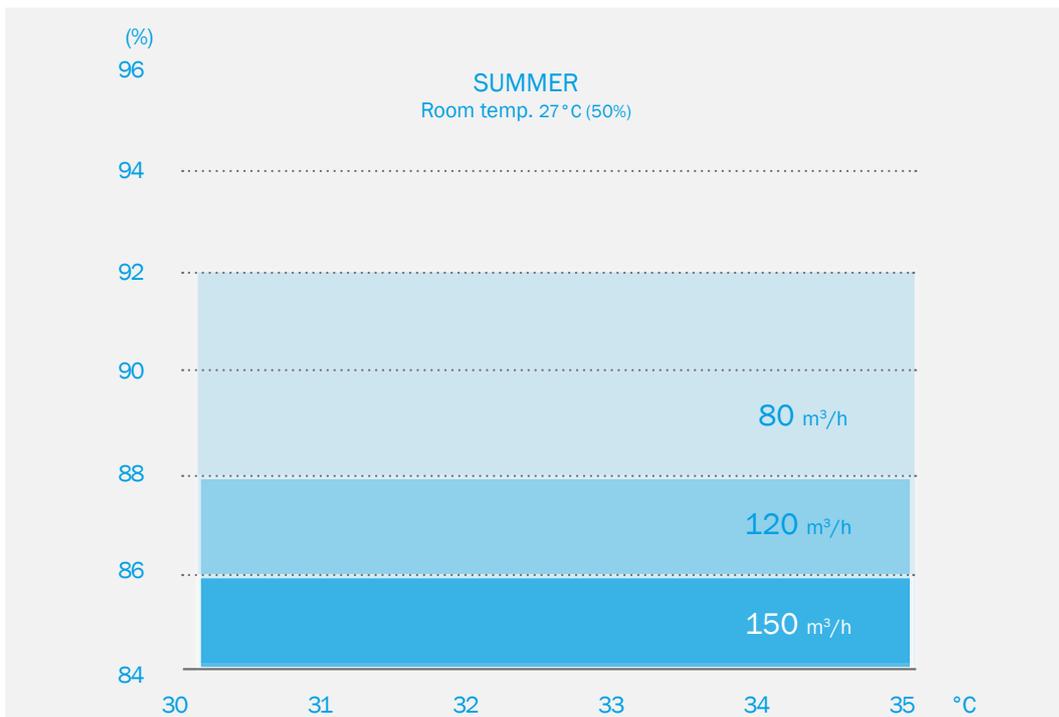

## WINTER

Representation of the degree of efficiency of the plate heat exchanger, with external temperatures between -10 °C and +10 °C; relative humidity of 70%.

## SUMMER

Representation of the degree of efficiency of the plate heat exchanger, with external temperatures between 30°C and 35°C; relative humidity of 50%.

Note: for temperatures below 0°C is important to use a defrosting system, managed by the control unit.

## Cooling mode

### 1 RECIRCULATION AIR INLET

The air is drawn from rooms less predisposed to generate stale air like living room and/or bedroom and, after a suitable filtration, is allowed to flow to the part used for the treatment

### 2 STALE AIR INLET

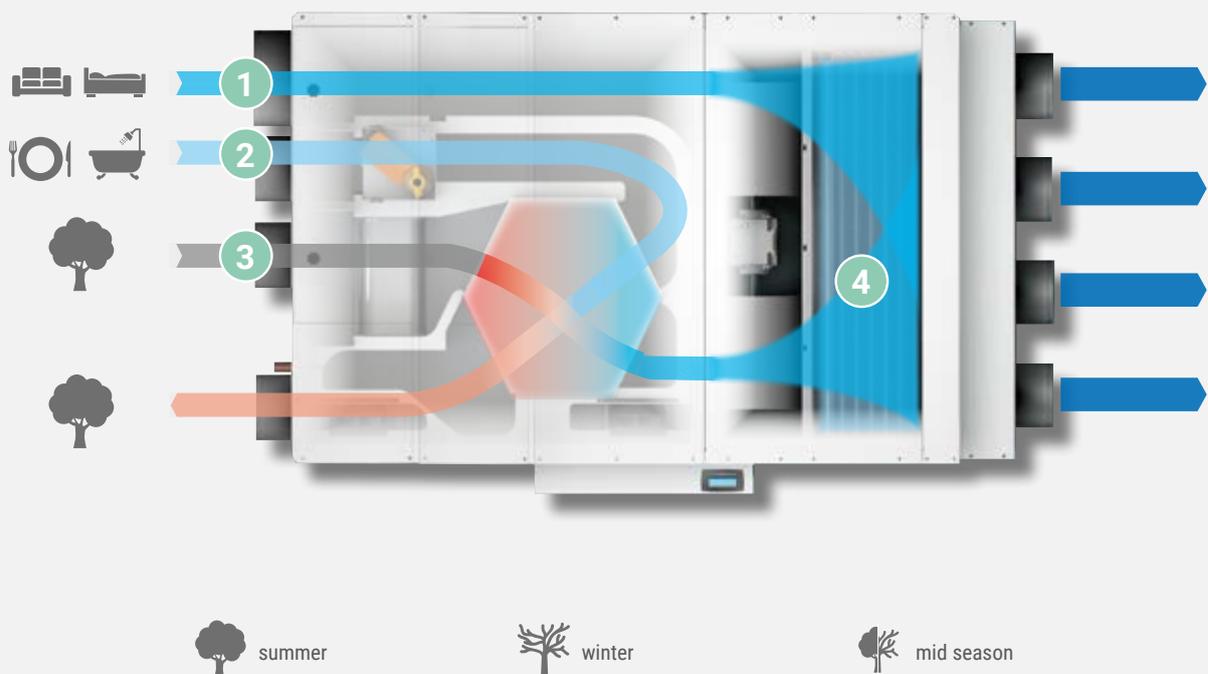

The stale air, usually taken from the kitchens and bathrooms, before being ejected is made to flow through the plate heat exchanger to recover up to 92% of the thermal energy that otherwise would be unnecessarily wasted.

### 3 EXTERNAL AIR INLET

The hot and moist air, taken from the outside and used for the renewal is inserted into the unit and, after a suitable filtration to remove contaminants, is conveyed through the heat recovery assimilating up to 92% of the thermal energy transferred from the outgoing cold stale air, and then flow to the part used for the treatment. If the external conditions are in line with the required internal load, the primary air through the By-pass function that is automatically activated with the dedicated control, will be entered directly into the room after a suitable filtration.

### 4 TREATMENT

The air mix thus obtained, composed partly of recirculated air and partly by pre-treated new fresh air, it is now cooled by the coil according to the exact requirements of comfort selected by the user, before to be re-entered in the environments through dedicated multiplexed distribution network

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

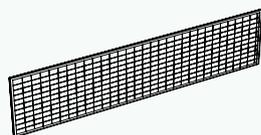

### Fan section:

In addition to the asynchronous motor, the series can also be supplied with high head motors or motors equipped with thermal protection (fail contact).  
On request also motors with special requirements.

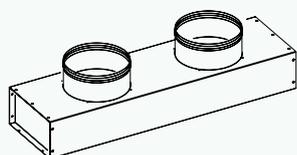

### Coil:

4-row coils for 2-pipe systems, 1-row for 4-pipe systems or R410A DX coil.

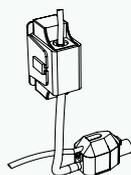

### Filters:

for the air treatment part, as an alternative to the filter supplied as standard with efficiency G1 \* / EU1 \*\*, class G2 \* / EU2 \*\* filters or specific filters can be supplied on request. (\* according to EN779 / \*\* according to Eurovent)

### Plenum:

wide range of plenums, ducts, return / supply vents and flexible connection for every installation requirement.  
Fully customized plenums can also be made on request.

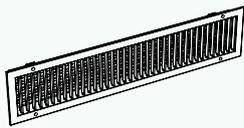

### Auxiliary condensate drain pump

**Auxiliary drain pan**

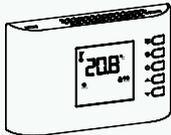

for horizontal or vertical unit

**Grills:**

supply or intake grills adjustable or fixed type made of anodized aluminium, also in the version already complete with integrated filter.

The grills can also be painted on request with the RAL color of your choice.

**Control:**

wide range of control devices also with dedicated microprocessor, and related accessories that allow you to manage the correct room temperature.

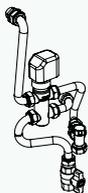

Multiple solutions available based on the installation type, the required performances and the type of investment.

**Control accessories:**

CO<sub>2</sub> sensor, VoC sensor, water low temperature sensor, antifreeze sensor, humidity sensor.

Where possible, they can also be supplied already installed and tested on the machine.

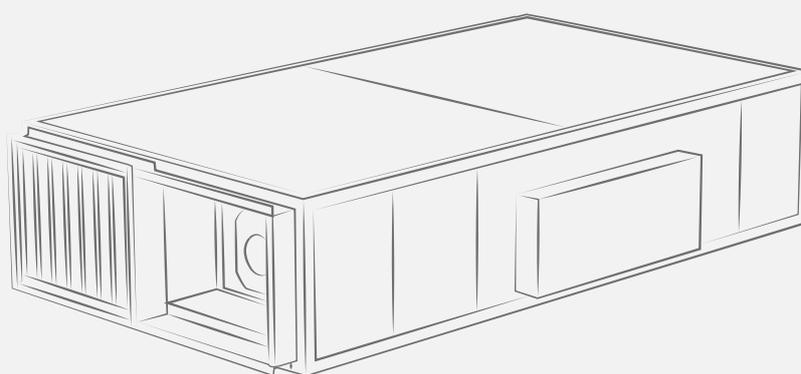

**Valves:**

wide range of valves, on/off, modulating, floating, two and three ways, which can be supplied already installed and tested or supplied pre-assembled but loose. Also available are the innovative dynamic balancing valves that guarantee effective flow stabilization by controlling the differential pressure, ensuring a constant flow capable of reducing operating costs and higher system efficiency.

# FLOW-SHE/HHE

 **78 - 90** %  
thermal efficiency

FLOW-SHE/HHE  
FLOW-SHE/HHE-ECM

### Structure:

structure made of pre-painted sheet metal with sandwich-type removable panels of average thickness 23mm, with thermo-acoustic insulation in injected polyurethane with a density of 45 kg/m<sup>3</sup>.

### Heat exchanger:

Air-to-air heat recovery unit in aluminum, static type with countercurrent flows with a close pitch with achievable performances up to over 90%.

The recuperator is removable from below for the model size 1, and laterally for all other sizes.

### Air filter:

Standard air filters with efficiency ISO 16890 and PM1 55% (F7 EN 779) in supply and PM10 55% (M5 EN 779) in recovery, laterally removable. These filters use a composite polypropylene medium designed for use in systems with high air volumes, reduced installation spaces and limited load losses.

### Fan section:

Fresh air inlet and exhaust fans of centrifugal type with double intake with forward blades with directly coupled motor, designed to optimize the air flow through the internal components minimizing noise.

The ECM versions are equipped with innovative high-efficiency brushless motors.

### Condensate drain pan:

Made of galvanized steel plate with water drain connection downwards.

### Differential pressure switches:

Fresh air filter pressure switch with visual warning of dirty filter alarm supplied, also available on request an additional pressure switch on the expulsion side.

### By-pass free cooling:

The unit is equipped with a partial by-pass of the recuperator for defrosting or free cooling, with a manual opening system (supplied with standard) or an automatic servo control (optional). The automatic version can be controlled by an external consent or even by an integrated electronic management.

### Installation:

The range is suitable for horizontal installation with application in false ceilings or similar. Depending on the configuration of the distribution network and the space available, it will be possible to choose between two possible orientations named A or B.

The FLOW-SHE/HHE series of heat exchanger has been developed in order to guarantee a comfortable and healthy environment aiming for maximum efficiency, ensuring a high energy saving and relative reduction in operating costs.

The range consists of 6 sizes for the SHE / HHE series equipped with asynchronous motors and 8 sizes for the SHE / HHE-ECM series equipped with innovative brushless motors. The units are suitable for horizontal installation, with an air flow range from 320 a 4700 m<sup>3</sup>/h and recovery efficiencies up to over 90%.

The wide range of capacities and configurations allows to satisfy multiple application requirements for different areas ranging from residential to industrial area.

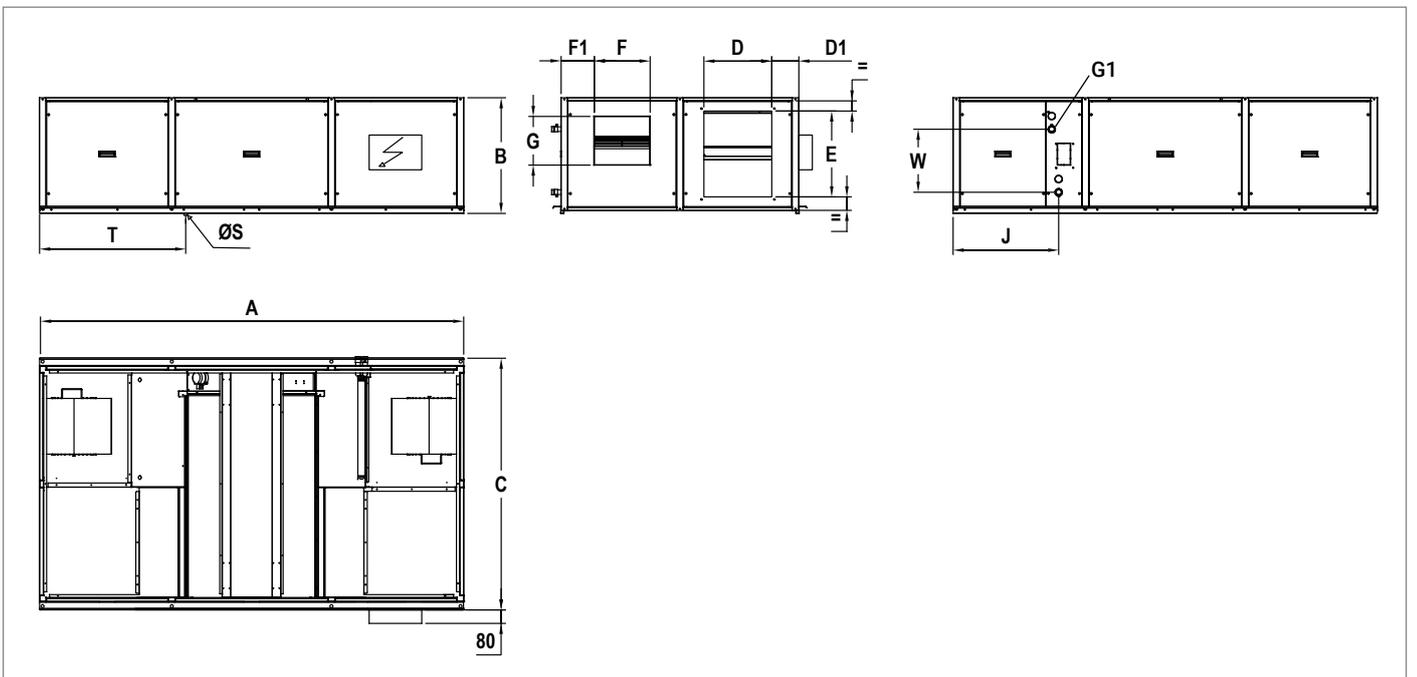

These series of heat exchanger have been suitably sized to comply with the requirements of the European Ecodesign Directive (EU Regulation 1253/14).

<b>a (m<sup>3</sup>/h)</b>	Portata aria / Air flow / Débit d'air / Luftstrom / Caudal de aire
	Pressione statica utile / External static pressure / Pression statique utile / Externer statischer Druck / Presión estática útil
<b>b (Pa)</b>	Pressione statica utile / External static pressure / Pression statique utile / Externer statischer Druck / Presión estática útil
	Corrente assorbita max / Max absorbed current / Courant absorbé max / Maximale Stromaufnahme / Corriente absorbida máx
<b>c (A)</b>	Corrente assorbita / Absorbed current / Courant absorbé / Stromaufnahme / Corriente absorbida

- Le curve indicano la pressione statica utile alle varie portate. Le curve tengono conto delle perdite di carico del recuperatore di calore e dei filtri standard.  
 In presenza di altri accessori (es. batterie, silenziatori, ecc.), per ottenere la pressione statica utile effettiva bisogna sottrarre le perdite dovute ad altri componenti installati.  
 - The curves indicate the static pressure useful for the various flow rates. The curves take into account the pressure drops of the heat recovery unit and standard filters.  
 In the presence of other accessories (e.g. coils, silencers, etc.), in order to obtain the effective useful static pressure, the losses due to other installed components must be subtracted.  
 - Die Kurven geben den externen statischen Druck der verschiedenen Durchflussraten an. Die Kurven berücksichtigen den Druckabfall des Wärmerückgewinners und der Standardfilter.  
 Bei Vorhandensein von anderem Zubehör (z.B. Batterien, Schalldämpfer usw.) müssen die Verluste durch andere eingebaute Komponenten abgezogen werden, um den tatsächlichen externen statischen Druck zu erhalten.  
 - Las curvas indican la presión estática útil a los distintos caudales. Las curvas tienen en cuenta las caídas de presión del intercambiador de calor y los filtros estándar.  
 En presencia de otros accesorios (p. Ej. Baterías, silenciadores, etc.), para obtener la presión estática útil efectiva, es necesario restar las pérdidas debidas a otros componentes instalados.

## Main accessories

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately.

For the complete list of available accessories, please refer to the price-list catalog.

---

**Internal electric post-heating coil**

---

**Post-heating internal water coil**

---

**Water cooling or heating coil section**

---

**DX coil section**

---

**High efficiency filters on exhaust air**

---

**High efficiency post-filtration**

---

**Regulation damper**

---

**3 dampers defrosting section**

---

**Damper actuators**

---

**Kit bypass management**

---

**N° 4 connections for circular ducts kit**

---

**Duct silencers**

---

**Additional pressure switch**

---

**Anti-freeze thermostat**

---

**Kit 2-Way valve with on-off actuator**

---

**Kit 3-Way valve with modulating actuator**

---

**Unit speed control panel**

---

**Integrated management system on board**

---

**Integrated management system wall mount box**

---

**CO<sub>2</sub> sensor and humidity sensor**

---

**Kit for external installation**

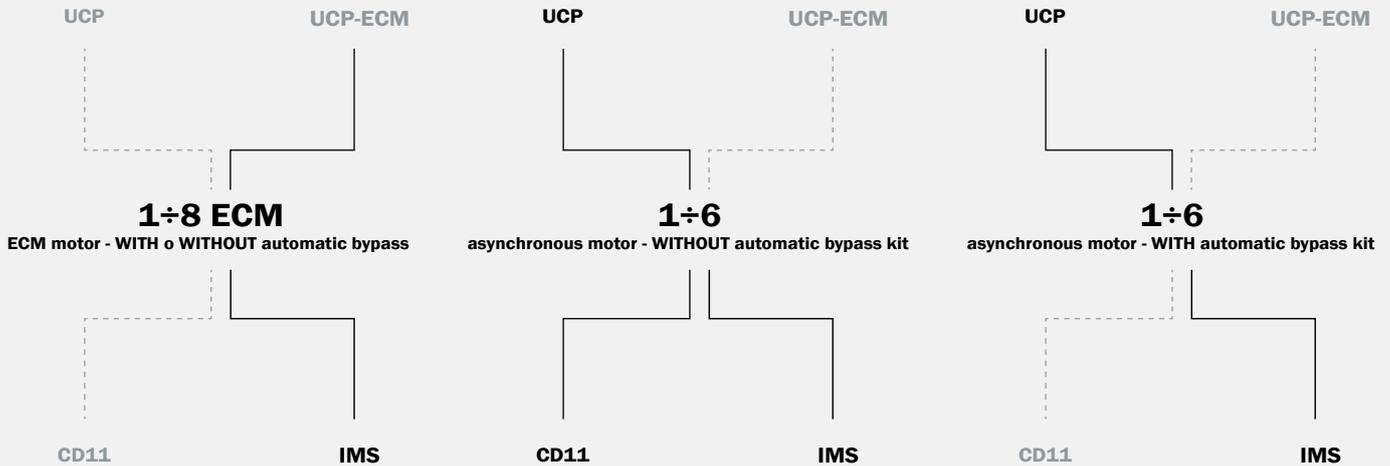

---

**Kit weather hood for external installation**

---

CLEAN

## Structure:

### CLEAN-A single panel unit:

shaped galvanized steel profiles, ABS corner sections and galvanized steel panels lined with polyester, 10 mm thick.

### CLEAN-B unit with double paneling:

extruded aluminum profiles, angular in ABS and panels in double paneling with interposed polyurethane foam density 45 kg/m<sup>3</sup>.

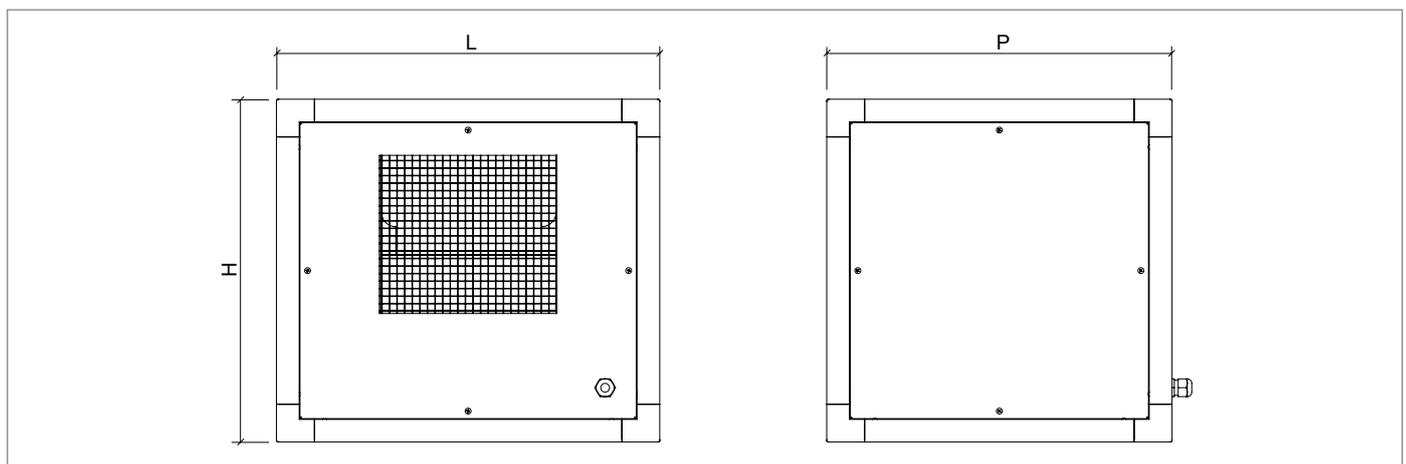

### Fan section

Forward blades double suction fan, with single-phase asynchronous motor directly coupled to 3 speeds. Single speed motors are available on request.

The series can be equipped with a wide range of accessories specifically designed and selected to be able to offer the customer solutions that can respond to every system requirement.

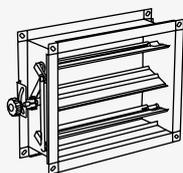

Where provided, the accessories can also be supplied already installed and tested in the company, or supplied separately. For the complete list of available accessories, please refer to the price-list catalog.

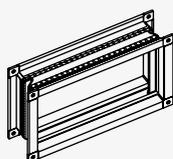

**Galvanized sheet protection and galvanized pre-painted protection**

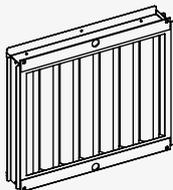

**Support air lock regulation**

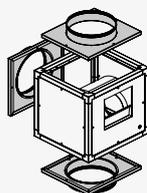

**Air lock:**  
Intake air lock regulation or overpressure air lock

**Anti-vibrating joint**

**Filters:**  
Acrylic air filter section (waved thickness 48 mm)

**Circular spigot:**  
for supply or lateral intake, in many different configuration as rear - top - bottom - lateral intake circular spigot

# Compatibility of controls / Controller functions

For the complete specifications of the controls, please refer to the part relating to the controls, available from page 300.

# CONTROLS

Regulation

# Precision control, guarantee of comfort

Eden offers a wide and advanced range of control equipment and their related accessories that are properly developed and designed in order to manage in a dynamic and clear manner the best conditions of the indoor comfort selected by the user.

Various solutions are available based on the intended use, accuracy of desired comfort and on the type of investment.

## SDP / SDP-HP

### Power interface

Power interface to control a single only one unit from a single thermostat.

Installation on Din rail (6 modules) directly on board unit or inside a switchboard.

Power supply: 230 Vac 50 Hz - No. 1 motor output: 5,5 A (SDP) - No. 2 motor output: 5,5 A + 5,5 A (SDP-HP)

**Applications:** control of a single fan motor to avoid thermostat overload (in case the motor input current is higher than thermostat power output).

## SDI-V

### Interface card

Interface card to control up to 4 units from a single thermostat.

Installation on Din rail (9 modules) directly on board unit or inside a switchboard.

Power supply: 230Vac 50Hz - Motor output: 1,5 A - Valves output: 5 A

**Applications:** control of up to 4 fan coils with 2 or 4 pipe systems in environments where a single control/thermostat is required. Suitable for 2 pipe system, 2 pipe/4pipe system + 230Vac on/off valves and asynchronous motor.

## i-COM

### Base switch without temperature control (2 and 4 pipe units)

**Main functions:** switching the unit on and off - manual heating/off/cooling selection - manual fan low-med-high speed selector switch - input for minimum water temperature thermostat (bimetallic contact) - output for cool valve and heat valve

Installation: directly on board unit (\*)

Power supply: 230 Vac 50 Hz. Contact rating: 2,5 (0,5) A

**Applications:** control for a single unit in environments where automatic temperature control is not required. Suitable for 2 pipe system and 4 pipe system.

## i-Basic 1

### Analog electronic thermostat (2 and 4 pipe units)

**Main functions:** switching the fan coil on and off - room temperature adjustment - manual heating/off/cooling selection - manual 3 speed setting

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply: 230 Vac 50 Hz. Contact rating: 3 (1) A

Inputs for air intake sensor and for minimum water temperature thermostat (bimetallic contact). 2 outputs for on-off type valve 230 Vac. Outputs: 3(1) A; 230 Vac.

**Applications:** control of a unit: 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves.

## i-Basic 2

### Analog electronic thermostat (2 and 4 pipe units)

**Main functions:** switching the unit on and off - room temperature adjustment - manual heating/off/cooling selection or automatic (by supply water sensor) - destratification - neutral zone - manual 3 speed setting

**Programmability through jumper of the functions:**

Fan mode - System type (2/4 pipes) - Electric heater function mode.

Inputs for air intake sensor and minimum water temperature sensor, 2 outputs for on-off valve 230 Vac / electric heater, output for electric heater.

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply: 230 Vac 50 Hz - Contact rating: 1A

**Applications:** control of a single unit: 2 pipe system, 2 pipe system + valve with automatic or manual Sum/Win changeover, 2 pipe system + electric heater, 4 pipe system + 2 valves with manual or automatic heating/cooling changeover or 1 cool valve and electric heater for heating.

(\*) (ELIOS unit only)

## i-Basic 3

### Analog electronic thermostat with simplified DIP-SWITCH programming

**Main functions:** room temperature adjustment - manual or automatic heating/off/cooling selection - manual and automatic 3 speed setting - destratification - neutral zone - ECM/asynchronous motor control

**Programmability through jumper of the functions:**

fan mode - system type (2/4 pipes) - electric heater function mode

**Installation:**

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply: 230Vac/50Hz - Contact rating: 1A

**Applications:**

Suitable for 2 pipe system, 2 pipe system + on/off or floating valve, 2 pipe system + on/off valve and electric heater, 4 pipe system + 2 on/off valves with neutral zone, with ECM or asynchronous motor.  
- Suitable for unit with ECM or asynchronous motor.

## i-Digit 0

### Programmable electronic thermostat with LCD display (2 and 4 pipe fan coil units)

**Main functions:**

temperature and set point display on backlit LCD - real time clock

**Programmable functions for 2 and 4 pipes system:** temperature control - automatic speed motor control - ECM motor control - modulating (0-10Vdc) or on-off valves control - electric heating control - economy function - window contact - remote sensors inputs - antifreeze function - filter dust control - auxiliary input

**Installation:**

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply: 230 Vac 50 Hz - Contact rating: 1A

**Applications:** control of units which require automatic functions and modulation of the power of the unit to improve indoor comfort.

## i-Digit 1 i-Digit 2 i-Digit 3

### Programmable electronic thermostat with LCD display (2 and 4 pipe fan coil units)

**Main functions:**

temperature and set point display on backlit LCD - real time clock

**Programmable functions for 2 and 4 pipes system**

	i-Digit 0	i-Digit 1	i-Digit 2	i-Digit 3

**Installation:**

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply: 230 Vac 50 Hz. - Contact rating: 1A

**Applications:** control of units which require automatic functions and modulation of the power of the unit to improve indoor comfort.

(\*) (ELIOS unit only)

## QCB

### Base control panel

Control for 2/4 pipes units without room temperature control.

**Main functions:** switching the unit on and off - manual heating/off/cooling selection - manual 3 speed setting

Installation: on board unit

Power supply: 230 Vac 50 Hz

Input for minimum water temperature thermostat (bimetallic contact).

2 outputs for on-off type valve 230 Vac.

**Applications:** control for a single unit in hotel rooms, offices and dwellings where a built-in temperature controller is not required.

Suitable for 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves with manual heating/cooling change-over (minimum water temperature thermostat TC is necessary)

## QCL / QEL

### Sheet base control panel

Unit controller without environment temperature control.

**Main functions:** switching the unit on and off - manual heating/cooling selection - manual 3 speed setting

Installation: on board unit

Power supply: 230 Vac 50 Hz.

**Applications:** control of a single unit where manual functions are required.

Suitable for 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves with heating/cooling manual switching.

## QTE / QTM

### Base control panel with electronic room thermostat / electromechanical bulb thermostat

QTE: electronic thermostat

QTM: electromechanical electronic

**Main functions:** switching the unit on and off - room temperature adjustment - manual heating/off/cooling selection - manual 3 speed setting

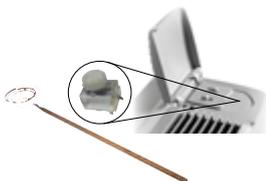

Installation: on board unit

Power supply: 230 Vac 50 Hz.

Input for minimum water temperature thermostat (bimetallic contact)

2 outputs for on-off type valve 230 Vac.

**Applications:** control for a single unit where manually controlled functions and precise automatic room temperature adjustment are required. Suitable for 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves with manual heating/cooling changeover.

TC

### Water low temperature thermostat

Low temperature thermostat - minimum water temperature (35°C bimetallic contact).  
Installation: on board unit, designed for insertion between exchanger fins.

**Applications:** suitable for a single 2 or 4 pipe unit connected to either heat pump or boiler.  
In the 4 pipe unit the thermostat shall be installed in the heat exchanger.

TC-B

### Water low temperature strap fastening thermostat

Minimum water temperature thermostat (bimetallic contact 38°C)  
Installation: on board unit, designed for fixed on pipe with special spring collar.

**Applications:** suitable for a single 2 or 4 pipe unit connected to either heat pump or boiler.

-

### Antifreeze thermostat for fan coil units

Antifreeze thermostat with automatic reset for battery safety and check for external air temperature in presence of motorized damper.

The sensitive bulb shall be inserted between two battery fins or in presence of outdoor air intake motorized gate in the intake gate.

Installation: on board unit. Power supply: 230 Vac - Output: 5 A

**Applications:** suitable for a single unit.  
It shall ensure that the battery or external air temperature does not decrease below a preset warning value of 5°C.

37T

### Automatic heating/cooling changeover

Automatic heating/cooling changeover switch to be used with basic control panel with room temperature remote bulb thermostat and thermostats with heating/cooling changeover input from mechanic changeover.

Installation: on board unit (designed for fixing to pipe with relative steel clip).

**Applications:** to be installed on a single unit.  
Suitable for 2 pipe system, 2 pipe system + 3 way valves (it must be installed upstream of the valve on the water delivery pipe).

-

### Wall humidistat

Humidistat to monitor environment relative humidity.

Installation: wall-mounted

**Applications:**  
Dehumidification: activation of the unit in cooling mode.  
N.B.:

- 1) The humidistat, being provided with a switching contact, cannot control the three fan speeds.
- 2) The output (switching contact) must be interfaced with a relay according to installation/system requirements.

## TRI/F1 2.0

### Remote control + Motherboard + Receiver

Infrared remote controller or wall controller with MODbus communication protocol.

**Main functions:** switching the unit on and off - manual and automatic heating/cooling selection - manual and automatic 3 speed setting - setting the required temperature - ECM/asynchronous motor control - automatic and manual changeover switch (2 and 4 pipe units) - on-off valves control, 2 and 3 ways - on/off electric heater control with aftercooling - stratification prevention - automatic stand-by in absence of hot/cold water - master-Slave control in the local network - control (Slave) by supervision (MODbus) - in MODbus, all functions are remotely managed - functions setting through DIP Switch - sensors and water temperature alarm

Installation: on board unit. Controls regulation manageable by remote control or wall control  
Power supply: 230 Vac 50/60 Hz - Contact rating: 1 A

**Applications:** control of a single unit where automated functions and modulating unit flow's power are required to improve environmental comfort.

## CD11

### Control for unit without temperature control

**Main functions:** switching the unit on and off - manual heating/off/cooling selection - manual 3 speed setting

Installation: wall-mounted (surface mounting).  
Power supply: 230 Vac 50 Hz - Contact rating: 5 (1,5) A

**Applications:** control for a single unit in environments where automatic temperature control (with thermostat) is not required. Suitable for 2 pipe system.

## i-10

### Analog electronic thermostat (2 and 4 pipe units)

**Main functions:** switching the unit on and off - room temperature adjustment - manual heating/cooling selection - manual 3 speed setting

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit. Air intake sensor is required.

Power supply: 230 Vac 50/60 Hz - Contact rating: 5 (1) A

Inputs for air intake sensor and for minimum water temperature thermostat (bimetallic contact), 2 outputs for on-off type valve 230 Vac.

**Applications:** control of a single unit. Suitable for 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves with manual heating/cooling changeover.

## i-20

### Analog electronic thermostat (2 pipe units)

**Main functions:** switching the unit on and off - room temperature adjustment (internal air sensor) - off/on/manual selection - manual 3 speed setting

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit. Air intake sensor is required.

Power supply: 230 Vac 50/60 Hz - Contact rating: 5 (1) A

Input for heating/cooling changeover: central control (from remote changeover switch) or automatic (with changeover switch 37T). input for air intake sensor.  
Output for on-off type valve 230 Vac.

**Applications:** thermostat for the control of a single unit where a central or automatic heating/cooling function is required. Suitable for 2 pipe system, 2 pipe system + valve.

i-25

**Analog electronic thermostat (4 pipe units)**

**Main functions:** switching the unit on and off - room temperature adjustment - automatic heating/cooling selection with adjustable neutral zone - manual 3 speed setting

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit. Air intake sensor is required.

Power supply: 230 Vac 50/60 Hz - Contact rating: 5 (1) A

Input for air intake sensor, 2 outputs for on-off type valves 230 Vac.

**Applications:** Thermostat for the control of a single unit where an automatic heating/cooling function with neutral zone is required. Suitable for 4 pipe system + 2 valves.

i-30

**Programmable electronic thermostat with LCD display**

**Main functions:** switching the unit on and off - room temperature adjustment - manual or automatic heating/cooling selection - manual or automatic 3 speed setting - display for reading/displaying room and set point temperature - control of modulating valves (0-10 Vdc) and ECM or asynchronous motor - on/off valves and modulating motor - programmability of functions - **ON/OFF VALVES AND ASYNCHRONOUS MOTOR NON COMPATIBLE**

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply:

- 230 Vac 50/60 Hz (for use with modulating valves 230 Vac),
- 24 Vac 50/60 Hz (for use with modulating valves 24 Vac).

Inputs for air intake sensor, minimum water temperature thermostat/sensor or window contact, central heating/cooling changeover.

State of filter control; function: economy, frost protection, stratification prevention.

2 outputs for modulating valves (0-10 Vdc), 1 output for ECM motor, output for 3-speed motor.

Possibility of control for extra electric heater.

**Applications:** control of a single unit i where automated functions or fine modulating of the flow of water to the unit are required to improve environmental comfort.

Suitable for 2 pipe system, 2 pipe system + modulating valve + possible electric heater, 4 pipe system + 2 modulating valves with automatic or manual changeover between heating/cooling.

**Important: when used with 24 Vac valves, the thermostat must be powered through a 230/24 Vac transformer.**

i-50

**Programmable electronic thermostat with LCD display**

**Main functions:** switching the unit on and off - room temperature adjustment - manual or automatic heating/cooling selection - manual or automatic 3 speed setting - display for reading/displaying room and set point temperature - control of on/off and floating (3-point) valves - control of electric heater - programmability of functions

Installation:

- wall-mounted (surface mounting with centres for box 503)
- directly on board unit (\*). Air intake sensor is required.

Power supply:

- 30 Vac 50/60 Hz (for use with modulating valves 230 Vac),
- 24 Vac 50/60 Hz (for use with modulating valves 24 Vac).

Inputs for air intake sensor, minimum water temperature thermostat/sensor or window contact, central heating/cooling changeover.

State of filter control; function economy, frost protection, stratification prevention.

2 outputs for on/off type or floating (3-point) valves.

Possibility of control for extra electric heater.

**Applications:** control of a single unit where automated functions or the possibility of modulating the flow of water to the unit are required to improve environmental comfort.

Suitable for: 2 pipe system, 2 pipe system + valve + possible electric heater, 4 pipe system + 2 valves with automatic or manual changeover between heating/cooling with neutral zone.

**Important: when used with 24 Vac valves, the thermostat must be powered through a 230/24 Vac transformer.**

(\*) WIND unit only

i-60

## Touch fan coil thermostat with WiFi connection

### Main functions:

WiFi connection for remote control of the fan coil using the app - backlit touch display - approaching sensor - switching the unit on and off (manual and time-controlled) - 7 days 4 periods programmable - room temperature adjustment - manual or automatic heating/cooling selection - manual and automatic 3 speed setting - on/off 230 Vca valve unit control

Installation: wall-mounted

Mounting: flush or wall box (not included)

External thermostat dimensions: 86x86x40mm

Wall box (not included): flush or wall mounting box specific for thermostats size 86x86mm, minimum depth of 48mm. Hole pitch: 60 mm

Power supply: 85-250 Vac 50/60 Hz - Contact rating: 2 (1) A

No. 2 output for on/off valves 230 Vac

No. 3 output for speed asynchronous motor 230 Vac

Internal WiFi antenna included

**Applications:** temperature control in residential or commercial area, equipped with fan coil with 3-speed asynchronous motor in a 2 or 4-pipe system. In the presence of a WiFi network, remote control is possible using the App supplied and operating on Android and iOS systems. Using the App it is possible to control the room temperature, change it, switch the fan coil on/off, change the heating/cooling mode, change the rotation speed of the motor. The same App allows simultaneous control of multiple thermostats of the same type.

i-70

## Touch programmable electronic thermostat with MODbus/BACnet protocol communication

Touch programmable electronic thermostat with MODbus/BACnet protocol communication (unit 2 and 4 pipe system)

**Main functions:** Rs485 MODbus communication port and BACnet for supervisions - CO<sub>2</sub> or RH% integrated sensors (options) - backlit touch display - function configuration using dip switches - ECM and asynchronous motor management - management of modulating valves 0-10 V and on-off - single and two-stage electric heater management - underfloor heating and fan coil management for cooling only - window contact / occupancy - economy function - filter status check

Installation: wall-mounted (embedded in box 503)

Power supply: 230 Vac 50/60 Hz - Contact rating: 3 (1) A

**Applications:** temperature control in residential or commercial area, equipped with fan coil in 2 or 4 pipe system. optional CO<sub>2</sub> control; optional RH% control.

503FA

## Electronic thermostat with LCD display

Pic.: black external cover (optional)

**Main functions:** switching the unit on and off - room temperature adjustment - manual or automatic heating/cooling selection with neutral zone - manual or automatic 3 speed setting - display for reading/displaying room and set point temperature - on-off valve control

Installation: wall mounted, (embedded in box 503)

Power supply: 230 Vac 50 Hz. - Contact rating: 3 (1) A

Input for minimum temperature sensor (sensor included).

**Applications:** control of a single unit where a combination of precision and modern design is required. Embedded in box 503.

Suitable for 2 pipe system, 2 pipe system + valve, 4 pipe system + 2 valves with automatic heating/cooling changeover with neutral zone.

503 CT

## Chronothermostat with LCD display

Pic.: black external cover (optional)

Chronothermostat for switch on/off based on time and environment temperature of single or multiple fan coils, or circulation pump or zone valve opening/closing.

**Main functions:** weekly 24h programming - two temperature levels - environment temperature control - manual heating/cooling selection

Display to read/display environment temperature, set point, current time, daily/weekly program.

Installation: wall mounted, embedded in box 503.

Power supply: 230Vac/50Hz - Contact rating: 5 (0,5) A

**Applications:** it is suitable for offices and homes where automatic switch on/off of a heating/cooling system is required for comfort and energy saving. It cannot manage the 3 fan speeds.

TA/1

## Electronic regulator

**Main functions:** switching the circulating pump on and off or opening/closing the zone valve - room temperature adjustment - manual off/heating/cooling selection - remote air sensor input

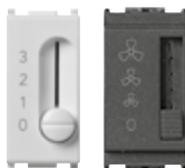

Installation: wall-mounted (surface mounting).

Power supply: 230 Vac 50 Hz - Contact rating: 5 (1) A

**Applications:** control of a single zone valve or circulating pump. Suitable for 2 pipe system. It cannot manage the 3 fan speeds.

COM-V

## Changeover switch with slide selector (VIMAR)

**Main functions:** switching the fan on and off - manual 3 speed setting

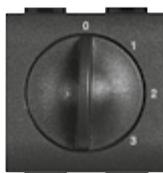

Installation: wall mounted, embedded in box 503.

Power supply: 230 Vac 50 Hz - Contact rating: 2 A

**Applications:** speed control of one single fan.

COM-B

## Changeover switch with rotary selector (Bticino)

**Main functions:** switching the fan on and off - manual 3 speed setting

Installation: wall mounted, embedded in box 503.

Power supply: 230 Vac 50 Hz - Contact rating: 3 A

**Applications:** speed control of one single fan.

## S-Mod

## Supervision system

Wall user interface

Floor router

Fan coil card  
(cover=accessory)

Infrared remote control

Controllers suitable for the connection to supervision systems.

These are electronic cards to be installed on the unit to control the room temperature and all unit functions. The cards are equipped with serial communication port type RS485 for connection to MODbus, BACnet or proprietary (MX) supervision systems, based on the card model.

Each card can be connected to the user interface to be installed on the wall.

The interface allow the user to turn on/off the unit, change the room temperature, change the speed, choose the heating/cooling mode, etc.

Alternatively to the user interface, it is possible to connect the IR receiver and use the IR remote control as an interface with the same functions above.

With the IR remote control is also possible to set a time to switch on and off.

If connected to supervision system, the cards can be managed remotely in all their functions based on the characteristics of the supervision software.

**Main functions:** temperature control of an environment/zone - on/off or modulating valves control - ECM or asynchronous motor control - manual and automatic 3-speed selection - manual or automatic heating/cooling selection - time slot setting and operation - temperature set point threshold - alarm status

**Applications:** local and remote control of a system composed of several fan coils distributed within a building and for which you want to set similar functions or plan start-up/turn-off at predefined times without having a physically access to each unit.

The system is suitable for 2 and 4 pipe fans with asynchronous or ECM motor and on-off or modulating valves.

## FAN 01

## Configurable fan coil controller with BACnet communication protocol

### Main functions:

RS485 BACnet communication port for supervision - room temperature control - supply temperature control - manual / automatic change/over - occupy/unoccupy room contact - temporary occupancy input - window contact - dew point sensor input - Soft-Start coil sensor - output for ECM and asynchronous motor - outputs for modulating and on-off valves - electric heater output - 24 Vac output for supplying modulating valves - wall-mounted user interface with or without display - Webserver FAN01WEB (optional) with Ethernet converter and integrated WiFi for centralized management - dip switches for function configuration and addressing

Installation: on board unit on the DIN bar, or with screw-mounted installation.

Power supply: 230 Vac 50/60 Hz

User interface for wall-installation

7 on-off output and 3 modulating for motor and valves.

4 digital inputs for command signals

4 analog inputs for NTC probes

**Applications:** control of fan coil or ductable unit where automated functions are required and connection to BACnet supervisor or via Ethernet / WiFi web server (optional).

Suitable for 2-pipe and 4-pipe systems, with possible additional electric heater.

## 010 LCD 2T 010 LCD 4T

### On board electronic control, with touch LCD interface

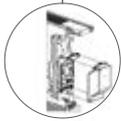

On-board electronic control complete with main board and LCD touch display.

**Main functions:** on-off and room temperature control touch buttons - auto and manual change-over - manual and automatic modulating speed control - set point and room temperature display - on-off valves and modulating motor - boiler and chiller enabling outputs - occupancy input contact - night silence function.

Installation: on board unit

**Applications:** control of the fan coil unit (\*) in a residential and commercial environment (offices, shops, etc.).

Main board  
2 or 4 pipes

## WALL LCD1

### Touch LCD interface wall-mounted

Wall-mounted control panel with touch keypad and room probe  
(to be paired with 1 to max 30 MB 010 2T1 or MB 010 4T1)

**Main functions:** on-off and room temperature control touch buttons - auto and manual change-over - manual and automatic modulating speed control - set point and room temperature display - on-off valves and modulating motor - boiler and chiller enabling outputs - occupancy input contact - night silence function - control up to 30 fan coil unit in Master-Slave mode - it can be connected to the (\*\*) network

Installation: on board unit

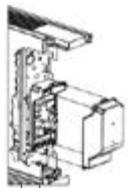

**Applications:** control up to 30 fan coil unit (\*) in Master-Slave mode.

up to 30 units  
2 or 4 pipes

## MB 010 E

### On board electronic PCB for external system regulator 0-10Vdc

Main on-board PCB for external 0-10Vdc command equipment.  
For 2 pipes system only.

**Main functions:** automatic on-off of the unit - automatic fan speed modulation

Installation: on board

**Applications:** it controls the fan coil unit (\*) starting from a 0-10V signal supplied by an external thermostat. The temperature control is submitted to the external thermostat which will provide a signal proportional to the difference between the measured and set temperature.

(\*) Miniflat  
(\*\*) MiniflatNet

i-30

## Programmable electronic thermostat with LCD display (wall-mounted installation only)

**Main functions:** switching the unit on and off - room temperature adjustment - manual or automatic heating/cooling selection - manual or automatic 3 speed setting - display for reading/displaying room and set point temperature - control of modulating valves (0-10 Vdc) and ECM or asynchronous motor - on/off valves and modulating motor - programmability of functions - **ON/OFF VALVES AND ASYNCHRONOUS MOTOR NON COMPATIBLE**

Installation:

- wall-mounted (surface mounting with centres for box 503)

Power supply:

- 230 Vac 50/60 Hz (for use with modulating valves 230 Vac),
- 24 Vac 50/60 Hz (for use with modulating valves 24 Vac).

Inputs for air intake sensor, minimum water temperature thermostat/sensor or window contact, central heating/cooling changeover.

State of filter control; function: economy, frost protection, stratification prevention.

2 outputs for modulating valves (0-10 Vdc), 1 output for ECM motor, output for 3-speed motor.

Possibility of control for extra electric heater.

**Applications:** control of a single unit i where automated functions or fine modulating of the flow of water to the unit are required to improve environmental comfort.

Suitable for 2 pipe system, 2 pipe system + modulating valve + possible electric heater, 4 pipe system + 2 modulating valves with automatic or manual changeover between heating/cooling.

**Important: when used with 24 Vac valves, the thermostat must be powered through a 230/24 Vac transformer.**

WEB S

## WEB server Kit for remote centralized control up to 30 fan coils

**Main functions:** supervision of the fan coil unit (\*) network - single and zoned programming - fan coil unit (\*) keylock

Installation: wall-mounted (in technical room).

Power supply: 230 Vac 50 Hz.

**Applications:** WEB supervision of the fan coil unit (\*) network through a PC or tablet using the building's LAN.

MB 010 WEB

## Electronic board without adjustment interface

Main on-board PCB for connection to WEB S

**Main functions:** complete management of fan coil unit (\*) based on data received from WEB S.

Installation: on board (\*).

**Applications:** it is used when the management of the fan coil unit (\*) is completely submitted to the WEB S supervision.

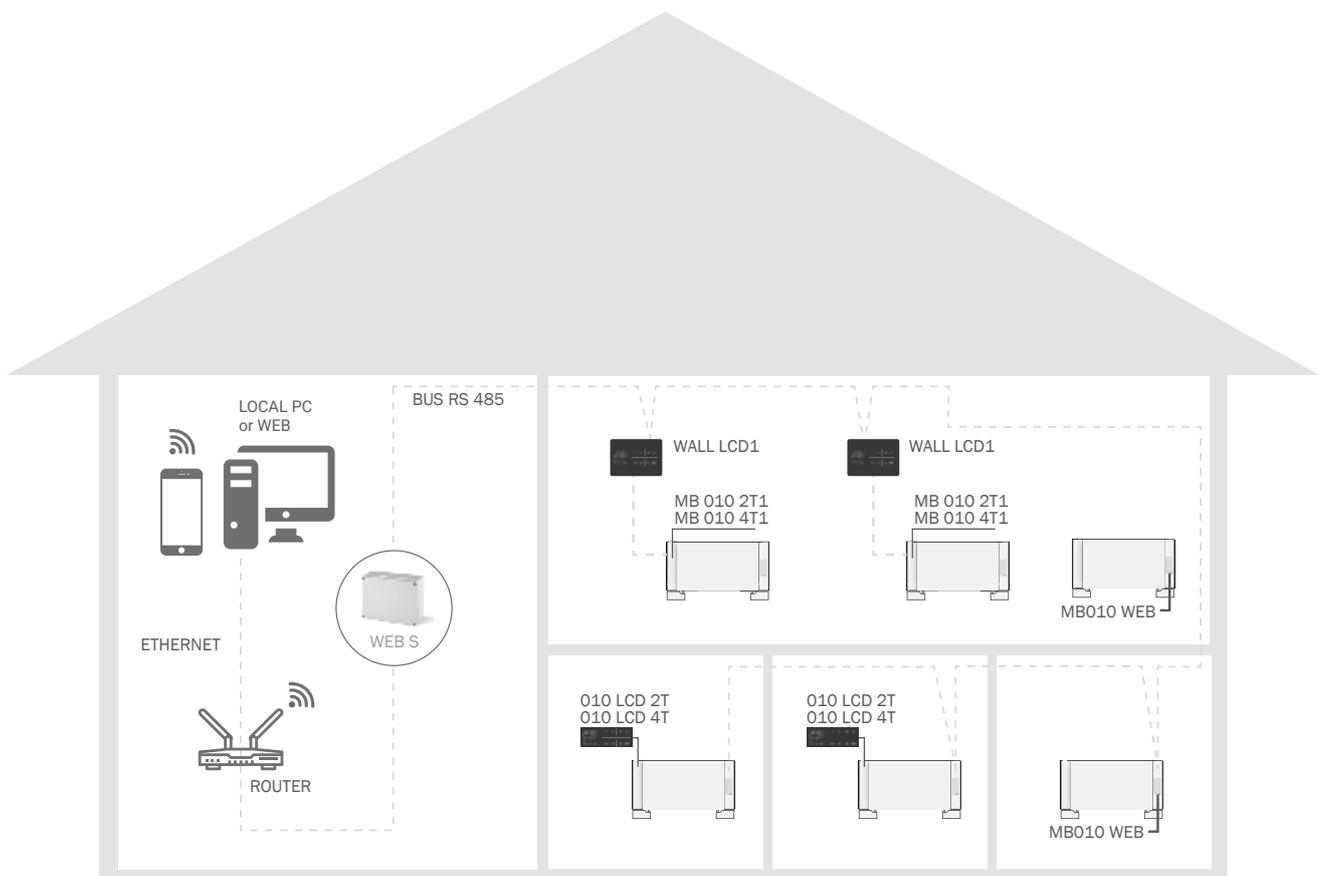

## MiniflatNet: centralized management system of the Miniflat fan coil network

MiniflatNet is the centralized management system of the Miniflat fan coil network via wired LAN or Wifi connection.

It allows the end user to manage the fan coils using the internet browser installed on a PC, laptop or smartphone, avoiding the use of a dedicated supervision software.

It allows the installer to easily set up environments in areas or groups based on user requirements.

The system allows zones managing, daily schedule, command lock for public spaces, windows contacts, occupancy override in order to save energy in hotels, offices, public spaces.

## UCP

### Unit control panel

The UCP system consists of two parts: on-board card and unit control panel with display.

The panel allows the room temperature both in heating and cooling operation, allows to enable/disable the water coil or the electric heater, select the fan operating speed minimum, medium, maximum regulation and controls the free-cooling function by input from NTC probes.

#### Main functions:

- switching the unit on and off
- manual heating / cooling selection
- manual and automatic speed selection (3 speed motor)
- time schedule
- wall-mounted installation (surface mounting)

#### Technical characteristics:

Power supply: 230 -10/+10% Vac, 50 Hz  
 Max load: 1A at 230Vac  
 Type of protection: IP 21  
 Working temperature: +5°C / +35°C

## UCP-ECM

### Unit control panel

There are different versions depending on the intended function.

The panel allows the room temperature both in heating and cooling operation, allows to enable/disable the water coil or the electric heater, selects the working speed of the fan by means of modulating regulation and manages the free-cooling function by input from NTC probes.

Ventilation control according to ambient air quality (UCPM-ECM version)

#### Main functions:

- switching on and off the unit;
- manual heating/cooling selection;
- manual and automatic speed selection (0-10VDC modulating motor)
- time schedule
- MODbus supervision (MODbus version)
- wall-mounted installation (surface mounting)

#### Technical characteristics:

Power supply: 230 -10/+10% Vac, 50 Hz  
 Max load: 1A at 230Vac  
 Type of protection: IP 21  
 Working temperature: +5°C / +35°C

## CD11

### Speed controller

Control without temperature regulation.

#### Main functions:

- switching on and off the unit;
- manual heating/cooling selection;
- manual 3-speed selection
- wall-mounted installation (surface mounting)

#### Technical characteristics:

Power supply: 230 -15/+10% Vac, 50 Hz  
 Max load: 5A at 250Vac  
 Type of protection: IP 30  
 Working temperature: 0°C / +40°C

# FLOW-SHE and FLOW-HHE controllers

## - Integrated management system IMS-I

The IMS system allows the integrated management of all heat recovery unit functions.

### Main functions:

- air flow control, manually or by sensor
- automatic free-cooling (by turning on heat recovery by-pass device)
- antitreeze protection (without any additional antifreeze thermostat)
- heat recovery defrost
- control of water valves (both on/off and modulating type)
- on/off control of electric heater
- remote on/off input
- on/off output for contemporary auxiliary devices
- weekly program
- alarm management (sensor failure, air filter dirty)
- MODbus supervision (accessory)
- available for installation on the unit (IMS-I) or remote (IMS-R)

### Technical characteristics:

Power supply: 230 -10/+10% Vac, 50 Hz

Type of protection: IP 30

Working temperature: +5°C / +35°C

## - IMS remote user terminal

Accessory for IMS system

## - MODbus supervision module for Integral Management System (IMS)

Accessory for IMS system

It adds the compatibility with the MODbus communication protocol to the system, for the supervision of the unit's operating parameters.

## - CO<sub>2</sub> sensor

Suitable for ventilation controlling according to ambient air quality.  
Available in version for duct installation and in the room.

## - Humidity sensor

Suitable for ventilation controlling according to ambient air quality.  
Available in version for duct installation and in the room.
